Fractured Modernity Thomas Welskopp, Alan Lessoff, 2016-07-11 The ten essays in this volume deal with the debates and conflicts about modernity in a period of American history when the tensions and strains caused by seemingly unrestrained change and the reactions to it were particularly severe and tangible Partly concentrating on the margins or dark underworlds of modernity such as racism and violence partly focusing on the allegedly unlimited space to negotiate and create social order from scratch the contributions to this volume show that and discuss why modernity was an issue in contemporary United States which seemed to have been even more hotly contested than in Europe at the same time albeit sometimes in terms of Americanism rather than modernism In this book European scholars of the United States apply variations on the transnational discourse on modernity to unexpected dimensions of U S history making this volume a fascinating example of the present day enterprise of internationalizing American studies

Secularization and Religious Innovation in the North Atlantic World David Hempton, Hugh McLeod, 2017-05-12 In the early twenty first century it had become a cliché that there was a God Gap between a more religious United States and a more secular Europe The apparent religious differences between the United States and western Europe continue to be a focus of intense and sometimes bitter debate between three of the main schools in the sociology of religion According to the influential Secularization Thesis secularization has been an integral part of the processes of modernisation in the Western world since around 1800 For proponents of this thesis the United States appears as an anomaly and they accordingly give considerable attention to explaining why it is different For other sociologists however the apparently high level of religiosity in the USA provides a major argument in their attempts to refute the Thesis Secularization and Religious Innovation in the Atlantic

World provides a systematic comparison between the religious histories of the United States and western European countries from the eighteenth to the late twentieth century noting parallels as well as divergences examining their causes and especially highlighting change over time This is achieved by a series of themes which seem especially relevant to this agenda and in each case the theme is considered by two scholars The volume examines whether American Christians have been more innovative and if so how far this explains the apparent God Gap It goes beyond the simple American European binary to ask what is American or European in the Christianity of the nineteenth and twentieth centuries and in what ways national or regional differences outweigh these commonalities
