Hierarchy Theory Valerie Ahl, T. F. H. Allen, 1996 Sugar pork beer corn cider scrapple and hoppin' John all became staples in the diet of colonial America The ways Americans cultivated and prepared food and the values they attributed to it played an important role in shaping the identity of the newborn nation In *A Revolution in Eating* James E. McWilliams presents a colorful and spirited tour of culinary attitudes tastes and techniques throughout colonial America Confronted by strange new animals plants and landscapes settlers in the colonies and West Indies found new ways to produce food Integrating their British and European tastes with the demands and bounty of the rugged American environment early Americans developed a range of regional cuisines From the kitchen tables of typical Puritan families to Iroquois longhouses in the backcountry and slave kitchens on southern plantations McWilliams portrays the grand variety and inventiveness that characterized colonial cuisine As colonial America grew so did its palate as interactions among European settlers Native Americans and African slaves created new dishes and attitudes about food McWilliams considers how Indian corn once thought by the colonists as fit for swine became a fixture in the colonial diet He also examines the ways in which African slaves influenced West Indian and American southern cuisine While a mania for all things British was a unifying feature of eighteenth century cuisine the colonies discovered a national beverage in domestically brewed beer which came to symbolize solidarity and loyalty to the patriotic cause in the Revolutionary era The beer and alcohol industry also instigated unprecedented trade among the colonies and further integrated colonial habits and tastes Victory in the American Revolution initiated a culinary declaration of independence prompting the antimonarchical habits of simplicity frugality and frontier ruggedness to define American cuisine McWilliams demonstrates that this was a shift not so much in new ingredients or cooking methods as in the way Americans imbued food and cuisine with values that continue to shape American attitudes to this day

Thinking about Things Mark Sainsbury,2018-05-03 In the blink of an eye I can redirect my thought from London to Austin from apples to unicorns from former president Obama to the mythical flying horse Pegasus How is this possible How can we think about things that do not exist like unicorns and Pegasus They are not there to be thought about yet we think about them just as easily as we think about things that do exist Thinking About Things addresses these and related questions taking as its framework a representational theory of mind It explains how mental states are attributed what their aboutness consists in whether or not they are relational and whether any of them involve nonexistent things The explanation centers on a new theory of what is involved in attributing attitudes like thinking hoping and wanting These attributions are intensional some of them seem to involve nonexistent things and they typically have semantic and logical peculiarities like the fact that one cannot always substitute one expression for another that refers to the same thing without affecting truth Mark Sainsburys new theory display theory explains these anomalies For example substituting coreferring expressions does not always preserve truth because the correctness of an attribution depends on what concepts it displays not on what the concepts refer to And a concept that refers to nothing may be used in an accurate display of what someone is thinking
