Oxford 1st Of Space:

Governance of Emerging Space Challenges Nikola Schmidt, 2022-04-22 This edited volume discusses how even small nation states can make a significant difference in the future of space governance The book is divided into three main sections covering political theory case studies and space technology and applications Key topics of discussion include planetary defense space mining and high power systems in space Through these timely subjects the book presents strategies for developing a truly global governance framework in space based on the concept of a responsible cosmopolitan state Authored by a multidisciplinary group of researchers from the Czech Republic the volume will appeal to other scientific teams and policymakers looking to become pioneers of cosmopolitan space policies at a national and global level Surface and

Underground Project Case Histories E. Hoek, 2016-09-08 Surface and Underground Project Case Histories Military Leaders and Sacred Space in Classical Greek Warfare Sonya Nevin, 2016-11-10 The ancient Greeks attributed great importance to the sacred during war and campaigning as demonstrated from their earliest texts Among the first four lines of the Iliad for example is a declaration that Apollo began the feud between Achilles and Agamemnon and sent a plague upon the Greek army because its leader Agamemnon had mistreated Apollo's priest In this first in depth study of the attitude of military commanders towards holy ground Sonya Nevin addresses the customs and conduct of these leaders in relation to sanctuaries precincts shrines temples and sacral objects Focusing on a variety of Greek kings and captains the author shows how military leaders were expected to react to the sacred sites of their foes She further explores how they were likely to respond and how their responses shaped the way such generals were viewed by their communities by their troops by their enemies and also by those like Herodotus Thucydides and Xenophon who were writing their lives This is a groundbreaking study of the significance of the sacred in warfare and the wider culture of antiquity **Domestic Space in**

Eighteenth-Century British Novels Karen Lipsedge, 2012-09-28 Examining the work of three authors Richardson Haywood and Burney and their representation of domestic space this book argues that to make such spaces accessible to modern readers they need to have information of the real domestic By recreating specifics of these spaces this book innervates the fictional domestic interior for modern readers *Women's Space* Virginia Chieffo Raguin, Sarah Stanbury, 2006-01-01 This interdisciplinary collection addresses the location of women and their bequests within the single most important public and social space in pre Reformation Europe the Roman Catholic Church This innovative focus brings attention to gender and space as experienced in the medieval parish as well as in monastic and cathedral space Through provocative handling of historical content and theory the contributors explore strategies of exclusion and of inclusion and note patterns of later writers who neglect or rewrite records of female presence Essays on the York religious cycle the chronicle of the monastery at Ely and The Book of Margery Kempe explore how medieval writers used texts as fictive spaces on which to graft responses to the gendered uses of real church buildings These text based essays are juxtaposed with tightly focused archival research

in art history and history on Florentine patronage and English parish seating as well as with more broadly synthetic studies on access of women to shrines and on gendered left right placement in ritual art

Space, Time and Language in Plutarch Aristoula Georgiadou, Katerina Oikonomopoulou, 2017-10-10 Space and time have been key concepts of investigation in the humanities in recent years In the field of Classics in particular they have led to the fresh appraisal of genres such as epic historiography the novel and biography by enabling a close focus on how ancient texts invest their representations of space and time with a variety of symbolic and cultural meanings This collection of essays by a team of international scholars seeks to make a contribution to this rich interdisciplinary field by exploring how space and time are perceived linguistically codified and portrayed in the biographical and philosophical work of Plutarch of Chaeronea 1st 2nd centuries CE The volume's aim is to show how philological approaches in conjunction with socio cultural readings can shed light on Plutarch's spatial terminology and clarify his conceptions of time especially in terms of the ways in which he situates himself in his era's fascination with the past The volume's intended readership includes Classicists intellectual and cultural historians and scholars whose field of expertise embraces theoretical study of space and time along with the linguistic strategies used to portray them in literary or historical texts

