Inhaltsangabe Introduction This thesis tries to examine the structures activities changes and spatial impacts of economic development in Scotland Looking at the Scottish economy it has to be considered that Scotland is both an integrated part of the UK and the UK economy and a peripheral region within the UK Therefore Scotland does not have an economy of its own but the distinctiveness of the region in terms of location history and recent political developments justifies a closer examination of the matter Scotland is in many aspects a very heterogeneous region This is in particular true for the economic structure and a focus on one region cannot be representative Edinburgh is an exceptionally prosperous region not only in Scottish terms However this prosperity and activity in economic development makes Edinburgh an interesting subject for examination Thus the focus of this thesis lies on the developments in Edinburgh Economic development is certainly influenced by a vast number of factors and it is impossible to take all of them into account Within this thesis the emphasis lies on governmental influence on the developments However European development measures are not considered Accordingly the thesis aims to look at the ways the promotion of economic development is carried out in Scotland and tries to assess the measures on the background of the distinctiveness of Scotland and Edinburgh Thus in the first chapter the thesis takes a look at Scotland as a whole examining the physical environment the administrative framework and its recent changes Furthermore it looks at the economic legacy of the heavy industries and the recent developments in the Scottish economy Subsequently the history and institutions of the promotion of economic development in Britain and Scotland are presented The last part of the first chapter deals with the planning framework in Scotland The second chapter portrays Edinburgh's economic structure The key industries are presented briefly as are the institutions of economic development Afterwards parts of the Edinburgh development plan are examined The third chapter focuses on the Waterfront project in Edinburgh The background of waterfront revitalisation is presented The project and its participants are then examined in some detail Finally a conclusion is drawn on the developments in Edinburgh

Partnership, Collaborative Planning and Urban Regeneration John McCarthy, 2016-05-13 Approaches to urban regeneration have changed dramatically throughout Europe and the USA over recent decades drawing on notions of public private partnership growth coalitions and local spatial alliances In this engaging book John McCarthy provides critical consideration of such theories in terms of their application to practice He shows how these notions are used to explain the nature and underlying processes of urban development and to further objectives for urban regeneration To test their applicability he examines the case of Dundee including the role of the Dundee Partnership a model for many aspects of partnership working The resulting conclusions suggest ways in which the practice of urban regeneration can be improved in terms of inclusion equity and sustainability

Regenerating the Cities Michael

Parkinson, Bernard J., Foley, Dennis R., Judd, 1988 Urban Regeneration in Europe Chris Couch, Charles Fraser, Susan Percy, 2008-04-15 This book provides a comparative account of the process of urban regeneration and examines the factors influencing these processes as well as the consequences of their implementation Through a mixture of theoretical discussion and a series of case studies a thorough examination is made of the extent to which these different European old industrial conurbations are facing similar problems *Remaking Planning* Tim Brindley, Yvonne Rydin, Gerry Stoker, 2005-08-04 Remaking Planning challenges the common misconception that planning under the Conservative government has been dismantled and abandoned to market forces This new edition of a very well received text brings the original study up to date with an analysis of how planning in the 1990s has responded to continuing economic restructuring political fragmentation and social change and developed a new awareness of uncertainty and risk The book illustrates how planning remains as a never ending attempt to reconcile the demands of economic efficiency with those of democratic legitimacy *Regional Behaviour* Dimitrios C. Christopoulos, 2018-02-06 This title was first published in 2001 In the framework of the EU a number of policies have been devised for regions in order to facilitate their balanced economic development The author argues that the focus on regional planners and their actions in academic literature has obscured the importance of regional elites in this process The author compares Western Scotland and the west of Crete focusing on the wider regional political and business elites within these regions and attempting a comparison of elite attitudes within regions and between regions

Government of Scotland Michael Keating, 2010-03-17 Keating provides case studies and analysis of policy making in urban He also explores financial planning decision making and Scotland's role in UK and European policy networks The book is based on extensive research including interviews with leaders of interest groups politicians and officials across the Scottish Executive and in the Scottish Parliament an analysis of spending patterns an examination of the legislative output and case studies of policy making *Gouvernance locale, pauvreté et exclusion dans les villes anglo-saxonnes* Jacques Carré, Sophie Body-Gendrot, 1997 **Industrial Subsidies** C. Wren, 1996-09-25 This book describes the adoption growth and subsequent relinquishment of industrial subsidies in the UK tracing their development back to the early years of this century and following their extension through to virtually every area of economic policy This includes the foothold gained for industrial subsidies in the run up and aftermath of the First World War the application of large scale subsidies to agriculture in the Depression the plans for an interventionist industrial strategy devised in the Second World War and the gradual expansion of industrial subsidies from this time through to their heyday in the late 1970s Considerable attention is devoted to events in the 1980s including the extension of financial assistance to urban and rural policy small and new firm measures technology support collaborative research programmes and advisory schemes Nations against the State M. Keating, 1996-02-07 This is a comparative study of nationalism and nation building in Quebec Catalonia and Scotland All are historic nations within larger states Nationalism is presented as a mechanism for dealing with the place of the territorial

