Western students of philosophy will profit considerably if they study Indian and Chinese philosophy from the very beginning along with their own. Written with clarity and infused with an engaging narrative voice, this book is organized thematically, presenting in virtually every chapter characteristic views from each tradition that represent similar positions in the core areas of metaphysics and epistemology. At the same time, Scharfstein develops each tradition historically as the chapters unfold. He presents a great variety of philosophical positions fairly avoiding the relativism and ethnocentrism that could easily plague a comparative presentation of Western and non-Western philosophies.

The Columbia History of Western Philosophy Richard Henry Popkin, 1999. Richard Popkin has assembled 63 leading scholars to forge a chronological account of the development of Western philosophical traditions. From Plato to Wittgenstein and from Aquinas to Heidegger, this volume provides lively in-depth and up-to-date historical analyses of all the key figures, schools, and movements of Western philosophy. Each chapter includes an introductory essay, and Popkin provides notes that draw connections among the separate articles. The rich bibliographic information and the indexes of names and terms make the volume an invaluable resource.

This volume also addresses the role of women in European republican traditions and contains a number of in-depth studies of the relationship between republicanism and the rise of a commercial society in early modern Europe.