Cologne Commentary on Space Law Stephan Hobe, Bernhard Schmidt-Tedd, Kai-Uwe Schrogl, 2017-03-28 The Cologne Commentary on Space Law is a three volume annotation on the written norms of space law as enunciated through the Treaties of the United Nations and its General Assembly Resolutions Volume I focuses on the 1967 Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space including the Moon and Other Celestial Bodies popularly known as the Outer Space Treaty A broad international authorship of twenty experts addresses the historical overview and provides a provision by provision interpretation of the Outer Space Treaty This Volume also includes insights into the subsequent State practice present day applicability and future perspectives of the Treaty The other four UN Treaties the 1968 Rescue Agreement the 1972 Liability Convention the 1975 Registration Convention and the 1979 Moon Agreement are addressed in Volume II which was published in 2013 Volume III published in 2015 delves into the eight most relevant United Nations General Assembly Resolutions Principles on space activities On the occasion of the 50th anniversary of the Outer Space Treaty Volume I of the Cologne Commentary on Space Law has been translated into Russian

From Supersymmetry To The Origin Of Space-time - Proceedings Of The International School Of Subnuclear Physics Antonino Zichichi, 1995-12-21

The theory of trees has its origin in the work of Lyndon on length functions in groups The first definition of an R tree was given by Tits in 1977 The importance of trees was established by Morgan and Shalen who showed how to compactify a generalisation of Teichmüller space for a finitely generated group using R trees In that work they were led to define the idea of a tree where is an arbitrary ordered abelian group Since then there has been much progress in understanding the structure of groups acting on R trees notably Rips theorem on free actions There has also been some

progress for certain other ordered abelian groups including some interesting connections with model theory Introduction to Trees will prove to be useful for mathematicians and research students in algebra and topology

The Impacts of Green Space on Student Experience at an Urban Community College Vanita Naidoo, 2022-07-19 This book presents a rich case study examining physical and spatial factors of urban campus design that influence student experience and wellbeing The text details important historical context illustrating the foundational concepts and purpose of college sites in the United States and maps economic reforms and policies which have driven the development of today's inner city campuses Focusing on Bronx Community College New York and looking specifically at how the presence or absence of green space impacts students the text then draws on diverse student voices to examine how students use open spaces and how this influences their sense of belonging stress reduction and scholarly identities The author's historical and qualitative research presents original insights and relies on a rich body of textual and on site investigation This book will be a valuable resource for researchers and academics with an interest in urban education and higher education It will be of particular interest to those with a focus on multicultural education and education policy

Political Space in Pre-industrial Europe Beat Kümin, 2016-04-22 Social and cultural studies are experiencing a spatial turn Micro sites localities empires as well as virtual or imaginary spaces attract increasing attention In most of these works space emerges as a social construct rather than a mere container This collection examines the potential and limitations of spatial approaches for the political history of pre industrial Europe Adopting a broad definition of political the volume concentrates on two key questions Where did political exchange take place How did spatial dimensions affect political life in different periods and contexts Taken together the essays demonstrate that pre modern Europeans made use of a much wider range of political sites than is usually assumed not just palaces town halls and courtrooms but common fields as well as back rooms of provincial inns and that spatial dimensions provided key variables in political life both in terms of territorial ambitions and practical governance and in the more abstract forms of patronage networks representations of power and the emerging public sphere As such this book offers a timely and critical engagement with the spatial turn from a political perspective Focusing on the distinct constitutional environments of England and the Holy Roman Empire one associated with early centralization and strong parliamentary powers the other with political fragmentation and absolutist tendencies it bridges the common gaps between late medieval and early modern studies and those between historians and scholars from other disciplines Preface commentary and a sketch of research perspectives discuss the wider implications of the essays findings and reflect upon the value of spatial approaches for political history as a whole

Concepts of Space in Greek Thought Keimpe Algra, 2016-06-21 Concepts of Space in Greek Thought studies ancient Greek theories of physical space and place in particular those of the classical and Hellenistic period These theories are explained primarily with reference to the general philosophical or methodological framework within which they took shape Special attention is paid to the nature and status of

the sources Two introductory chapters deal with the interrelations between various concepts of space and with Greek spatial terminology including case studies of the Eleatics Democritus and Epicurus The remaining chapters contain detailed studies on the theories of space of Plato Aristotle the early Peripatetics and the Stoics The book is especially useful for historians of ancient physics but may also be of interest to students of Aristotelian dialectic ancient metaphysics doxography and medieval and early modern physics