society in the new order It is no longer concerned with the creation of a traditional nation state but with maximizing autonomy in a world where the nation state has lost its old powers and status Routledge Library Editions: Economic Geography Various,2021-06-23 The books in this set originally published between 1968 and 1992 introduce the reader to the many lines of thought in the literature on economic geography and tie these various aspects together within the concept of the economy As well as providing a comprehensive overview of the Western European economy since the Second World War and including specific studies and assessments of the Dutch and Italian economies these volumes examine the economic factors that have shaped cities and patterns of urbanization *Regions in Recession and Resurgence* Michael Chisholm,2015-03-27 The world economy has undergone rapid evolution in recent decades along with changes in the importance of industries and their organization and sharp changes in the fortunes of regions There are differences of opinion regarding the mainsprings of change and development and the role of governments in fostering national output In order to show the relevance of these changes to regional economies the book focuses on the different schools of economic thought from the neo classical through Keynesian to Marxist radical ideas and monetarist supply side thinking providing a brief description of their structure in non spatial terms The way these theories map into contrasting ideas regarding the mechanisms of regional economic growth is then explained The book concentrates on developed economies and explicitly seeks to confront theory with fact fact with theory Bringing together non spatial economic theory regional growth theory and relevant empirical data this book is intended for students in geography and regional economics but will also be of interest for those studying politics and government **Privatism and Urban Policy in Britain and the United States** Timothy Kiel Barnekov,Robin Boyle,Daniel Rich,1989 Demonstrating how cities in the United Kingdom appear to be following the American patterns of urban policy even as far as the language used this book compares urban policy and programs in both countries The authors show that the parallels between these two approaches rest on the market oriented small government political foundations of both countries but that these political similarities obscure significant differences which will make transatlantic urban policy and program transfer more difficult *Governing Scotland* John McCarthy,David A. Newlands,1999 The creation of the Scottish Parliament will have important implications for regional and industrial policy This book of edited papers discusses the potential economic impact of the parliament *Politics and Public Policy in Scotland* Arthur F. Midwinter,Michael Keating,James Mitchell,1991 *Remaking the Rust Belt* Tracy Neumann,2016-05-26 Cities in the North Atlantic coal and steel belt embodied industrial power in the early twentieth century but by the 1970s their economic and political might had been significantly diminished by newly industrializing regions in the Global South This was not simply a North American phenomenon the precipitous decline of mature steel centers like Pittsburgh Pennsylvania and Hamilton Ontario was a bellwether for similar cities around the world Contemporary narratives of the decline of basic industry on both sides of the Atlantic make the postindustrial transformation of old manufacturing centers seem inevitable

the product of natural business cycles and neutral market forces In Remaking the Rust Belt Tracy Neumann tells a different story one in which local political and business elites drawing on a limited set of internationally circulating redevelopment models pursued postindustrial urban visions They hired the same consulting firms shared ideas about urban revitalization on study tours at conferences and in the pages of professional journals and began to plan cities oriented around services rather than manufacturing all well in advance of the economic malaise of the 1970s While postindustrialism remade cities it came with high costs In following this strategy public officials sacrificed the well being of large portions of their populations Remaking the Rust Belt recounts how local leaders throughout the Rust Belt created the jobs services leisure activities and cultural institutions that they believed would attract younger educated middle class professionals In the process they abandoned social democratic goals and widened and deepened economic inequality among urban residents *The City that Refused to Die* Michael Keating, 1988 *Challenges to Local Government* Desmond S King, Jon Pierre, 1990 This volume provides a timely discussion of how local governments have undertaken public policies during the last decade Concentrating on Britain and the United States with chapters also on the Scandinavian countries and France the contributors document explain and analyze the implications of these policies for local autonomy and local government focusing especially upon local economic initiatives Both the empirical and theoretical implications of these local government policies are discussed drawing on recent research on local autonomy regulationist theory and flexible specialization In each case the challenge posed to the resources and capacities of local governments in advanced industrial democracies is emphasized The topics discussed include such policies as privatization industrial policy economic initiatives public private partnerships municipal liberalization business urban initiatives and local radical politics *Challenges to Local Government* will be of interest to scholars and students in political science urban studies sociology and geography An impressive and stimulating range of international material likely to influence thinking and teaching on local government for several years to come *Local Government Studies* Particularly welcome is the comparative focus of several of the chapters and the attempt to apply the American political economy approach to British local government That the collection raises more questions than answers is not a fatal defect in a newly developing field It is a useful if somewhat tentative contribution to the study of comparative urban politics *British Politics Group Newsletter* This book is the product of an ECPR Work Group would that all such groups produced outputs of this quality *Political Studies* of interest to teachers and students of local administration as well as to political scientists and economists *International Review of Administrative Sciences* This is a well structured informative and interesting book *Environment and Planning C Government and Policy* **Bibliography of Scotland** , 1990
