Religion And The Sciences Of Life:

Religion and the Sciences of Life William McDougall, 1932 **Religion and the Sciences of Life** William McDougall, William Mac Dougall, 1934 **Religion and the Sciences of Life** William McDougall, 1954 **Religion and Science as Forms of Life** Carles Salazar, Joan Bestard, 2015-01-01

The relationships between science and religion are about to enter a new phase in our contemporary world as scientific knowledge has become increasingly relevant in ordinary life beyond the institutional public spaces where it traditionally developed. The purpose of this volume is to analyze the relationships possible articulations and contradictions between religion and science as forms of life ways of engaging human experience that originate in particular social and cultural formations. Contributions use this theoretical and ethnographic research to explore different scientific and religious cultures in the contemporary world.

Revival: Religion and the Sciences of Life (1934) McDougall William, 2018-03-29

In author's own words: In selecting these essays I have been guided partly by the desire to present matter likely to be of interest to the general reader but also I have aimed at a certain unity of topic and argument a unity indicated by the title of the volume. A brief summary may help the reader to grasp that unity and to follow the somewhat scattered argument. Man I contend is more than a machine and more than a mirror that reflects the world about him. He is an active being with power to direct his strivings towards ideal goals and there is ground for belief that those goals are neither wholly illusory nor wholly unattainable. There is no novelty about this view but there is novelty in the argument by which the conclusion is reached. The same view has been propounded a thousand times by that form of wishful thinking which is commonly called philosophical. In this case the conclusion has been forced by the pressure of the evidence during more than forty years of cold and sceptical inquiry. The process is indicated in briefest outline in the first three essays of this volume. Any reader who may desire to follow the process in more detail may turn to my various published works more especially to my *Body and Mind* which remains pivotal for all my later thinking.

Rocks of Ages Stephen Jay Gould, 2011-07-20

People of good will wish to see science and religion at peace. I do not see how science and religion could be unified or even synthesized under any common scheme of explanation or analysis but I also do not understand why the two enterprises should experience any conflict. So states internationally renowned evolutionist and bestselling author Stephen Jay Gould in the simple yet profound thesis of his brilliant new book. Writing with bracing intelligence and elegant clarity Gould sheds new light on a dilemma that has plagued thinking people since the Renaissance. Instead of choosing between science and religion Gould asks why not opt for a golden mean that accords dignity and distinction to each realm. At the heart of Gould's penetrating argument is a lucid contemporary principle he calls NOMA for nonoverlapping magisteria a blessedly simple and entirely conventional resolution that allows science and religion to coexist peacefully in a position of respectful noninterference. Science defines the natural world religion our moral world in recognition of their separate spheres of influence. In elaborating and exploring this thought provoking concept Gould delves into the history of science sketching

affecting portraits of scientists and moral leaders wrestling with matters of faith and reason. Stories of seminal figures such as Galileo Darwin and Thomas Henry Huxley make vivid his argument that individuals and cultures must cultivate both a life of the spirit and a life of rational inquiry in order to experience the fullness of being human. In his bestselling books *Wonderful Life*, *The Mismeasure of Man* and *Questioning the Millennium*, Gould has written on the abundance of marvels in human history and the natural world. In *Rocks of Ages*, Gould's passionate humanism, ethical discernment and erudition are fused to create a dazzling gem of contemporary cultural philosophy. As the world's preeminent Darwinian theorist writes, "I believe with all my heart in a respectful even loving concordat between science and religion."

The Relation Between Religion and Science Angus Stewart Woodburne, 1920

Science and Religion in India Renny Thomas, 2021-12-30 This book provides an in depth ethnographic study of science and religion in the context of South Asia giving voice to Indian scientists and shedding valuable light on their engagement with religion. Drawing on biographical, autobiographical, historical and ethnographic material, the volume focuses on scientists' religious life and practices and the variety of ways in which they express them. Renny Thomas challenges the idea that science and religion in India are naturally connected and argues that the discussion has to go beyond binary models of conflict and complementarity. By complicating the understanding of science and religion in India, the book engages with new ways of looking at these categories.

Student friendly features include chapter introductions and summaries, biographical vignettes, a timeline, a glossary and many other learning aids.

Life and Religion Friedrich Max Müller, 1995 Müller was the most respected religious authority of his time. He translated the Upanishads and edited a massive collection of work called *The Sacred Books of the East*. Compiled in this volume is the most important quotes and excerpts from his life's work. Covers most religions including Christianity but does not attempt to promote any one religious agenda; he simply advises us about life in a spiritual sense. He understood the human soul and knew how to put one in touch with it through words. Compiled by his wife Georgina shortly after his passing and first published in 1905. Filled with more wisdom than you could find most anywhere, a rare and special work brought back.

