Remembering Selves:

The Remembering Self Ulric Neisser, Robyn Fivush, 1994-10-28 This book brings a surprisingly wide range of intellectual disciplines to bear on the self narrative and the self The same ecological cognitive approach that successfully organized Ulric Neisser's earlier volume on *The Perceived Self* now relates ideas from the experimental developmental and clinical study of memory to insights from post modernism and literature Although auto biographical remembering is an essential way of giving meaning to our lives the memories we construct are never fully consistent and often simply wrong In the first chapter Neisser considers the so called false memory syndrome in this context other contributors discuss the effects of amnesia the development of remembering in childhood the social construction of memory and its alleged self servingness and the contrast between literary and psychological models of the self Jerome Bruner Peggy Miller Alan Baddeley Kenneth Gergen and Daniel Albright are among the contributors to this unusual synthesis Self-Remembering Robert E. Burton, 1995-09-01 This teacher of the Fourth Way Tradition shows how self remembering similar to Buddhist mindfulness and Orthodox non attachment relates to every aspect of the student's life and work This book gives Burton's students an accurate transmission of his teaching on the core idea of self remembering Unique in the spiritual literature this book is destined to become a classic *Memory Made, Hacked, and Outsourced* Chia-Chieh Mavis Tseng, 2023-08-02 This book probes the complex relationship between memory and storytelling in contemporary literature It not only examines how memory is constantly made and remade through words and stories but also explores how literary practices and imagination are shaping new concepts of memory in the 21st century By analyzing the selected novels Penelope Lively's *The Photograph* Tom McCarthy's *Remainder* Julian Barnes' *The Sense of an Ending* and The Only Story Kazuo Ishiguro's *Never Let Me Go* and Felicia Yap's *Yesterday* this book explores the dynamic interplay of remembering and forgetting and redefines the relationship between fiction and memory in the 21st century *Integral Well-being. A Value-Based Approach* Andrea Monsanto, 2025-03-29 Emotional wellness is a concern that affects people worldwide It's a situation that demands attention and action However addressing this issue can be challenging given the complexity of human beings But starting somewhere is essential to reduce suffering and enhance subjective well being This book offers practical guidance on how to improve our relationship with the crucial aspects of perception time space and energy Doing so provides a formula for improving all areas of life simultaneously **Find Your Story, Write Your Memoir** Lynn C. Miller, Lisa Lenard-Cook, 2013-05-31 Every person has a story to tell but few beginners know how to uncover their story's narrative potential And despite a growing interest among students and creative writers few guides to the genre of memoirs and creative nonfiction highlight compelling storytelling strategies Addressing this gap the authors provide a guide to memoir writing that shows how an aspiring writer can use storytelling tools and tactics borrowed from fiction to weave personal experiences into the shape of a story

Ten Worlds Ash ElDifrawi, Alex Lickerman, 2018-10-02 Fresh on the heels of his phenomenally received book *The Undeclared Mind* Dr Lickerman and co author Dr ElDifrawi offer a whole new perspective on understanding and achieving happiness In this highly engaging and eminently practical book told in the form of a Platonic dialogue recounting real life

