specialist police officers police surgeons and paediatricians have a number of anxieties about working with child sexual abuse cases they can usually avail themselves of specific training detailed books and articles and the support of experienced colleagues to help sustain them through any difficulties It is non investigating workers on the periphery of child protection work many of whom are health professionals who are left feeling worried and vulnerable They may encounter only one or two cases of child sexual abuse during their careers and because the numbers they have to work with are small their employers perhaps understandably are reluctant to give them any special training in child protection work