The Centrality of Religion in Social Life Eileen Barker, 2021-11-18 James A. Beckford's work is internationally acclaimed not only in the sociology of religion but also in other fields of the social sciences. Beckford has long been arguing that the barriers that have

grown up between the different sub disciplines should be broken down with those specialising in religion becoming more cognisant of new theoretical developments and sociologists in general becoming more aware of the significance of developments in the religious scene This book is a collection of essays written in Beckford s honour drawing on a number of religious themes that have been central to Beckford s interests whilst also offering a significant contribution to our understanding of the wider society A central theme is modernity and its relation to the post modern and how religion affects and is affected by the dynamics of contemporary society with the primary focus of many of the chapters being a concern with how society copes with the minority religions that have become visible with the globalising tendencies of contemporary society The contributors who come from America Asia and various parts of Europe are all internationally renowned scholars Beckford s most important publications are listed in an Appendix and the volume opens with a short account of his contribution to sociology by Eileen Barker the editor and James T Richardson

God, Religion, Science, Nature, Culture, and Morality Yemant and Friends, 2014-11-11 Plain Talk about Us and Our Dealings with the Creator of Everything Most of us have never bothered to find out why we believe what we believe Thats especially true for our thoughts and convictions about religion Perhaps we were otherwise too engaged Perhaps we simply adopted what our elders and peers appeared to believe Whatever the case isnt it time for us all to examine matters of religiosity more carefully At least we a bunch of retired professors no longer absorbed by professional duties thought the time had come to ponder why we had taken so much for granted No we did not see the need to dive yet deeper into ancient scriptures to find the ultimate truth We focused instead on universal convictions Why for instance do humans around the globe believe in creator gods Why do they envision kind gods who turn nasty on occasion And why do most people believe that the gods watch and judge every single one of us discern merit and then set our fortunes Can we really converse with the gods and if need be bribe them with good deeds and sacrifices And finally why are the gods inclined to grant us life after

death If so why do we have choices between various forms of self continuance and recurrent physical existence in other organisms Given that some religions proclaim resurrection with retained identity whereas others propose alternating reincarnation how can such discrepant projections be equally true But we also examine the behavioral implications of adherence to a religion Could it be that devotion to a creed empowers in rendering hope confidence and contentment And could such reactivity squelch fear inspire happiness and ultimately elevate health and longevity In these terms how would those fare who fail to enlist the help of supernatural forces Is it conceivable that humanity would be better off with religiosity than with secularism in which each individual determines what is good or bad for him or her what for their communities and what for the world at large

The Purpose of Life Nicholas Dima,2014-07-22 The Purpose of Life is an essay emphasizing spiritual enlightenment as the ultimate purpose of our existence Although attracted by the paranormal and accepting the immortality of the soul the author wanted scientific reasoning Consequently he reviewed some of the most important works of the 20th Century on metaphysical philosophy and modern science and combined them with various precepts of Christianity Judaism Hinduism Buddhism and Islam The conclusion that stands out from all these sources is that we humans are dual beings as matter we are part of this universe and are mortal creatures but as souls we belong to a spiritual world and are immortal And the purpose of life is to reach a higher level of consciousness through spiritual enlightenment

The Spiritual Works of Leo Tolstoy Leo Tolstoy,2022-12-10 The Spiritual Works of Leo Tolstoy serves as a profound anthology encapsulating the later philosophical and theological musings of an author in the throes of deep spiritual inquiry Within this collection Tolstoy s transition from an esteemed novelist to a fervent Christian anarchist and pacifist is palpably chronicled Through literary

devices that blend narrative with expository treatises Tolstoy dissects the essence of human ethics informed largely by a zealous literal interpretation of the Sermon on the Mount His stylistic evolution mirrors his internal transformation offering readers a nuanced multifaceted portrait of both his reasoning and beliefs during a time of intense moral upheaval and societal questioning Leo Tolstoy born into Russian nobility later turned away from his aristocratic background dedicating himself to a life of spiritual and ethical exploration The catalysts for his conversion detailed in works like A Confession speak to a broader 19th century crisis of faith an era where science began challenging religious dogma Tolstoy s subsequent relationship with prominent historical figures such as Gandhi with whom he corresponded reflects the wide reaching influence of his convictions on nonviolent resistance which changed the fabric of political activism and moral thought in the 20th century and beyond The Spiritual Works of Leo Tolstoy is not merely a compendium of religious contemplation but a vital historical document that bridges the literary and the theological the individual and the universal Scholars and seekers alike will find in Tolstoy s writings a timeless inquiry into the nature of existence ethics and personal salvation that transcends the boundaries of time and culture The book is indispensable not just for fans of Tolstoy s fiction but for anyone intent on understanding the intricate interplay of faith and reason in a life devoted to the pursuit of truth and nonviolence
