Resisting Removal: The Sandy Lake Tragedy of 1850 Colin Mustful, 2019-09-30 The account of a nearly forgotten tragedy of American history Resisting Removal brings to life a story of political intrigue and bitter betrayal in this moving depiction of a people's desperate struggle to adapt to a changing hostile world Captivating and engaging for all the right reasons talented historical storytelling at its finest In February 1850 the United States government ordered the removal of all Lake Superior bands of Ojibwe living upon ceded lands in Wisconsin The La Pointe Ojibwe led by their chief elder Kechewaishke objected citing promises made just eight years earlier that they would not be removed during their lifetimes But Minnesota Territorial Governor Alexander Ramsey and Indian Agent John Watrous had a devious plan to force their removal to Sandy Lake Minnesota Put into action the negligence and ill intents of Ramsey and Watrous resulted in the death of approximately four hundred Ojibwe people in an event that has become known as the Sandy Lake Tragedy Despite the tragedy government officials aided by the interests of traders and businessmen continued their efforts to remove the La Pointe Ojibwe from their ancient homeland on Madeline Island But the Ojibwe resisted removal time and again Relying on their traditional lifeways and the assistance of missionaries and local residents the Ojibwe survived numerous hardships throughout the removal efforts By 1852 without government approval the La Pointe Ojibwe traveled to Washington D C to finally right the wrongs against them and to protect their homes Two years later they earned permanent homes near their homelands after signing the 1854 Treaty of La Pointe Follow along as trader and interpreter Benjamin Armstrong a real historical participant lives through the harrowing and ever changing times on the Wisconsin and Minnesota frontiers Discover the truth about this tragic past and the intentional exploitation of the Ojibwe people and culture But also come to understand the complexity of history and question whose story is really being told Effective Removal of Pavement

Migrant Justice in the Age of Removal details the story of Migrant Justice a migrant rights organization led by undocumented workers in a complicated and perhaps unexpected location Vermont United States This compelling story which includes U S Immigration and Customs Enforcement s use of a covert informant to infiltrate the group and deport key members of its community provides a detailed analysis of the state of immigration enforcement in the country today alongside an intimate portrait of successful modes of resistance against it Migrant Justice has gone on to improve rights for migrants in Vermont and across the country in these incredibly precarious times for migrant activists This book places Migrant Justice s activism within what is defined as the Age of Removal or the last three decades in which immigration enforcement in the United States has increasingly used enhanced enforcement mechanisms like the order of removal which aids in the confinement control and exploitation of migrants Migrant Justice s work also fits within a growing landscape of migrant rights movements that have arisen during this time and Jacob P Chamberlain provides a crucial snapshot of its work to better understand its successful forms of organizing in these contexts In this confluence of opposing forces we see egregious abuses against migrant actors but we also see new and progressively powerful forms of resistance that are posing a specific challenge to bordered and territorially based limitations on rights and democracy Migrant Justice s work expands rights access to people regardless of citizenship which essentially works toward a deterritorialization of rights access or the opening of sociopolitical belonging to new actors

The Legal Ideology of Removal Tim Alan Garrison, 2009 This study is the first to show how state courts enabled the mass expulsion of Native Americans from their southern homelands in the 1830s Our understanding of that infamous period argues Tim Alan Garrison is too often molded around the towering personalities of the Indian removal debate including President Andrew Jackson Cherokee leader John Ross and United States Supreme Court Justice John Marshall This common view minimizes the impact on Indian sovereignty of some little known legal cases at the state level Because the federal government upheld Native American self dominion southerners bent on expropriating Indian land sought a legal toehold through state supreme court decisions As Garrison discusses *Georgia v Tassels* 1830 *Caldwell v Alabama* 1831 *Tennessee v Forman* 1835 and other cases he shows how proremoval partisans exploited regional sympathies By casting removal as a states rights rather than a moral issue they won the wide support of a land hungry southern populace The disastrous consequences to Cherokees Creeks Choctaws Chickasaws and Seminoles are still unfolding Important in its own right jurisprudence on Indian matters in the antebellum South also complements the legal corpus on slavery Readers will gain a broader perspective on the racial views of the southern legal elite and on the logical inconsistencies of southern law and politics in the conceptual period of the anti Indian and proslavery ideologies

Environmental Effects of the Big Rapids Dam Remnant Removal, Big Rapids, Michigan, 2000-02 Denis F. Healy, J. Alan Simpson, S. J. Rheume, 2003 American Indians and the Rhetoric of Removal and Allotment Jason Edward Black, 2015-02-10 Jason Edward Black examines the ways the US government's rhetoric and American Indian responses contributed to the policies of Native US relations throughout the nineteenth century's removal and allotment eras Black shows how these discourses together constructed the perception of the US government and of American Indian communities Such interactions though certainly not equal illustrated the hybrid nature of Native US rhetoric in the nineteenth century Both governmental colonizing discourse and indigenous decolonizing discourse shaped arguments constructions of identity and rhetoric in the colonial relationship American Indians and the Rhetoric of Removal and Allotment demonstrates how American Indians decolonized dominant rhetoric through impeding removal and allotment policies By turning around the US government's narrative and inventing their own tactics American Indian communities helped restyle their own identities as well as the government's During the first third of the twentieth century American Indians lobbied for the successful passage of the Indian Citizenship Act of 1924 and the Indian New Deal of 1934 changing the relationship once again In the end Native communities were granted increased rhetorical power through decolonization though the US government retained an undeniable colonial influence through its territorial management of Natives The Indian Citizenship Act and the Indian New Deal as the conclusion of this book indicates are emblematic of the prevalence of the duality of US citizenship that fused American Indians to the nation yet segregated them on reservations This duality of inclusion and exclusion grew incrementally and persists now as a lasting effect of nineteenth century Native US rhetorical relations *The Removal of the Choctaw Indians* Arthur H. With an Appendix, Etc* William Golden Lumley, 1865 **Anaerobic Treatment of Mine Wastewater for the Removal of Selenate and its Co-Contaminants** Lea Tan, 2018-09-03

Selenium Se pollution has led to several cases of severe aquatic ecosystem deterioration due to Se poisoning caused by bioaccumulation over time. However, the removal of selenate SeO_4^{2-} from wastewater streams with co-contaminants has been largely considered as a black box in anaerobic biological systems using mixed consortia. This research aimed at addressing the effect of wastewater characteristics i.e. co-contaminants such as nitrate NO_3^- and sulfate SO_4^{2-} , heavy metals and pH on the biological reduction of SeO_4^{2-} and evaluating process integration for Se-laden wastewater treatment with co-contaminants. This study demonstrated that the presence of co-contaminants can actually be beneficial for Se removal provided that the concentrations are carefully monitored and appropriate operating conditions and process configurations are used. The Se removal total Se and SeO_4^{2-} efficiency increased by 30% in the presence of NO_3^- and/or SO_4^{2-} compared to systems with SeO_4^{2-} alone. Additionally, an integrated process of an ion exchange IX column and bioreactors showed improved overall removal capacity for SO_4^{2-} and total Se. The knowledge and information gained from this research can help in the advancement and application of biological processes i.e. predicting of reactor performance, solving specific design or practical problems and implementing novel treatment techniques for Se-laden mine wastewater.
