**Trench Art** Nicholas Saunders,2020-06-15 Trench art is the evocative name given to a dazzling array of objects made from the waste of industrialized war Each object whether an engraved shell case cigarette lighter or a pen made from shrapnel tells a unique and moving story about its maker For the first time this book explores in depth the history and cultural importance behind these ambiguous art forms Not only do they symbolize human responses to the atrocities of war but they also act as mediators between soldiers and civilians individuals and industrial society and most importantly between the living and the dead Trench art resonates most obviously with the terror of endless bombardment night raids gas attacks and the bestial nature of trench life It grew in popularity between 1919 and 1939 when the bereaved embarked on battlefield pilgrimages and returned with objects intended to keep alive the memory of loved ones The term trench art is however misleading as it does not simply refer to materials found in the trenches It describes a diverse range of objects that have in some way emerged from the experience of war all over the world Many distinctive objects for example were made during conflicts in Bosnia Vietnam Northern Ireland and Korea Surprisingly trench art predates World War I and it can be made in a number of earlier wars such as the Crimean War the American Civil War and the Boer War Saunders looks at the broader issues of what is meant by trench art what it was before the trenches and how it fits in with other art movements as well as the specific materials used in making it He suggests that it can be seen as a bridge between the nineteenth century certainties and the fragmented industrialized values and ideals of the modern world This long overdue study offers an original and informative look at one of the most arresting forms of art Spanning from 1800 to the present day its analysis of art human experience and warfare will pave the way for new research

**Economically Important Trees: Origin, Evolution, Genetic Diversity and Ecology** Thomas K Uthup,Rekha Karumamkandathil,2024-12-09 The edited volume deals with the origin evolution genetic diversity commercial and cultural aspects of selected tree species such as Rubber Pine Poplar Almond Cashew Teak Olive Eucalyptus Mango Jack Fig Sandalwood and Ashoka It covers major aspects of the altered

gene pool of each tree species its impact on biodiversity the current scenario and the strategies to protect and conserve the wild progenitors of these trees Human interventions in the evolution and development of these economically important trees began at least four thousand years ago Over these years significant improvements in the traits of economic value were achieved for most of these tree species However the long history of domestication and the selective breeding pressure applied to their wild progenitors accelerated the loss of biodiversity resulting in reduced genetic diversity and shrunken germplasm resources of these domesticated species The book portrays the novel dimensions of the propitiousness of tree domestication and the interesting history behind it which is interlaced with the development of civilizations religions local traditions medicine and cuisine This book is of interest to teachers researchers biodiversity experts and policymakers It can be used as additional reading material for undergraduate and graduate students of forestry ecology genetics and environmental sciences The book also serves as an interesting and useful read for national and international agricultural scientists as well as historians and the general public
