Customized Ob/Gyn

Management for Diverse Populations Gloria Bachmann, Juana Hutchinson-Colas, 2024-10-29 Customized Ob Gyn Management for Diverse Populations provides tailored options of management for optimal clinical care of the major preventive and interventional Ob Gyn issues. Case scenarios highlight and discuss the need for customized care and inclusive protocols that depend on each woman's race, gender, sexual orientation, culture, and socioeconomic factors. As health disparities adversely affect groups of people who have systematically experienced greater social and economic obstacles to health based on their racial or ethnic group, socioeconomic status, gender, sexual orientation, or other characteristics historically linked to discrimination or exclusion, this book provides a welcomed resource. The book highlights the fact that in order to change the current scenario, the health care community needs more information and awareness of health care data regarding diverse groups, population health, and well-being. Provides a framework for patient care based on the Robert Wood Johnson Foundation's Culture of Care, moving cultural aspects of medical care into health delivery. Discusses tailored options of management for the optimal clinical care of diverse populations. Presents case studies that discuss the same problem in various women from different races, backgrounds, cultures, and sexual orientation. Understanding Social Research Angela Dale, Jennifer Mason, 2010-12-29 Jennifer Mason and Angela Dale's book seeks to set out cutting edge developments in the field of social research and to encourage students and researchers to consider ways of learning from different approaches and perspectives in such a way as to make their own research richer, more insightful, and more rewarding. Social Researching brings together a wide variety of research methods, both qualitative and quantitative, to help students and researchers to consider the relative benefits of adopting different approaches for their own research work. The authors clearly identify the most appropriate methods for different research questions and also highlight areas where it might be fruitful to complement different methods with each other or exploit creative tensions between them. The book is therefore a highly practical guide which also seeks to draw readers outside their methodological comfort zones. This book includes critical coverage of issues in research design. Expert experience in many methodological fields. An overview of the many different ways to approach similar research problems. Coverage of the tensions between different methodological approaches. Examples of excellence in research design and practice. An examination of how to turn methodological tensions into richer research practice. The methods covered include highly innovative, cutting edge approaches, and they are demonstrated in terms of their transferability between the different social sciences. This interdisciplinary approach is complemented by a wide range of strategically chosen examples which demonstrate the authors' pragmatic and creative take on research design.
