Oriental Religions and Christianity A Course of Lectures Delivered on the Ely

Foundation Before the Students of Union Theological Seminary, New York, 1891 Frank F. Ellinwood, 1896-01-01 It is said that the very latest among the sciences is the Science of Religion Without pausing to inquire how far it admits of scientific treatment certain reasons which may be urged for the study of the existing religions of the world will be considered in this lecture It must be admitted in the outset that those who have been the pioneers in this field of research have not as a rule been advocates of the Christian faith The anti Christian theory that all religions may be traced to common causes that common wants and aspirations of mankind have led to the development of various systems according to environment has until recently been the chief spur to this class of studies Accordingly the religions of the world have been submitted to some preconceived philosophy of language or ethnology or evolution with the emphasis placed upon such facts as seemed to comport with this theory Meanwhile there has been an air of broad minded charity in the manner in which the apologists of Oriental systems have treated the subject They have included Christ in the same category with Plato and Confucius and have generally placed Him at the head and this supposed breadth of sentiment has given them a degree of influence with dubious and wavering Christians as well as with multitudes who are without faith of any kind In this country the study of comparative religion has been almost entirely in the hands of non evangelical writers We have had The Ten Great Religions from the pen of Rev James Freeman Clarke The Oriental Religions written with great labor by the late Samuel Johnson and Mr Moncure D Conway s Anthology with its flowers gathered from the sacred books of all systems and so chosen as to carry the implication that they all are equally inspired Many other works designed to show that Christianity was developed from ancient sun myths or was only a plagiarism upon the old mythologies of India have been current among us But strangely enough the Christian Church has seemed to regard this subject as scarcely worthy of serious consideration With the exception of a very able work on Buddhism and several review articles on Hinduism written by Professor S H Kellogg very little has been published from the Christian standpoint The term heathenism has been used as an expression of contempt and has been applied with too little discrimination Edward Said and the Religious Effects of Culture William D. Hart, William David Hart, 2000-04-13

This book provides a distinctive account of Edward Said s critique of modern culture by highlighting the religion secularism distinction on which it is predicated It refers to religious and secular traditions and to tropes that extend the meaning and reference of religion and secularism in indeterminate ways It covers Said s heterogeneous corpus from Joseph Conrad and the Fiction of Autobiography his first book to Orientalism his most influential book to his recent writings on the Palestinian question The religion secularism distinction lies behind Said s cultural criticism and his notion of intellectual responsibility

American Transcendentalism and Asian Religions Arthur Versluis, 1993-09-16 The first major study since the 1930s of the relationship between American Transcendentalism and Asian religions and the first comprehensive work to include post Civil War Transcendentalists like Samuel Johnson this book is encyclopedic in scope Beginning with the inception of Transcendentalist Orientalism in Europe Versluis covers the entire history of American Transcendentalism into the twentieth century and the profound influence of Orientalism on the movement including its analogues and influences in world religious dialogue He examines what he calls positive Orientalism which recognizes the value and perennial truths in Asian religions and cultures not only in the writings of major figures like Thoreau and Emerson but also in contemporary popular magazines Versluis's exploration of the impact of Transcendentalism on the twentieth century study of comparative religions has ramifications for the study of religious history comparative religion literature politics history and art history
