## Religion And Terrorism:

**The Root Causes of Terrorism** Mahmoud Masaeli, Rico Sneller, 2017-01-06 Fifteen years after the tragic events of 9 11 bombs are still exploding and innocent people are being killed by terrorist groups in both western and Islamic societies Most of these sinisterly threatening events are motivated by religious claims or are taking place in religiously affected places Is religion the main cause of terrorism or does terrorism still arise because of leaders who brainwash and coach future terrorists so that they kill under the banner of religion The religious imagination seems to hold here an influential power in the creation of delusion to orient the bigot believers toward fulfilling their religious duty against those who are religious in a different way or are not religious at all Religion in this sense is tightly allied with political aspirations In spite of the religious justification of the act of killing enlightened religious leaders and religious minded people believe and argue that religion is a source of love and affection Therefore the sacred texts of religious tradition must be read from a humanist perspective because the ultimate message of religion is about the appreciation of the principle of humanity This is a growing attitude among many religious people today who believe that God is merciful and compassionate and never orders resentment violence and killing of innocent people In addition no true religious tradition appreciates self serving interpretations promoting violence against others If religion disregards love affection and compassion as its essence it drops into the dire vortex of ideological dogma as it is in the case for the Taliban ISIS Boko Haram and Al Shabab Therefore any interpretation that admits violence and killing would be a mere provincial reading of the religious texts agitated by purposeful intentions aimed at political goals This book investigates and addresses the root causes of terrorism from a religious studies perspective The themes analysed and discussed here mainly include a range of religious and philosophical issues such as religious violence in scriptural monotheism radical interpretations of religious texts militancy and sacrifice apocalypticism and terrorism and religious terrorism today The book brings together new approaches adopted by the authors to not only trace the causes of terrorism in various religious interpretations and realms but also reach a common definition of the main religious causes beyond diverse perspectives and advance solutions against religious inspired terrorism *The Cambridge Companion to Religion and Terrorism* James R. Lewis, 2017-07-25 There is currently much discussion regarding the causes of terrorist acts as well as the connection between terrorism and religion Terrorism is attributed either to religious fanaticism or alternately to political and economic factors with religion more or less dismissed as a secondary factor The Cambridge Companion to Religion and Terrorism examines this complex relationship between religion and terrorism phenomenon through a collection of essays freshly written for this volume Bringing varying approaches to the topic from the theoretical to the empirical the Companion includes an array of subjects such as radicalization suicide bombing and rational choice as well as specific case studies The result is a richly textured collection that prompts readers to critically consider the cluster of phenomena that we have come to refer to as terrorism and terrorism s relationship with the similarly problematic set of