patient experiences Drs Lickerman and ElDifrawi assert that the reason genuine longlasting happiness is so difficult to achieve and maintain is that we re profoundly confused not only about how to go about it but also about what happiness is In identifying nine basic erroneous views we all have about what we need to be happy views they term the core delusions Lickerman and ElDifrawi show us that our happiness depends not on our external possessions or even on our experiences but rather on the beliefs we have that shape our most fundamental thinking These beliefs they argue create ten internal life conditions or worlds through which we continuously cycle and that determine how happy we re able to be Drawing on the latest scientific research as well as Buddhist philosophy Lickerman and ElDifrawi argue that once we learn to embrace a correct understanding of happiness we can free ourselves from the suffering the core delusions cause us and enjoy the kind of happiness we all want the kind found in the highest of the Ten Worlds the world of Enlightenment Personalising Learning in Open-Plan Schools Vaughan Prain, Peter Cox, Craig Deed, Debra Edwards, Cathleen Farrelly, Mary Keeffe, Valerie Lovejoy, Lucy Mow, Peter Sellings, Bruce Waldrup, 2015-11-03 How can widely acknowledged challenges facing regional secondary schools with high concentrations of low SES students ineffectual curricula and poor levels of student engagement attendance and wellbeing be addressed In this book we report on key outcomes of the Bendigo Education Plan that aimed to improve the academic attainment and wellbeing of 3000 regional secondary students This Plan entailed rebuilding four Years 7 10 colleges and developing a differentiated and personalised curriculum with teachers team teaching in open plan settings We analyse how and why teachers and students adapted to these new practices We focus on both generic changes in the schools around the use of ICTs and the organisation of the curriculum and on specific approaches to teaching and learning in English mathematics science social studies and studio arts This book provides research based guidelines on how the curriculum can be renewed and enacted effectively in these and like schools In analysing a large scale attempt to address the challenge of making learning personalised and meaningful for this cohort of students our book addresses larger questions about quality secondary curriculum and successful teacher professional learning support Rapt Winifred Gallagher, 2009-04-16 A revolutionary look at how what we pay attention to determines how we experience life Acclaimed behavioral science writer Winifred Gallagher s Rapt makes the radical argument that much of the quality of your life depends not on fame or fortune beauty or brains fate or coincidence but on what you choose to pay attention to Rapt introduces a diverse cast of characters from researchers to artists to ranchers to illustrate the art of living the interested life As their stories show by focusing on the most positive and productive elements of any situation you can shape your inner experience and expand your world By learning to focus you can improve your concentration broaden your inner horizons and most important feel what it means to be fully alive Turning Points Ansgar Nünning, Kai Marcel Sicks, 2012-10-30 At times of crisis and revolution such as ours diagnoses of crucial junctures and ruptures turning points in the continuous flow of history are more prevalent than ever Analysing literary cinematic and other narratives the volume seeks to understand the meanings

conveyed by different concepts of turning points the alternative concepts to which they are opposed when used to explain historical change and those contexts in which they are unmasked as false and over simplifying constructions Literature and film in particular stress the importance of turning points as a sensemaking device as part of a character's or a community's cultural memory while at the same time unfolding the constructive and hence relative character of turning points Offering complex reflections on the notion of turning points literary and filmic narratives are thus of particular interest to the present volume

Randall, Elizabeth McKim, 2008-06-03 Against the background of Socrates insight that the unexamined life is not worth living *Reading Our Lives: The Poetics of Growing Old* investigates the often overlooked inside dimensions of aging Despite popular portrayals of mid and later life as entailing inevitable decline this book looks at aging as potentially a process of poiesis a creative endeavor of fashioning meaning from the ever accumulating texts memories and reflections that constitute our inner worlds At its center is the conviction that although we are constantly reading our lives to some degree anyway doing so in a mindful matter is critical to our development in the second half of life Drawing on research in numerous disciplines affected by the so called narrative turn including cognitive psychology neuroscience and the psychology of aging authors Randall and McKim articulate a vision of aging that promises to accommodate such time honored concepts as wisdom and spirituality one that understands aging as a matter not merely of getting old but of consciously growing old

Memory Reconfiguration in Post-War Taiwanese Literature Chung-Yen Yu,2025-07-23 This book examines the impact of martial law on transgenerational memory in post World War II Taiwan Through an intense focus on the symptoms of memories Yu argues that collective remembrances in post war Taiwan must be studied alongside the islanders collective amnesia as the

post war regime coerced its citizens into forgetting To do so the book examines the core issue through the lens of two fictional works Green Island 2016 by Shawna Yang Ryan and The Stolen Bicycle originally published in 2015 translated in 2017 by Ming yi Wu whose narrators belong to the post war generation and find themselves unable to understand their parents traumas It also observes how the war generation memorize consecutive and entangled colonial experiences experiencing linguistic and social diaspora without the act of migration Ultimately Yu argues that post memory in these circumstances not only refers to secondary memory but bears an anti memory characteristic as Taiwanese society under martial law shunned the traumas of WWII and the March Massacre in 1947

Straight to the Heart Daniel Blackaby, Mike Blackaby, 2024-08-06 Our approach to apologetics needs to change when the very idea of truth is controversial But as authors Daniel Blackaby and Mike Blackaby teach us we can still reach people if we understand what they value most This practical guide to our current landscape explores five effective communication pathways Story As people wired for narrative we can speak through the stories we live and tell Beauty In an increasingly industrialized world we can point people to pockets of beauty that reveal the attractiveness of God Art In a society that celebrates the arts we can cultivate creativity in the church then send artists out as cultural missionaries Desire To a people motivated by love identity and purpose we can show how Jesus is the perfect fulfillment of our deepest longings Community As relational creatures where connectivity is disappearing we can offer a community of unified diversity Culture may be in flux but God's Word remains true Straight to the Heart helps us speak to the passions that drive our culture without compromising the life changing truth of the gospel
