Religious Belief:

The Origin and Development of Religious Belief Sabine Baring-Gould, 1878 Religious Belief James Kellenberger, 2021-09-23 This book addresses the different forms that religious belief can take Two primary forms are discussed propositional or doctrinal belief and belief in God Religious belief in God whose affective content is trust in God it is seen opens for believers a relationship to God defined by trust in God The book addresses the issue of the relation between belief and faith the issue of what S ren Kierkegaard called the subjectivity of faith and the issue of the relation between religious belief and religious experience After the introductory chapter the book continues with a chapter in which features and forms of belief allowed by the general concept of belief are presented Several of these forms and features are related to the features of religious belief examined in succeeding chapters The book s final chapter examines God relationships in the Christian tradition that de emphasize belief and are not defined by belief Challenges to Moral and Religious Belief Michael Bergmann, Patrick Kain, 2014-05-22 Challenges to Moral and Religious Belief contains fourteen original essays by philosophers theologians and social scientists on challenges to moral and religious belief from disagreement and evolution Three main questions are addressed Can one reasonably maintain one s moral and religious beliefs in the face of interpersonal disagreement with intellectual peers Does disagreement about morality between a religious belief source such as a sacred text and a non religious belief source such as a society s moral intuitions make it irrational to continue trusting one or both of those belief sources Should evolutionary accounts of the origins of our moral beliefs and our religious beliefs undermine our confidence in their veracity This volume places challenges to moral belief side by side with challenges to religious belief sets evolution based challenges alongside disagreement based challenges and includes philosophical perspectives together with theological and social science perspectives with the aim of cultivating insights and lines of inquiry that are easily missed within a single discipline or when these topics are treated in isolation The result is a collection of essays representing both skeptical and non skeptical positions about morality and religion that move these discussions forward in new and illuminating directions Death Anxiety and Religious Belief Jonathan Jong, Jamin Halberstadt, 2016-08-25 There are no atheists in foxholes or so we hear The thought that the fear of death motivates religious belief has been around since the earliest speculations about the origins of religion There are hints of this idea in the ancient world but the theory achieves prominence in the works of Enlightenment critics and Victorian theorists of religion and has been further developed by contemporary cognitive scientists Why do people believe in gods Because they fear death Yet despite the abiding appeal of this simple hypothesis there has not been a systematic attempt to evaluate its central claims and the assumptions underlying them Do human beings fear death If so who fears death more religious or nonreligious people Do reminders of our mortality really motivate religious belief Do religious beliefs actually provide comfort against the inevitability of death In *Death Anxiety and Religious Belief* Jonathan Jong and Jamin Halberstadt begin to answer these

questions drawing on the extensive literature on the psychology of death anxiety and religious belief from childhood to the point of death as well as their own experimental research on conscious and unconscious fear and faith In the course of their investigations they consider the history of ideas about religion s origins challenges of psychological measurement and the very nature of emotion and belief

Philosophy and the Grammar of Religious Belief Mario von der Ruhr,Timothy Tessin,2016-07-27 The papers in this collection are concerned with the epistemology of religious belief The contributors disagree on such issues as whether philosophers have a role to play in determining the reasonableness or intelligibility of religious beliefs or whether philosophy properly understood is a descriptive task But all the papers are informed by the belief that philosophical discussion should proceed by giving attention to the character of the religious beliefs and practices under consideration

Religious Belief and the Will Louis P. Pojman,2024-10-31 Can we ever achieve belief by a direct act of will If it will help us to be happier should we make ourselves believe propositions which the evidence alone does not warrant These are the sort of questions which Professor Pojman examines in *Religious Belief and the Will* originally published in 1986 He deals with a constellation of problems related to believing and willing to believe his main concern is with religious faith and belief though his analysis is also of interest to epistemology and ethics Pojman asks what is so important about believing propositions in the first place and why religious creeds have made propositional belief a necessary condition for salvation He considers whether one can be rational and still use the will to believe what the evidence alone does not warrant He also discusses whether faith and belief are generically related or distinct attitudes This is the first full length treatise on religious belief that approaches the subject from the viewpoint of volitional activity i e related to the will It presents a rethinking of the way the will interacts with belief a relationship often misconstrued in works of philosophy and theology Pojman believes that the will is central to religious commitment and that by understanding the relationship between the attitude of belief and the activity of willing we are enabled to get fresh insight into the classical problem of religious belief and the will

Political and Judicial Rights through the Prism of Religious Belief Carl Sterkens,Hans-Georg Ziebertz,2018-10-24 This innovative volume is focused on the relationship between religion on the one hand and political and judicial rights on the other At a time when the so called checks and balances that guarantee the vulnerable equilibrium between legislative executive and judicial branches of governance are increasingly under pressure this book offers valuable insights It presents empirical work that has measured young people s attitudes and explains the variety found across their views Readers will find answers to the question To what extent do youths in different countries support political and judicial human rights and what influences their attitudes towards these rights The political rights in this question include among others active and passive voting right the right to protest and the rights of refugees Judicial rights refer in general to the right of a fair trial and include principles like equality before the law the right to independent and impartial judgement the presumption of innocence the right to legal counsel and the privilege against self incrimination Expert contributing authors look at aspects

such as religious beliefs and practices personal evaluation of state authorities and personality characteristics The authors discuss contextual determinants for attitudes towards political and judicial rights in both theory and empirical indicators Numerous helpful tables and figures support the written word This book makes an original contribution to research through the empirical clarification of factors that induce or reduce people's support of political and judicial rights It will appeal to graduates and researchers in religious studies philosophy or sociology of religion among other disciplines but it will also interest the general reader who is concerned with matters of human rights and social justice An Analysis of Religious

Religious Belief Kelly James Clark,Raymond J. VanArragon,2011-07-28 A fundamental question in philosophy of religion is whether religious belief must be based on evidence in order to be properly held In recent years two prominent positions on this issue have been staked out evidentialism which claims that proper religious belief requires evidence and Reformed epistemology which claims that it does not Evidence and Religious Belief contains eleven chapters by prominent philosophers which push the discussion in new directions The volume has three parts The first part explores the demand for evidence some chapters object to it while others seek to restate it or find space for compromise between Reformed epistemology and evidentialism The second part explores ways in which beliefs are related to evidence that is ways in which the evidence for or against religious belief that is available to a person can depend on that person's background beliefs and other circumstances The third part contains chapters that discuss actual evidence for and against religious belief Evidence for belief in God includes the so called common consent of the human race and the way that such belief makes sense of the moral life evidence against it includes profound puzzles about divine freedom which suggest that it is impossible for a being to be morally perfect