phenomena that we call religion      **Religion and Terrorism** Veronica Ward, Richard Sherlock, 2017-03-27 Religion and Terrorism The Use of Violence in Abrahamic Monotheism provides theoretical analysis of the nature of religious terrorism and religious martyrdom and also delves deeply into terrorist groups and beliefs in Judaism Christianity and Islam Religious terrorism is found in all three of the great monotheistic faiths and while the public is most aware of Islamic terrorism Jewish and Christian faiths have extremist groups that warp their teaching in ways unrecognizable to most adherents to support terrorism This work will be of interest to scholars in religious studies political science and sociology      **Religion and Terrorism** Veronica Ward, Richard Sherlock, 2013-12-24 Religion and Terrorism The Use of Violence in Abrahamic Monotheism provides theoretical analysis of the nature of religious terrorism and religious martyrdom and also delves deeply into terrorist groups and beliefs in Judaism Christianity and Islam Religious terrorism is found in all three of the great monotheistic faiths and while the public is most aware of Islamic terrorism Jewish and Christian faiths have extremist groups that warp their teaching in ways unrecognizable to most adherents to support terrorism This work will be of interest to scholars in religious studies political science and sociology      Religious Terrorism Heather S. Gregg, 2020-07-16 How can the world's religions which propagate peace and love promote violence and the killing of innocent civilians through terrorist acts This Element aims to provide insights into this puzzle by beginning with a brief overview of debates on terrorism a discussion on religion and the various resources it provides groups engaging in terrorist acts four arguments for what causes religious terrorism brief examples of religious terrorism across faith traditions and a synopsis of deradicalization programs This discussion shows that when combined with certain political and social circumstances religions provide powerful resources for justifying and motivating terrorist acts against civilians      **Religion and Terrorism**, 2003      Understanding Religious Violence James Dingley, Marcello Mollica, 2018-11-23 This book addresses the problem of religiously based conflict and violence via six case studies It stresses particularly the structural and relational aspects of religion as providing a sense of order and a networked structure that enables people to pursue quite prosaic and earthly concerns The book examines how such concerns link material and spiritual salvation into a holy alliance As such whilst the religions concerned may be different they address the same problems and provide similar explanations for meaning success and failure in life Each author has conducted their own field work in the religiously based conflict regions they discuss and together the collection offers perspectives from a variety of different national backgrounds and disciplines      **Religion and Terrorism** Christopher Catherwood, 2005      **Comparative Philosophy and Religion in Times of Terror** Douglas Allen, 2006-01-01 Comparative philosophy and religion can help us to understand the violence and terror that often dominate our world These new creative studies ranging in scope from ancient Biblical Greek Indian and Chinese formulations to recent religious and philosophical positions broaden and deepen our understanding of terror and present new possibilities for greater nonviolence peace and true security      **Weapon of Peace** Nilay Saiya, 2018-08-23 This book shows that attempts to repress religion

produce the very violent religious extremism that states seek to avoid

**Religion, Culture, and International Conflict** Michael Cromartie, 2005-03-25 As religiously grounded moral arguments have become ever more influential factors in the national debate particularly reinforced by recent presidential elections and the creation of the faith based initiative office in the White House journalists ignorance about theological convictions has often worked to distort the public discourse on important policy issues Pope John Paul II's pronouncements on stem cell research the constitutional controversies regarding faith based initiatives the emerging participation of Muslims in American life issues like these require political journalists in print and broadcast media to cover religious contexts that many admit they are ill equipped to understand Put differently these news events reflect subtle theological nuances and deep faith commitments that shape the activities of religious believers in the public square Inasmuch as a faith tradition is an active or significant participant in the public arena journalists will need to better understand the theological sources and religious convictions that motivate this political activity The current national discourse has brought faith and its relationship to public policy to the forefront of our daily news Since 1999 the Ethics and Public Policy Center through the generosity of the Pew Charitable Trusts has hosted six conferences for national journalists to help raise the level of their reporting by increasing their understanding of religion religious communities and the religious convictions that inform the political activity of devout believers This book contains the presentations and conversations that grew out of those conferences

Religion and Terrorism Aref M. Al-Khattar, 2003-06-30 Although religion-based terrorism was certainly not uncommon before the events of September 11, 2001, there is now a greater call for an explanation of these actions. In this new study, Al-Khattar seeks to define religion-based terrorism as seen by the followers of different religious traditions in order to facilitate understanding of this international problem. He discusses religion-based terrorism from three perspectives: Judaism, Christianity, and Islam, and offers a theoretical analysis from a criminological perspective of the justifications for such acts. Interviews with leaders from the three major religions provide background from their holy books to contextualize the arguments that terrorists use to rationalize their actions. As the first researcher to apply the Techniques of Neutralization Theory, a traditional criminological theory, to explain such religion terrorism, Al-Khattar examines the primary data to understand the motivations beyond the surface explanations offered by the perpetrators and adherents to their causes. Terrorists are considered as traditional criminals despite their claims of nobler callings. Through utilization of this theoretical approach, the study offers practical suggestions on how this criminal behavior might be dealt with by law enforcement, society, and religious institutions themselves.

