Abstract: The primary aim of this paper is to offer an overview of current research into the relationship between religion and family life and to offer suggestions for future research. In order to do this, the paper distinguishes between research in which religion is a dependent variable, labelled as socialization research, and research in which religion is an independent variable, referred to as research into family functioning. With regard to these areas of research, the paper, first, offers an overview of the most important insights existing research has generated thus far, after which some important shortcomings are identified and suggestions for future research are proposed. Subsequently, the paper offers some reflections on methodology and points out some strengths and weaknesses of existing research and offers methodological advice for future research. The paper closes by discussing how research into the relationship between religion and family life may contribute to an overall understanding of religion as such.

1. Introduction

Why the scientific study of religion has a lot to gain from paying attention to the family is not difficult to explain. The family is the place where the intergenerational transmission of religious beliefs and practices takes place and thus is of crucial importance for the persistence and continuation of religious traditions and communities. Three observations underscore the importance of the family in this respect. First of all, in the Netherlands and other countries in Western-Europe inter-denominational

Daily Life in the Colonial City Keith T. Krawczynski, 2013-02-20 An exploration of day to day urban life in colonial America The American city was an integral part of the colonial experience Although the five largest cities in colonial America Philadelphia New York Boston Charles Town and Newport held less than ten percent of the American population on the eve of the American Revolution they were particularly significant for a people who resided mostly in rural areas and wilderness These cities and other urban hubs contained and preserved the European traditions habits customs and institutions from which their residents had emerged They were also centers of commerce transportation and communication held seats of colonial government and were conduits for the transfer of Old World cultures With a focus on the five largest cities but also including life in smaller urban centers Krawczynski's nuanced treatment will fill a significant gap on the reference shelves and serve as an essential source for students of American history sociology and culture In depth thematic chapters explore many aspects of urban life in colonial America including working conditions for men women children free blacks and slaves as well as strikes and labor issues the class hierarchy and its purpose in urban society childbirth courtship family and death housing styles and urban diet and the threat of disease and the growth of poverty

Religion and Family in a Changing Society Penny Edgell, 2013-12-03 The 1950s religious boom was organized around the male breadwinner lifestyle in the burgeoning postwar suburbs But since the 1950s family life has been fundamentally reconfigured in the United States How do religion and family fit together today This

book examines how religious congregations in America have responded to changes in family structure and how families participate in local religious life Based on a study of congregations and community residents in upstate New York sociologist Penny Edgell argues that while some religious groups may be nostalgic for the Ozzie and Harriet days others are changing knowing that fewer and fewer families fit this traditional pattern In order to keep members with nontraditional family arrangements within the congregation these innovators have sought to emphasize individual freedom and personal spirituality and actively to welcome single adults and those from nontraditional families Edgell shows that mothers and fathers seek involvement in congregations for different reasons Men tend to think of congregations as social support structures and to get involved as a means of participating in the lives of their children Women by contrast are more often motivated by the quest for religious experience and can adapt more readily to pluralist ideas about family structure This Edgell concludes may explain the attraction of men to more conservative congregations and women to nontraditional religious groups

Religion and Family Links Donald Swenson, 2008-01-01 For many the experience of religion and the family are organically connected first exposure to religion often comes through the family and in families that practice a religion it often has a shaping effect on their traditions roles practices or structure The author of this text captures the important relationship between religion and the family with a review of relevant literature on the subject synthesizing it within a theoretical framework The work begins with an introduction to the neofunctionalist theoretical framework of the family This framework is connected to a multidimensional understanding of religion With a focus on systems and a holistic interpretation of religion the author uses a systems approach to construct a synthesis of the salient literature on the link between religion and the family Four systems that are embedded in the Neofunctionalist theoretical framework are presented the chronosystem including time and history the organic system that which is part of our biology the personality system with an accent on the individual in social context the social system everything to do with relationships and social organizations and the cultural system including mythology and ethos The concepts from religion that create a unity include the idea of the sacred religious experience ritual ethos and sacred organizations Another feature of the text is that it is not restricted to the modern era Much of the research is historical in nature that assists the reader in understanding links of the two social phenomena in the light of the past Further whenever appropriate literature will be drawn from folk religion Christianity Judaism and Islam

Family Cycles Allan C. Carlson, 2017-07-05 In this paradigm shifting volume Allan C Carlson identifies and examines four distinct cycles of strength or weakness of American family systems This distinctly American family model includes early and nearly universal marriage high fertility close attention to parental responsibilities complementary gender roles meaningful intergenerational bonds and relative stability Notably such traits distinguish the strong American family system from the weak European model evident since 1700 which involves late marriage a high proportion of the adult population never married significantly lower fertility and more divorces The author shows that these

cycles of strength and weakness have occurred until recently in remarkably consistent fifty year swings in the United States since colonial times The book s chapters are organized around these 50 year time frames There have been four family cycles of strength and decline since 1630 each one lasting about one hundred years The author argues that fluctuations within this cyclical model derive from intellectual economic cultural and religious influences which he explores in detail and supports with considerable evidence **The SAGE Handbook of the Sociology of Religion** James A Beckford,Jay

Bradford Wilcox, 2004-05 In the wake of dramatic recent changes in American family life evangelical and mainline Protestant churches took markedly different positions on family change This work explains why these two traditions responded so differently to family change and then goes on to explore how the stances of evangelical and mainline Protestant churches toward marriage and parenting influenced the husbands and fathers that fill their pews According to W Bradford Wilcox the divergent family ideologies of evangelical and mainline churches do not translate into large differences in family behavior between evangelical and mainline Protestant men who are married with children Mainline Protestant men he contends are new men who take a more egalitarian approach to the division of household labor than their conservative peers and a more involved approach to parenting than men with no religious affiliation Evangelical Protestant men meanwhile are soft patriarchs not as authoritarian as some would expect and given to being more emotional and dedicated to their wives and children than both their mainline and secular counterparts Thus Wilcox argues that religion domesticates men in ways that make them more responsive to the aspirations and needs of their immediate families *The Wiley Blackwell Encyclopedia of Family Studies, 4 Volume Set* Constance L.
