Remote Surveillance By Electromagnetic Waves For Air Water Land:

Remote Surveillance by Electromagnetic Waves for Air, Water, Land Dag T. Gjessing, 1978 Surveillance of Environmental Pollution and Resources by Electromagnetic Waves T. Lund, 2012-12-06 These proceedings contain lectures research papers and working group reports from the NATO Advanced Study Institute on Surveillance of environmental pollution and resources by electromagnetic waves held at Spatind Norway April 9 19 1978 Remote sensing of the environment has developed into a very complex multidisciplinary field It encompasses a huge range of different instrumental techniques and analytical methods designed to provide information about a vast number of environmental parameters Nevertheless the approach to solve specific problems and the ways of handling the collected information are to a large extent the same or similar This commonality is the basis for the Advanced Study Institute To provide the best possible background both tutorially and for a fruitful exchange of research ideas and results a number of outstanding scientists were invited to review some major fields The material presented in these proceedings is certainly not complete in the sense that it covers all aspects of the subject The selection is deliberately due to the program committee and the editor The program committee would like to express their gratitude to Dr Tilo Kester head of the NATO Advanced Study Institute Program NATO Scientific Affairs Division for his support and encouragement during the organization of the Institute Oslo June 1978 **Atomic and Molecular Spectroscopy** Sune Svanberg, 2012-12-06 A wide ranging review of modern spectroscopic techniques such as X ray photoelectron optical and laser spectroscopy and radiofrequency and microwave techniques On the fundamental side the book focuses on physical principles and the impact of spectroscopy on our understanding of the building blocks of matter while in the area of applications particular attention is given to those in chemical analysis photochemistry surface characterisation environmental and medical diagnostics remote sensing and astrophysics The Fourth Edition also provides the reader with an update on laser cooling and trapping Bose Einstein condensation ultra fast spectroscopy high power laser matter interaction satellite based astronomy and spectroscopic aspects of laser medicine **Introduction to Ultra-Wideband Radar Systems** James D. Taylor, 2020-09-23 This introductory reference covers the technology and concepts of ultra wideband UWB radar systems It provides up to date information for those who design evaluate analyze or use UWB technology for any application Since UWB technology is a developing field the authors have stressed theory and hardware and have presented basic principles and concepts to help guide the design of UWB systems Introduction to Ultra Wideband Radar Systems is a comprehensive guide to the general features of UWB technology as well as a source for more detailed information **Inverse Methods in Electromagnetic Imaging** Wolfgang-M. Boerner, Hans Brand, Leonard A. Cram, Dag T. Gjessing, Arthur K. Jordan, Wolfgang Keydel, Günther Schwierz, Martin Vogel, 2013-11-21 In recent years there has been an increased interest in the use of polarization effects for radar and electromagnetic imaging problems References 1 2 and 3 The problem of electro magnetic imaging can be divided into the following areas 1 Propagation of the Stokes vector

from the transmitter to the target region through various atmospheric conditions rain dust fog clouds turbulence etc 2 Scattering of the Stokes vector from the object 3 Scattering of the Stokes vector from the rough surface terrain and the volume scattering 4 Propagation of the Stokes vector from the target region to the receiver 5 The characteristics of the receiver relating the Stokes vector to the output The propagation characteristics of the Stokes vector through various media can be described by the equation of transfer Even though the scalar equation of transfer has been studied extensively in the past the vector equation of transfer has not received as much attention In recent years however a need for further study of the vector radiative transfer theory has become increasingly evident and several important studies have been reported This paper presents a general formulation of the vector theory of radiative transfer under general anisotropic scattering conditions Some useful solutions are also presented 4 8 for several practical situations 2 GENERAL FORMULATION OF VECTOR RADIATIVE TRANSFER THEORY Let us consider the plane parallel problem Shown in Figure 1 Resonance and Aspect Matched Adaptive Radar (Ramar) Terence William Barrett, 2012 The book describes a new form of radar for which the target response is frequency i.e. resonance dependent The book provides both prototype designs and empirical results collected from a variety of targets The new form of radar called RAMAR Resonance and Aspect Matched Adaptive Radar advances radar OCo mere ranging and detection OCo to the level of RF spectroscopy and permits an advance of spectroscopic methods from optical through infra red and into the RF spectral range The book will describe how a target's response can be a function of frequency components in the transmitted signal's envelope as well as the signal's carrier

Greening the Alliance Simone Turchetti, 2018-12-17 Following the launch of Sputnik the North Atlantic Treaty Organization became a prominent sponsor of scientific research in its member countries a role it retained until the end of the Cold War As NATO marks sixty years since the establishment of its Science Committee the main organizational force promoting its science programs Greening the Alliance is the first book to chart NATO's scientific patronage and the motivations behind it from the organization's early days to the dawn of the twenty first century Drawing on previously unseen documents from NATO's own archives Simone Turchetti reveals how its investments were rooted in the alliance's defense and surveillance needs needs that led it to establish a program prioritizing environmental studies A long overlooked and effective diplomacy exercise NATO's greening at one point constituted the organization's chief conduit for negotiating problematic relations between allies But while Greening the Alliance explores this surprising coevolution of environmental monitoring and surveillance tales of science advisers issuing instructions to bomb oil spills with napalm or Dr Strangelove like experts eager to divert the path of hurricanes with atomic weapons make it clear the coexistence of these forces has not always been harmonious Reflecting on this rich complicated legacy in light of contemporary global challenges like climate change Turchetti offers both an eye opening history of international politics and environmental studies and a thoughtful assessment of NATO's future *Propagation Factors Affecting Remote Sensing by Radio Waves*, 1983 **Selected Library**
