## **Remapping East Asia:**

Remapping East Asia T. J. Pempel, 2005 An overarching ambiguity characterizes East Asia today The region has at least a century long history of internal divisiveness war and conflict and it remains the site of several nettlesome territorial disputes However a mixture of complex and often competing agents and processes has been knitting together various segments of East Asia In Remapping East Asia T J Pempel suggests that the region is ripe for cooperation rather than rivalry and that recent region building developments in East Asia have had a substantial cumulative effect on the broader canvas of international politics This collection is about the people processes and institutions behind that region building In it experts on the area take a broad approach to the dynamics and implications of regionalism Instead of limiting their focus to security matters they extend their discussions to topics as diverse as the mercurial nature of Japan s leadership role in the region Southeast Asian business networks the war on terrorism in Asia and the political economy of environmental regionalism Throughout they show how nation states corporations and problem specific coalitions have furthered regional cohesion not only by establishing formal institutions but also by operating informally semiformally or even secretly The Contested Rescaling of Economic Governance in East Asia Shahar Hameiri, Jeffrey Wilson, 2017-10-02 One of the apparent contradictions which has puzzled observers of East Asian politics is why despite the region s considerable economic integration economic governance institutions remain largely underdeveloped This book stems from the observation that the study of actual forms of economic governance in Asia has been impeded by the dominance of a regionalism problematique Scholars have focused on the emergence or not of regional multilateral institutions seeking to evaluate these institutions capacities to enforce disciplines on Asian states However they have also neglected prior and more pertinent questions regarding the causal determinants of regional economic governance which animate the contributions to this collection What factors shape the scale and instruments of economic governance in Asia and how and why is economic governance being rescaled between the sub national national and regional levels In the chapters of this book the contributors explore the social and political struggles over the scale and instruments of economic governance They identify and explain the emergence of a wide variety of regional modes of economic governance explain the factors shaping the spatial scale of economic governance in Asia and discern the patterns of regional integration to which they give rise This book was originally published as a special issue of the Australian Journal of International Affairs Asia's New Regionalism Ellen L. Frost, 2008 **The Oxford Handbook of Comparative Regionalism** Tanja A. Börzel, Thomas Risse, 2016-02-04 The Oxford Handbook of Comparative Regionalism the first of its kind offers a systematic and wide ranging survey of the scholarship on regionalism regionalization and regional governance Unpacking the major debates leading authors of the field synthesize the state of the art provide a guide to the comparative study of regionalism and identify future avenues of research Twenty seven chapters review the theoretical and empirical scholarship with regard to the emergence of regionalism the institutional design of regional

organizations and issue specific governance as well as the effects of regionalism and its relationship with processes of regionalization. The authors explore theories of cooperation, integration and diffusion explaining the rise and the different forms of regionalism. The handbook also discusses the state of the art on the world regions: North America, Latin America, Europe, Eurasia, Asia, North Africa and the Middle East and Sub-Saharan Africa. Various chapters survey the literature on regional governance in major issue areas such as security and peace, trade and finance, environment, migration, social and gender policies as well as democracy and human rights. Finally, the handbook engages in cross regional comparisons with regard to institutional design, dispute settlement, identities and communities, legitimacy and democracy as well as inter and transregionalism.

**Institutions of the Asia-Pacific** Mark Beeson, 2008-08-18. The Asia Pacific is arguably the most important but also the most complex and contested region on the planet. Containing three of the world's largest economies and some of its most important strategic relationships, the region's capacity of regional elites to promote continuing economic development whilst simultaneously maintaining peace and stability will be one of the defining challenges of the twenty first century international order. Intuitively we might expect regional institutions to play a major role in achieving this. Yet one of the most widely noted characteristics of the Asia Pacific region has been its relatively modest levels of institutional development thus far. However things are changing as individual economies in the Asia Pacific become more deeply integrated, there is a growing interest in developing and adding to the institutions that already exist. *Institutions of the Asia Pacific* examines how this region is developing and what role established organisations like APEC and new bodies like ASEAN Plus Three are playing in this process. An expert in the field, Mark Beeson introduces the contested nature of the very region itself: should it be the Asia Pacific or East Asia to which we pay most attention and expect to see most institutional development? By placing these developments in historical context, he reveals why the very definition of the region remains unsettled and why the political, economic and strategic relations of this remarkably diverse region remain fraught and difficult to manage.

