The Meaning of the Body Mark Johnson, 2024-05-31 Demonstrates that the aesthetic and emotional aspects of meaning are fundamental and that the arts show meaning making in its fullest realization

George Lakoff author of *Moral Politics* In *The Meaning of the Body* Mark Johnson continues his pioneering work on the exciting connections between cognitive science language and meaning first begun in the classic *Metaphors We Live By* Johnson uses recent research into infant psychology to show how the body generates meaning even before self consciousness has fully developed From there he turns to cognitive neuroscience to further explore the bodily origins of meaning thought and language and examines the many dimensions of meaning including images qualities emotions and metaphors that are all rooted in the body's physical encounters with the world Drawing on the psychology of art and pragmatist philosophy Johnson argues that all of these aspects of meaning making are fundamentally aesthetic He concludes that the arts are the culmination of human attempts to find meaning and that studying the aesthetic dimensions of our experience is crucial to unlocking meaning's bodily sources Throughout Johnson puts forth a bold new conception of the mind rooted in the understanding that philosophy will matter to non philosophers only if it is built on a visceral connection to the world A courageous and ultimately successful book Lucas Keefer *Metapsychology* A cutting edge treatise reflecting the newest developments on the mind body and mind world problems and properly places aesthetics center stage in the study of meaning and understanding Raymond W Gibbs Jr author of *Embodiment and Cognitive Science* Energetically argued clearly written well structured admirably wide ranging and impressively well informed Richard Marc Shusterman author of *Body Consciousness* *A Philosophy of Mindfulness and Somaesthetics* Motivational Immediacy in the Workplace Jonathan E. Taylor, 2022-05-02 Learners are always motivated they just may not be motivated to learn the things you are wanting them to learn Motivational Immediacy refers to the moment by moment motivation of learners during a learning event This is in contrast to typical global views of motivation and while casting a much heavier burden on the instructor brings with it more deep meaningful and permanent learning Motivational Immediacy in the Workplace focuses not only on fostering learner engagement with a primary emphasis on the role of the instructor but also addresses the work and concerns of curriculum writers and training directors The author defines Motivational Immediacy as both a phenomenon and a practice and provides concrete steps for practical action Motivational Immediacy as a construct refers to a moment by moment feeling of motivation on the part of the learner to engage in the learning opportunity directly at hand As a practice it is the instructor's process of working to stay connected with individual learners and foster engagement consistently at every moment of the teaching activity The author addresses this idea from a learner centered orientation making the case that understanding and empathizing with the learner's perceptions is the most effective way to promote efficient meaningful learning The book will provide a comprehensive conceptualization of learning engagement and learning resistance It begins with a substantial theoretical framework and then shifts to direct applications to practice in the workplace Motivational Immediacy is multidisciplinary and draws from fields such as Adult Education Workplace and Training Development Psychology Educational Psychology Sociology Cultural Anthropology and Communications **Jane on the Brain** Wendy

Adrian Johnston,Catherine Malabou,2013-06-04 Adrian Johnston and Catherine Malabou defy theoretical humanities deeply entrenched resistance to engagements with the life sciences Rather than treat biology and its branches as hopelessly reductive and politically suspect they view recent advances in neurobiology and its adjacent scientific fields as providing crucial catalysts to a radical rethinking of subjectivity Merging three distinct disciplines European philosophy from Descartes to the present Freudian Lacanian psychoanalysis and affective neuroscience Johnston and Malabou triangulate the emotional life of affective subjects as conceptualized in philosophy and psychoanalysis with neuroscience Their experiments yield different outcomes Johnston finds psychoanalysis and neurobiology have the potential to enrich each other though affective neuroscience demands a reconsideration of whether affects can be unconscious Investigating this vexed issue has profound implications for theoretical and practical analysis as well as philosophical understandings of the emotions Malabou believes scientific explorations of the brain seriously problematize established notions of affective subjectivity in Continental philosophy and Freudian Lacanian analysis She confronts philosophy and psychoanalysis with something neither field has seriously considered the concept of wonder and the cold disturbing visage of those who have been affected by disease or injury such that they are no longer affected emotionally At stake in this exchange are some of philosophy s most important claims concerning the relationship between the subjective mind and the objective body the structures and dynamics of the unconscious dimensions of mental life the role emotion plays in making us human and the functional differences between philosophy and science
