The calendar of the University college of Wales Wales univ, univ. coll. of Wales, 1884 **The Logic of Invention** Roy Wagner, 2019-02-15 In this long awaited sequel to *The Invention of Culture* Roy Wagner tackles the logic and motives that underlie cultural invention Could there be a single logical factor that makes the invention of the distinction between self and other possible much as specific human genes allow for language Wagner explores what he calls the reciprocity of perspectives through a journey between Euro American bodies of knowledge and his in depth knowledge of Melanesian modes of thought This logic grounds variants of the subject object transformation as Wagner works through examples such as the figure ground reversal in Gestalt psychology Lacan's theory of the mirror stage formation of the Ego and even the self recursive structure of the aphorism and the joke Juxtaposing Wittgenstein's and Leibniz's philosophy with Melanesian social logic Wagner explores the cosmological dimensions of the ways in which different societies develop models of self and the subject object distinction The result is a philosophical tour de force by one of anthropology's greatest mavericks

Heterotopia and the City Michiel Dehaene, Lieven De Cauter, 2008-05-15 *Heterotopia* literally meaning other place is a rich concept in urban design that describes a space that is on the margins of ordered or civil society and one that possesses multiple fragmented or even incompatible meanings The term has had an impact on architectural and urban theory since it was coined by Foucault in the late 1960s but it has remained a source of confusion and debate since *Heterotopia and the City* seeks to clarify this concept and investigates the heterotopias which exist throughout our contemporary world in museums theme parks malls holiday resorts gated communities wellness hotels and festival markets With theoretical contributions on the concept of heterotopia including a new translation of Foucault's influential 1967 text *Of Other Space* and essays by well known scholars the book comprises a series of critical case studies from Beaubourg to Bilbao which probe a range of post urban transformations and which redirect the debate on the privatization of public space *Wastelands and terrains vagues* are

studied in detail in a section on urban activism and transgression and the reader gets a glimpse of the extremes of our dualized postcivil condition through case studies on Jakarta Dubai and Kinshasa Heterotopia and the City provides a collective effort to reposition heterotopia as a crucial concept for contemporary urban theory The book will be of interest to all those wishing to understand the city in the emerging postcivil society and post historical era Planners architects cultural theorists urbanists and academics will find this a valuable contribution to current critical argument **Subject Guide to Children's Books In Print, 1996** R R Bowker Publishing,1996