**East Asian Regionalism from a Legal Perspective** Tamio Nakamura, 2009-06-08. Plenty has been written about the political and economical aspects of regionalism but the legal perspective has been neglected. *East Asian Regionalism From a Legal Perspective* is unique in synthesizing legal, economic and political analyses. In the first part, the book investigates the current features of regionalism from a comparative perspective, looking at economic and currency cooperation and comparing Asian regionalism with Europe and Latin America. In the second part, the contributors go on to look at the present legal features of regionalism, covering institutional frameworks, trade, diversity and regional integration. The third part of the book is truly unique in proposing an essential groundwork for the institutionalisation of an East Asian Community. It conceives a draft East Asian Charter, an essential document that distils what East Asian nations have achieved and also includes integral principles and fundamental rules for future cooperation among countries and peoples in the region. This book will be of interest to graduates and academics interested in regionalism, international relations, international law.

and Asian studies      **Asia's New Institutional Architecture** Vinod K. Aggarwal, Min Gyo Koo, 2008-02-04 Can regional and interregional mechanisms better institutionalize the creasing complexity of economic and security ties among states in Nor east Southeast and South Asia As the international state system und goes dramatic changes in both security and trade relations in the wake of the Cold War s end the Asian financial crisis and the attacks of Sept ber 11 2001 this question is now of critical importance to both academics and policymakers Still little research has been done to integrate the ana sis of both regional security and economic dynamics within a broader c text that will give us theoretically informed policy insights Indeed when we began our background research on the origin and e lution of Asia s institutional architecture in trade and security we found that many scholars had focused on individual subregions whether Nor east Southeast or South Asia In some cases scholars examined links tween Northeast and Southeast Asia and the literature often refers to these two subregions collectively as Asia artificially bracketing South Asia Of course we are aware that as products of culture economics history and politics the boundaries of geographic regions change over time Yet the rapid rise of India and its increasing links to East Asia especially those formed in the early 1990s suggest that it would be fruitful to examine both developments within each subregion as well as links across subregions      *Decoding Boundaries in Contemporary Japan* Glenn Hook, 2010-12-21 The purpose of this book is to illuminate the changing nature of contemporary Japan by decoding a range of political economic and social boundaries with a focus on the period following the inauguration of Prime Minister Koizumi Junichir s administration 2001 6 A rapid turnover of prime ministers followed Koizumi Abe Shinz 2006 7 Fukuda Yasuo 2007 8 and As Tar 2008 but the transformation set in motion through his promotion of a more proactive role for Japan internationally and the implementation of structural reforms domestically set the direction for future administrations The central argument of the book is that in order to achieve the twin goals of greater international proactivity and domestic reform the government and other actors supporting the new direction for Japan pushed forward by the Koizumi administration needed to take action in order to destabilize and reformulate a range of extant boundaries This task was achieved by deploying material as well as normative resources including the production of new discourses about the way these resources should be deployed      **The 3rd ASEAN Reader** Ooi Kee Beng, 2015-08-24 Over the past two decades ISEAS has compiled abridged articles that analyse key aspects of Southeast Asia s development and the ASEAN process The ASEAN Reader was published in 1992 just as the Cold War ended while The Second ASEAN Reader came in 2003 in the wake of the 1997 Asian crisis and the September 11 attacks in 2001 The past decade has not been spared its share of intense changes with the rise of China and India bringing new challenges to the region s power equation and the impact of the 2008 global financial crisis Despite this the momentum towards an integrated ASEAN community has been maintained The articles in The Third ASEAN Reader study the trends and events of recent years and discuss the immediate future of Southeast Asia      European Union and New Regionalism Mario Telò, 2013-03-28 Stemming from an international and multidisciplinary

