Case Studies in Educational Psychology Patricia P. Willems,Alyssa R. Gonzalez-DeHass,2017-12-06 This case study book serves as a valuable tool for professors and instructors of educational psychology It contains 18 cases that represent current areas of interest in Educational Psychology

embedded within current challenges that teachers face in today's elementary grade classrooms. The cases are organized into six major parts: Human Development, Individual Differences and Diversity, Learning Theories, Motivation, Classroom Management, Instructional Approaches, and Assessment and Evaluation. Each case describes a detailed teaching scenario written from either the student or the teacher's perspective. To engage students in critical thinking, perspective taking, analysis, problem solving, and decision making, the cases have been intentionally written without a conclusion. Because the cases are open ended, it allows the professor or instructor more flexibility and autonomy in how they use the cases. Each case is followed by thought provoking questions highlighting the significant issues in the case from which to analyze the case and apply various theoretical viewpoints. While the cases do not replace actual classroom experience, they present a way to immerse students in the classroom's culture by providing them with real life teaching examples.

Skylark Alice O'Keeffe,2021-11-18 SKYLARK plunges the reader headfirst into a vivid heady world where passion and betrayal collide Beautifully written immersive and ultimately enraging it s a must read for anyone who has ever wanted to change the world Erin Kelly Alice O Keeffe deftly renders the shocking truth of the spy cops scandal into a moving tale of love identity and betrayal Essential reading Jake Arnott Skylark is a book of profound psychological perception which conjures with deft precision the atmosphere of the anti roads movement in all its fierce tender idealism I couldn t put it down Jay Griffiths Their ideals brought them together but how closely should you follow your heart It s the mid 90s and rebellion is in the air Skylark is an activist a raver a tree dweller a world changer Handsome dependable Dan appears on the scene offering her the security she has never had When they fall in love she shows him a new way to live he will never be the same But Dan has a secret which Skylark must never ever know A secret so powerful that its fault lines run from their ordinary council flat right up to the highest echelons of the state Their story is the story of Britain s undercover police As Skylark comes to doubt not only Dan s commitment to their shared ideals but his very identity she finds herself asking can you ever really know the person you love *Home* John S Allen,2015-12-29 A leading anthropologist studies the science behind feeling at home to show us how home made us human Home is where the heart is Security comfort even love are all feelings that are centered on the humble abode But what if there is more to the feeling of being at home Neuroanthropologist John S Allen believes that the human habitat is one of the most important products of human cognitive technological and cultural evolution over the

past two million years In Home Allen argues that to feel at home is more than just an expression but reflects a deep seated cognitive basis for the human desire to have use and enjoy a place of one s own Allen addresses the very basic question How did a place to sleep become a home Within human evolution he ranks house and home as a signature development of our species as it emerged alongside cooperative hunting language and other critical aspects of humanity Many animals burrow making permanent home bases but primates generally speaking do not most wander making nests at night wherever they might find themselves This is often in home territory but it isn t quite home Our hominid ancestors were wanderers too so how did we over the past several million years find our way home To tell that story Allen will take us through evolutionary anthropology neuroscience the study of emotion and modern sociology He examines the home from the inside of our heads out homes are built with our brains as much as with our hands and tools Allen argues that the thing that may have been most critical in our evolution is not the physical aspect of a home but developing a feeling of defining creating and being in a home whatever its physical form The result was an environment relatively secure against whatever horrors lurked outside that enabled the expensive but creative human mind to reach its full flowering Today with the threat of homelessness child foster care and foreclosure this idea of having a home is more powerful than ever In a clear and accessible writing style Allen sheds light on the deep cognitive sources of the pleasures of having a home the evolution of those behaviors and why the deep reasons why they matter Home is the story about how humans evolved to create a space not only for shelter but also for nurturing creativity innovation and culture and why feeling at home is a fundamental aspect of the human condition
