Religion And Social Transformations Religion Today V 2:

Religion and Change in Australia Adam Possamai, David Tittensor, 2022-03-30 This timely book offers a panoramic overview of the enduring significance of religion in modern Australian society Applying sociological perspectives and contemporary theories of religion in society it challenges conventional assumptions around the extent of secularisation in Australia and instead argues that religious institutions groups and individuals have proved remarkably adaptable to social change and continue to play a major role in Australian life In doing so it explores how religion intersects with a wide range of other contemporary issues including politics race migration gender and new media Religion and Change in Australia explores Australia's unique history regarding religion Christianity was originally imported as a tool of social control to keep convicts settlers and Australian Aboriginal peoples in check This had a profound impact on the social memory of the nation and lingering resentment towards the excessive presence of religion continues to be felt today Freedom of religion was enshrined in Section 116 of the Australian Constitution in 1901 Nevertheless the White Australia Policy effectively prevented adherents of non Christian faiths from migrating to Australia and the nation remained overwhelmingly Christian However after WWII Australia in common with other western societies appears to have become increasingly secularised as religious observance declined dramatically However Religion and Change in Australia employs a range of social theories to challenge this secularist view and argues that Australia is a post secular society The 2016 census revealed that over half of the population still identify as Christian In politics the socially conservative religious right has come to exert considerable influence on the ruling Liberal National Coalition particularly under John Howard and Scott Morrison New technologies such as the Internet and social media have provided new avenues for religious expression and proselytisation whilst so called megachurches have been built to cater to their increasing congregations The adoption of multiculturalism and increased immigration from Asia has led to a religiously pluralist society though this has often been controversial In particular the position of Islam in Australia has been the subject of fierce debate and Islamophobic attitudes remain common Atheism non belief and alternative spiritualities have also become increasingly widespread especially amongst the young Religion and Change in Australia analyses these developments to offer new perspectives on religion and its continued relevance within Australian society This book is therefore a vital resource for students academics and general readers seeking to understand contemporary debates surrounding religion and secularisation in Australia

The Centrality of Religion in Social Life Eileen Barker, 2021-11-18 James A Beckford's work is internationally acclaimed not only in the sociology of religion but also in other fields of the social sciences Beckford has long been arguing that the barriers that have grown up between the different sub disciplines should be broken down with those specialising in religion becoming more cognisant of new theoretical developments and sociologists in general becoming more aware of the significance of developments in the religious scene This book is a collection of essays written in Beckford's honour drawing on a number of religious themes that

have been central to Beckford's interests whilst also offering a significant contribution to our understanding of the wider society. A central theme is modernity and its relation to the post modern and how religion affects and is affected by the dynamics of contemporary society with the primary focus of many of the chapters being a concern with how society copes with the minority religions that have become visible with the globalising tendencies of contemporary society. The contributors who come from America, Asia and various parts of Europe are all internationally renowned scholars. Beckford's most important publications are listed in an Appendix and the volume opens with a short account of his contribution to sociology by Eileen Barker the editor and James T Richardson.

Religion, Social Change, and Fertility Behaviour R. Jayasree, 1989. This book based on a study carried out in the Travancore region of Kerala attempts to explain the differential influences of many demographic, developmental and cultural variables that influence social change among different religious groups and also ultimately the fertility behaviour.

Orthodox Christianity, New Age Spirituality and Vernacular Religion Eugenia Roussou, 2021-04-08. This anthropological work thoroughly illustrates the novel synthesis of Christian religion and New Age spirituality in Greece. It challenges the single faith approach that traditionally ties southern European countries to Christianity and focuses on how processes of globalization influence and transform vernacular religiosity. Based on long term anthropological fieldwork in Greece, this book demonstrates how the popular belief in the evil eye produces a creative affinity between religion and spirituality in everyday practice. The author analyses a variety of significant research themes including lived and vernacular religion, alternative spirituality and healing, ritual performance and religious material culture. The book offers an innovative social scientific interpretation of contemporary religiosity while engaging with a multiplicity of theoretical, analytic and empirical directions. It contributes to current key debates in social sciences with regard to globalization and secularization, religious pluralism, contemporary spirituality and the New Age movement, gender, power and the body, health, illness and alternative therapeutic systems, senses, perception and the supernatural, the spiritual marketplace, creativity and the individualization of religion in a multicultural world.

Remittances as Social Practices and Agents of Change Silke Meyer, Claudius Ströhle, 2023-08-31. This open access book explores the transformative effects of remittances. Remittances are conceptualized as flows of money, objects, ideas, traditions and symbolic capital, mapping out a cross border space in which people live, work and communicate with multiple belongings. By doing so, they effect social change both in places of origin and destination. However, their power to improve individual living conditions and community infrastructure mainly results from global inequality. Hence, we challenge the remittance mantra and go beyond the migration development nexus by revealing dependencies and frictions in remittance relations. Remittances are thus scrutinized in their effects on both social cohesion and social rupture. By highlighting the transformative effects of remittance in the context of conflict, climate change and the postcolonial, we shed light on the future of transnational society. Presenting empirical case studies from Ghana, Burkina Faso, Sri Lanka, New Zealand, Turkey, Lebanon.