network of leading specialists this best selling text is fully updated with new chapter additions With the first edition prepared at the end of the last century this new edition anticipates the world of regionalism as we move further into this millennium This new edition offers A vigorous response to conventional wisdom on EU international identity An exploration of key issues of regionalism versus globalization and the potential for world economic and political governance through regionalism A key resource for postgraduate or undergraduate study and research of international relations European studies comparative politics and international political economy Taking into account the expanded European Union the volume comprises contributions from established scholars in the field to highlight external relations in the framework of the development of regional arrangements within the globalized world of the 21st century     Towards a Northeast Asian Security Community Bernhard Seliger,Werner Pascha,2011-06-25 The Northeast Asian security environment is closely linked to Korea s growth perspectives for the future The spectacular rise of the South Korean economy in the past half century also known as Miracle on the Han River has been duly highlighted as one of the most successful cases of economic development worldwide However among the factors curbing South Korea s growth perspectives has been from the very beginning of its rise the coexistence of the difficult neighbour to the North Democratic People s Republic of Korea While in the cold war this coexistence has been taken as inevitable after the end of the cold war there were hopes to overcome this obstacle to further growth either through collapse or enhanced cooperation with the North neither of which became reality North Korea s unprecedented aggressiveness and development of long range ballistic missiles and nuclear devices made this threat truly an international question with multilateral talks coming into existence as ad hoc measures to cope with the nuclear crisis It was then that the idea of a Northeast Asian Security Community was born The contributions in this book discuss how a peaceful solution of the security problems could not only enhance stability of Korea s economy and reduce the defense burden considerably the so called peace dividend but would facilitate regional investments safer and regional solutions for common economic problems When discussing the possibilities of a security framework or in an institutionalized form security community in Northeast Asia the authors in this volume are realistic as to not fall into the trap of wishful thinking which so often has characterized approaches to North Korea resulting in disappointment The past two years again saw the rising of tensions in Northeast Asia and the masterful way in which even an impoverished and isolated country can play its cards While it seems a new ice age between the two Koreas is possible nevertheless and maybe even more than ever the search for a stable security framework for Northeast Asia as a precondition for peaceful economic cooperation and development will go on The chapters in this volume contribute to the ongoing debate to secure peace and development in Northeast Asia making this book of interest to both academics and policy makers alike     Managing Cultural Differences Robert T. Moran,Philip R. Harris,Sarah Virgilia Moran,2011 This new eighth edition provides a leading edge text that provides insight for interacting with other cultures working on cross cultural teams and provides a framework for building long lasting relationships in a

diverse global business environment      **The Political Economy of Asian Regionalism** Giovanni Capannelli, Masahiro Kawai, 2014-01-23 This book contributes to the theoretical and empirical literature on Asian regionalism with a focus on the innovations needed to reform the current institutional architecture in Asia After reviewing the key issues and challenges related to the political economy of Asia's economic cooperation and integration the book discusses various aspects of regionalism from political and economic perspectives It looks at the rationale for regional collective action and reviews the trend of economic integration with a focus on the implications of the global financial crisis In addition to reviewing the key issues related to the development of regional institutions for integration the book analyzes issues such as trade and finance and deals with the implications of regionalism in terms of the introduction of domestic reforms in Asian countries before discussing the possible formation of a region wide economic community The eight chapters of the book are based on respective papers initially prepared for the Asian Development Bank Institute Conference 2010      Reprogramming Japan Marie Ancho-doguy, 2015-08-12 How have state policies influenced the development of Japan's telecommunications computer hardware computer software and semiconductor industries and their stagnation since the 1990s Marie Ancho-doguy's book examines how the performance of these industries and the economy as a whole are affected by the socially embedded nature of Japan's capitalist system which she calls communitarian capitalism Reprogramming Japan shows how the institutions and policies that emerged during and after World War II to maintain communitarian norms such as the lifetime employment system seniority based wages enterprise unions a centralized credit based financial system industrial groups the main bank corporate governance system and industrial policies helped promote high tech industries When conditions shifted in the 1980s and 1990s these institutions and policies did not suit the new environment in which technological change was rapid and unpredictable and foreign products could no longer be legally reverse engineered Despite economic stagnation leaders were slow to change because of deep social commitments Once the crisis became acute the bureaucracy and corporate leaders started to contest and modify key institutions and practices Rather than change at different times according to their specific economic interests Japanese firms and the state have made similar slow incremental changes      **Japan and Asia's Contested Order** Yul Sohn, T. J. Pempel, 2018-08-20 This book brings together up to date research from prominent international scholars in a collaborative exploration of the Japan's efforts to shape Asia's rapidly shifting regional order Pulled between an increasingly inward looking America whose security support remains critical and a rising and more militarily assertive China with whom Japan retains deep economic interdependence Japanese leaders are consistently maneuvering to ensure the country's regional interests Nuclear and missile threats from North Korea and historically problematic relations with South Korea further complicate Japanese endeavors So too do the shifting winds of Japanese domestic politics economics and identity The authors weave these complex threads together to offer a nuanced portrait of both Japan and the region Scholars observers of politics and policymakers will find this a timely and useful collection

