Modern Science And Human Values:

Modern Science and Human Values William W. Lowrance, 1985 A thought provoking discussion of the various ways in which science technology and medicine influence social philosophies and choices Social attitudes values and ethics are analysed for their roles in decision and policy making Citing case studies the continuing debate surrounding sociobiology the role of peer review in formulating recombinant DNA research policy societal guidance of medical experimentation and the application of risk assessment to nuclear reactor safety Lowrance argues that society will be better served by a technical stewardship that extends beyond narrowly defined concepts of responsibility This book will be of great interest to a wide range of medical researchers scientists ethicists and lay readers *Modern Science and Human Values* Everett Wesley Hall, 1956

Modern Science and Human Values Everett W. Hall, 1959

Technology and Values Craig Hanks, 2009-05-04 This anthology features essays and book excerpts on technology and values written by preeminent figures in the field from the early 20th century to the present It offers an in depth range of readings on important applied issues in technology as well Useful in addressing questions on philosophy sociology and theory of technology Includes wide ranging coverage on metaphysics ethics and politics as well as issues relating to gender biotechnology everyday artifacts and architecture A good supplemental text for courses on moral or political problems in which contemporary technology is a unit of focus An accessible and thought provoking book for beginning and advanced undergraduates yet also a helpful resource for graduate students and academics

Companion to the History of Modern Science G N Cantor, G.N. Cantor, J.R.R. Christie, M.J.S. Hodge, R.C. Olby, 2020-10-07 The 67 chapters of this book describe and analyse the development of Western science from 1500 to the present day Divided into two major sections The Study of the History of Science and Selected Writings in the History of Science the volume describes the methods and problems of research in the field and then applies these techniques to a wide range of fields Areas covered include the Copernican Revolution Genetics Science and Imperialism the History of Anthropology Science and Religion Magic and Science The companion is an indispensable resource for students and professionals in History Philosophy Sociology and the Sciences as well as the History of Science It will also appeal to the general reader interested in an introduction to the subject

The Knowledge of Good Robert S. Hartman, Arthur R. Ellis, Rem B. Edwards, 2021-07-26 This book presents Robert S Hartman's formal theory of value and critically examines many other twentieth century value theorists in its light including A J Ayer Kurt Baier Brand Blanshard Paul Edwards Albert Einstein William K Frankena R M Hare Nicolai Hartmann Martin Heidegger G E Moore P H Nowell Smith Jose Ortega y Gasset Charles Stevenson Paul W Taylor Stephen E Toulmin and J O Urmson Open Access funding for this volume has been provided by the Robert S Hartman Institute

Science and Human Values Jacob Bronowski, 2011-10-01 The Impact Of Science On Ethics And Human Values *Science Facilities for the Modern High School* Paul De H. Hurd, 1954

Professional Ethics and Social Responsibility Daniel E. Wueste, 1994 Edmund Burke

Modernity Politics and Aesthetics examines the philosophy of Burke in view of its contribution to our understanding of modernity Stephen K White argues that Burke shows us how modernity engenders an implicit forgetfulness of human finitude White illustrates this theme by showing how Burke's political thought his judgment of the modern system of morality and policy and its taste for a false sublime are structured by his aesthetics

Evolution and Human Values, 2022-03-07 Initiated by Robert Wesson Evolution and Human Values is a collection of newly written essays designed to bring interdisciplinary insight to that area of thought where human evolution intersects with human values The disciplines brought to bear on the subject are diverse philosophy psychiatry behavioral science biology anthropology psychology biochemistry and sociology Yet as organized by co editor Patricia A Williams the volume falls coherently into three related sections Entitled Evolutionary Ethics the first section brings contemporary research to an area first explored by Herbert Spencer Evolutionary ethics looks to the theory of evolution by natural selection to find values for human living The second section Evolved Ethics discusses the evolution of language and religion and their impact on moral thought and feeling Evolved ethics was partly Charles Darwin's subject in The Descent of Man The last section bears the title Scientific Ethics A nascent field scientific ethics asks about the evolution of human nature and the implications of that nature for ethical theory and social policy Together the essays collected here provide important contemporary insights into what it is and what it may be to be human

Meaning and Development Messay Kebede, 2022-03-07 This book is a learned yet passionate critique of alternative theories of development as addressed to traditional societies It offers a forceful argument for sacrifice to be made in the name of moral faith The metaphysical grounds and the scientific verification for such a faith are explored An eloquent and original case for pursuing economic development in accordance with democracy and human dignity