*Radical, Religious, and Violent* Eli Berman, 2011-09-30 Applying fresh tools from economics to explain puzzling behaviors of religious radicals, Muslim, Christian, and Jewish violent and benign. How do radical religious sects run such deadly terrorist organizations: Hezbollah, Hamas, Lashkar-e-Taiba, and the Taliban? All began as religious groups dedicated to piety and charity. Yet once they turned to violence, they became horribly potent, executing campaigns of terrorism deadlier than those of their secular rivals. In *Radical, Religious, and Violent*, Eli Berman approaches the question using the economics of organizations. He first dispels some myths: radical religious terrorists are not generally motivated by the promise of rewards in the afterlife, including the infamous seventy-two virgins, or even by religious ideas in general. He argues that these terrorists, even suicide terrorists, are best understood as rational altruists seeking to help their own communities. Yet despite the vast pool of potential recruits, young altruists who feel their communities are repressed or endangered, there are less than a dozen highly lethal terrorist organizations in the world capable of sustained and coordinated violence that threatens governments and makes hundreds of millions of civilians hesitate before boarding an airplane. What's special about these organizations, and why are most of their followers religious radicals? Drawing on parallel research on radical religious Jews, Christians, and Muslims, Berman shows that the most lethal terrorist groups have a common characteristic: their leaders have found a way to control defection. Hezbollah, Hamas, and the Taliban, for example, built loyalty and cohesion by means of mutual aid, weeding out free riders, and producing a cadre of members they could rely

on The secret of their deadly effectiveness lies in their resilience and cohesion when incentives to defect are strong These insights suggest that provision of basic social services by competent governments adds a critical nonviolent component to counterterrorism strategies It undermines the violent potential of radical religious organizations without disturbing free religious practice being drawn into theological debates with Jihadists or endangering civilians *Terror in the Mind of God, Fourth Edition* Mark Juergensmeyer, 2017-03-28 Completely revised and updated this new edition of *Terror in the Mind of God* incorporates the events of September 11 2001 into Mark Juergensmeyer's landmark study of religious terrorism Juergensmeyer explores the 1993 World Trade Center explosion Hamas suicide bombings the Tokyo subway nerve gas attack and the killing of abortion clinic doctors in the United States His personal interviews with 1993 World Trade Center bomber Mahmud Abouhalima Christian Right activist Mike Bray Hamas leaders Sheik Yassin and Abdul Aziz Rantisi and Sikh political leader Simranjit Singh Mann among others take us into the mindset of those who perpetrate and support violence in the name of religion Provided by publisher **The Oxford Handbook of Evolutionary Psychology and Religion** James R. Aaron Murchan, 2018 Essay from the year 2017 in the subject Politics International Politics Topic Peace and Conflict Studies Security grade 72 Queen s University Belfast language English abstract Terrorism with a religious underpinning is a term that speaks for itself in that it is political violence committed in the name of a religion for religious purposes by religiously motivated individuals Religiously motivated terrorism is not a new or contemporary concept as examples of religious terrorism can be seen in the Bible in the story of Joshua s return to Canaan and throughout the Christian Crusades of the middle ages Present day religiously motivated terrorism is directly associated with Islam primarily due to the 9 11 attacks in 2001 and the subsequent US invasion of Iraq and Afghanistan as part of the War on Terror Rapoport 2002 claims that the current resurgence of religious terrorism is the fourth wave of rebel terror and is part of a naturally evolving movement of terrorism within states succeeding the earlier waves of anarchism anti colonial and new left terrorism throughout the 20th Century The propagation of religiously motivated terrorism has led many to conclude that the most potent forms of terrorism have a religious underpinning a belief which may be justified by the emergence of ISIS and their brand of extremely potent violence Yet the dominance of secular ideologies in war and terrorism throughout the 20th Century raises questions in regards to whether the view of religiously motivated violence as more potent

is simply just a subjectively held Western belief Bourne 2014 This essay will compare the aims and means by which religiously motivated and secular terrorists act before addressing the violence of contemporary Islamic terrorism and the effect of fearmongering propaganda in amplifying the potency that underpins religious terrorism