*Global Rogues and Regional Orders* Il Hyun Cho, 2016 *Global Rogues and Regional Orders* examines the relationship between nuclear proliferation and regional order in East Asia and the Middle East looking at what factors shape the perceptions and responses of relevant regional actors to North Korea and Iran why some of these regional actors cooperate with the United States while others do not and the consequences of shifting relations among these countries

**A Global Security Triangle** Valeria Bello, Belachew Gebrewold, 2009-10-16 This book considers the interactions between Africa Asia and Europe analysing the short and long term strategies various states have adopted to external relations The urgency attached to the agenda of international terrorism and human and drugs trafficking has forced the European Union into new cooperation with Africa and Asia These inter regional relations have taken on new dimensions in the context of contemporary international politics framed by new security challenges and new competitive forces particularly from Asia This book provides both conceptual and empirical arguments to offer an innovative perspective on the EU as a global actor It demonstrates how these three regions interact politically and economically to address global challenges as well as global opportunities and thus provides an assessment of the multilateralism which the EU clearly stated in its Security Strategy paper Addressing a broad range of topical issues the book features chapters on European Security European Migration Policy African Union and its peace and security policy Terrorism and international security China and its fast growing global role India the biggest democracy in the world and the impact of the Asian economic growth on the global economy Further it compares the different backgrounds forms and priorities of regional integrations A Global Security Triangle will be of interest to all scholars of European politics security studies African and Asian studies and International Relations

**ASEAN's Engagement of Civil Society** Kelly Gerard, 2015-12-11 This book offers an innovative framework for understanding the role of civil society in regional and global policymaking Using political economy analysis Gerard demonstrates that ASEAN's people oriented agenda builds legitimacy while sidelining its detractors

Foundations of Homeland Security Martin J. Alperen, 2011-03-08 This book is the complete guide to understanding the structure of homeland security its underlying law and policy Created from a broad and in depth yet edited collection of statutes policy papers presidential directives and other documents it cultivates a detailed understanding of the foundations of homeland security It is arranged in a topic by topic format structured to include only the documents and statutes that affect a particular subject making for much easier understanding Thus the chapter on FEMA contains only the portions of the statutes and other documents that relate to FEMA There are twenty five topic areas It contains hundreds of end notes references and suggestions for further study This book offers important legal guidance that students law enforcement officers lawyers and other homeland security professionals need to accurately interpret understand and apply homeland security policy The Introduction provides an in depth overview of the subject of homeland security and includes a discussion of what is homeland security definitions of homeland security and terrorism what is homeland security law its development and what is a

homeland security curriculum There are contributing chapters about homeland security in Europe and homeland security in China and Japan     European Union and New Regionalism Professor Mario Telò, 2014-08-28 Stemming from an international and multidisciplinary network of leading specialists this best selling text is fully updated with new chapter additions With the first edition prepared at the end of the last century and the second edition adding inter regional relations this new edition focuses on competing models of regional cooperation within a multipolar world and the role of the European Union