Modern Science and Moral Values, 1973 *The Many Faces Of Science* Henry Byerly, 2018-03-05 In The Many Faces of Science Leslie Stevenson and Henry Byerly masterfully and painlessly provide the information and the philosophical reflections students need to gain an understanding of the institution of modern science and its increasing impact on our lives and cultures In this second edition the authors update topics they explored in the first edition and present new case studies on subjects such as HIV and AIDS women in science and work done in psychology and the social sciences The authors also extend their discussion of science and values in addition to revising their study of science and technology to emphasize changes in scientific practice today Accessible and rich with case studies anecdotes personal asides and keen insight The Many Faces of Science is the ideal interdisciplinary introduction for nonscientists and scientists in courses on science studies science and society and science and human values It will also prove useful as supplementary reading in courses on science and philosophy sociology and political science

Ethics and Science Adam Briggie, Carl Mitcham, 2012-10-25 This book explores ethical issues at the interfaces of science policy religion and technology cultivating the skills for critical analysis

The Reenchantment of Science David Ray Griffin, 1988-05-06 This book describes the move from modern mechanistic science to a post modern

organismic science David Ray Griffin gives voice to a revisionary postmodernism based on the work of Whitehead and Hartshorne that contrasts with the relativistic nihilistic postmodernism of Heidegger Derrida and Wittgenstein The book brings together some of today s most creative thinking about science Griffin s introductory essay summarizes the way in which the mechanistic view led to the disenchantment of science and the various reasons for the reversal of this process in our time The essays on physics cosmology biology ecology psychosomatic medicine and parapsychology bring out the various dimensions of the reenchantment of science the replacement of modern dualism and reductionism with an ecological organismic paradigm the priority of internal relations to external the causal power of experience the presence of experience purpose and intrinsic value throughout nature influence at a distance the laws of nature as habits the presence of a divine whole in all the parts and the history of the universe as a self creative meaningful story This book gives a powerful voice to this emerging movement s proposals for a postmodern science spirituality and world order

Ancient Mythology of Modern Science Gregory Allen Schrempp,2012 Examining the nature of myth making and its surprising appearance in popular science writing

Communings of the Spirit Mel Scult,2016-10-10 With honesty and vivid detail Kaplan explores his evolving beliefs on religious naturalism and his uncertainties and self doubts as he grapples with a wide range of theological issues

Sociology of Indian Society CN Shankar Rao,2004-09 The revision comes 10 years after the first edition and completely overhauls the text not only in terms of look and feel but also content which is now contemporary while also being timeless A large number of words are explained with the help of examples and their lineage which helps the reader understand their individual usage and the ways to use them on the correct occasion

Examining Ethics in Contemporary Science Education Research Kathrin Otrell-Cass,Maria Andrée,Minjung Ryu,2020-08-31 This book poses questions on how to work ethically in research on science education Applying research ethics reflectively and responsibly is fundamental for conducting research with people It seeks to renew the conversation on how and why to engage with ethics in science education research and to adjust and refine research practices It highlights both the need for methodological reflections in science education research and the particular ethical research challenges of science education Science education research involves the study of people often young and vulnerable people and their practices Researchers working within humanities and social science research commonly follow guidelines and codes of conducts set by country specific ethics committees Such guidelines function as minimal requirement for ethical reflection This book seeks to engage the community of science education researchers in a conversation on ethics in science education moving beyond the mere compliance with governmental regulations toward a collective reflection It asks the question of whether the existing guidelines provided for researchers are keeping up with contemporary realities of the visual presence of individuals in digital spaces It also asks questions on how participatory research methodologies alters the relations between researchers and practitioners This book is organized into two parts Part one is entitled Challenging existing norms and practices It asks

questions such as What are the conditions of knowledge that shape ethical decision making Where is this kind of knowledge coming from How is this knowledge structured and where are the limitations How can we justify our beliefs concerning our ethical research actions Part two Epistemological considerations for ethical science education research centres norms and practices of conducting science education research in regard to methods validity and scope

Science and Scientification in South Asia and Europe Axel Michaels, Christoph Wulf, 2020-03-11 This volume critically examines the role of science in the humanities and social sciences It studies how cultures and societies in South Asia and Europe underwent a transformation with the adoption or adaptation of scientific methods turning ancient cultural processes and phenomena into an enhanced scientific structure The chapters in this book Discuss the development of science as a method in modern and historical contexts and the differences between modern science scientification and pseudoscience Study the interactions between bodies of knowledge such as Sanskrit and computer science mathematics and Vedic mathematics science and philosophy Drawing on textual material extensive fieldwork and in depth interviews this book will be of great interest to scholars and researchers of philosophy Indology history linguistics history and philosophy of science and social science
