FaithQuestions - What About Religion and Science? Paul E. Stroble, 2010-09-01 This book invites us to consider ways to remain confident in our faith as we understand and appreciate the discoveries and advances of science How can Christians integrate believe or accept all the teachings of science the Bible and Christian tradition How can we believe in both the discoveries of science and the Bible Are science and religion compatible or incompatible Does the Christian understanding that God created the universe exclude the findings and discoveries of science What is the role of faith in the world of education What can we believe about intelligent design If we believe in evolution can we believe in God Does the Big Bang theory exclude God If we are Christians can we support stem cell research and cloning Can science help us understand the afterlife Does science negate or support prayer What is the difference between faith and reason Do they exclude or complement one another As Paul Stroble addresses these questions and others he helps us examine different possible ways that religion and science relate to each other and ways that science and religion provide meaning and value in our lives PAUL STROBLE is an elder of the Illinois Great Rivers Conference of The United Methodist Church He has served both as parish pastor and college instructor and currently teaches at the University of Akron where he earned an Excellence in Teaching award He is a long time writer researcher for the United Methodist curriculum FaithLink and author of numerous articles and curricular materials Among his eleven books are *Paul and the Galatians* and *What Do Other Faiths Believe* He is married to Dr Beth Stroble and they have a daughter Emily The FaithQuestions study series is designed to meet the needs of people who have questions about the Christian faith and who desire a deeper engagement with scripture and with discipleship as they explore studies of issues in theology ethics missions Bible interpretation and church history It seeks to equip a new generation of church leaders to appreciate the eternal message of the gospel and to develop the skills to articulate its relevance in our contemporary context The series would be a good choice for users who have completed Disciple this will be the ninth study in the series following *What About the Rapture* *What Do Other Faiths Believe* *What Happens When We Die* *What About Divine Healing* *What About the Trinity* *What About Forgiveness* *What About the Devil* *What About Reading the Bible*

The Language of Science and Faith Karl W. Giberson And Francis S. Collins, 2011-03 Christians affirm that everything exists because of God from subatomic quarks to black holes Science often claims to explain nature without including God at all And thinking Christians often feel forced to choose between the two But the good news is that we don't have to make a choice Science does not overthrow the Bible Faith does not require rejecting science World renowned scientist Francis Collins author of *The Language of God* along with fellow scientist Karl Giberson show how we can embrace both Their fascinating treatment explains how God cares for and interacts with his creation while science offers a

reliable way to understand the world he made Together they clearly answer dozens of the most common questions people ask about Darwin evolution the age of the earth the Bible the existence of God and our finely tuned universe They also consider how their views stack up against the new atheists as well as against creationists and adherents of intelligent design The authors disentangle the false conclusions of Christians and atheists alike about science and evolution from the actual results of research in astronomy physics geology and genetics In its place they find a story of the grandeur and beauty of a world made by a supremely creative God

The Transition, Initiated by Copernicus and Galileo, from Religion to Science
Lawrence Wood,2017-07-06 Have you ever wondered Why two diametrically opposite explanations of ourselves Religion and Science coexist As this book explains the reason is one explanation began before the other The first explanations development began thousands of years ago when our gradually evolving brains and minds awoke to an unknown possibly threatening environment Unfortunately attempts to explain this strange environment were frustrated by illusions such as the apparent motion of the sun moon and stars around the earth which clouded our limited observational capability such as our inability detect constant motion thwarting the developing human minds ability to correctly explain observations These limitations ultimately led to a totally incorrect explanation we reside in a very small young unchanging universe revolving about us created by a supernatural being God a belief system termed Religion About 500 years ago the formulation of the second explanation was initiated when astute investigators such as Copernicus and Galileo using improved new observation instruments such as the telescope and microscope began to realize the existing illusion based religious explanations could not possibly be correct Author Lawrence Wood introduces the brilliant investigators who resolved the illusions by developing radically new explanations of the illusions an explanation system termed Science many still cannot accept hence the coexistence of religion and science If you are one of those trying to bridge the gulf between your religious beliefs which have become increasingly difficult to accept and the strange new world of science this book will help you immeasurably
