Educational Secularization within Europe and Beyond Mette Buchardt,2024-11-04 Did religion disappear with modernization and the secularization reforms that changed the relation between religion and state throughout the European empires and nation states from late nineteenth century onwards Or was religion rather transformed becoming a part of the new social and national imaginaries on the road from European empires to African Middle Eastern European Union and Post Soviet nation states What are the historical roots behind the divisions of state church and education that characterized the late nineteenth and during the twentieth century What has been the role of education in this context both with regard to political reforms targeting the education systems and with regard to broader public enlightenment efforts and modernization of the state Connecting scholars across the fields of history and historical sociology of education church history and historical religion research and political history and covering the time span from the early modern period and up until the present this volume explores how education reform has functioned as an arena for the political project of secularization and in which way this contributed to transforming and revitalizing religion

Religion, State, and Political Culture in Japan Tokihisa Sumimoto,2023-11-02 Japan had developed a secular civilization long before going through its modern period characterized by the officially sanctioned unification of nationalism and state worship that reached its apotheosis during World War II followed by the economic growth oriented post war period While the relationship between religion and state has varied significantly over time what has been consistently observed throughout Japan s history is the absence of religions that are socially influential but independent from the state or the absence of a dualistic relationship between religion and state The kind of political ethos that should underpin democratic principles such as the rule of law and human rights has remained underdeveloped This book examines the concept of reconstructive postmodernism a perspective that has emerged from a normative approach to international relations that emphasizes the need to democratize and humanize the secularistic civilizations based on the reconstruction of spirituality and religiosity Using this concept this book offers a number of implications of its findings to the case of Japan and for global governance in the post secular age more broadly

Between Church and State James W. Fraser,2016-09-15

Looking at the difficult question of how private issues of faith can be reconciled with the very public nature of schooling Fraser's classic book paints a complex picture of how a multicultural society struggles to take the deep commitments of people of faith into account including people of many different faiths and no faith In this fully updated second edition Fraser tackles the culture wars adding fresh material on current battles over public funding for private religious schools He also addresses the development of the long simmering evolution creationism debate and explores the tensions surrounding a discussion of religion and the accommodation of an increasingly religiously diverse American student body *Between Church and State* includes new scholarship on the role of Roger Williams and William Penn in developing early American conceptions of religious liberty

Human Rights and the Separation of State and Religion Francis-Vincent Anthony, Hans-Georg Ziebertz, 2023-08-05 This text highlights key aspects of the religion church state relationship debate and related hitherto marginal topics The contributions make clear that there is no clear blueprint for an optimal relationship between religion church and state Individual states and countries are analysed on the granular level for example to address mono religious against poly religious as well as secular societies Among others chapters address education migration and politics against religion as well as the effect of LGBTQ communities on religion and societies This collected volume appeals to researchers and students working in religious studies and political science

Religion-State Relations in the United States and Germany Claudia E. Haupt, 2011-12-08 This comparative analysis of the constitutional law of religion state relations in the United States and Germany focuses on the principle of state neutrality A strong emphasis on state neutrality a notoriously ambiguous concept is a shared feature in the constitutional jurisprudence of the US Supreme Court and the German Federal Constitutional Court but neutrality does not have the same meaning in both systems In Germany neutrality tends to indicate more distance between church and state whereas the opposite is the case in the United States Neutrality also has other meanings in both systems making straightforward comparison more difficult than it might seem Although the underlying trajectory of neutrality is different in both countries the discussion of neutrality breaks down into largely parallel themes By examining those themes in a comparative perspective the meaning of state neutrality in religion state relations can be delineated

The Routledge International Handbook of Religious Education Derek Davis, Elena Miroshnikova, 2013-02-01 How and what to teach about religion is controversial in every country The Routledge International Handbook of Religious Education is the first book to comprehensively address the range of ways that major countries around the world teach religion in public and private educational institutions It discusses how three models in particular seem to dominate the landscape Countries with strong cultural traditions focused on a majority religion tend to adopt an identification model where

instruction is provided only in the tenets of the majority religion often to the detriment of other religions and their adherents. Countries with traditions that differentiate church and state tend to adopt a separation model thus either offering instruction in a wide range of religions or in some cases teaching very little about religion intentionally leaving it to religious institutions and the home setting to provide religious instruction. Still other countries attempt managed pluralism in which neither one nor many but rather a limited handful of major religious traditions are taught. Inevitably there are countries which do not fit any of these dominant models and the range of methods touched upon in this book will surprise even the most enlightened reader. Religious instruction by educational institutions in 53 countries and regions of the world are explored by experts native to each country. These chapters discuss legal parameters in terms of subjective versus objective instruction in religion. Constitutional, statutory, social and political contexts to religious approaches. Distinctions between the kinds of instruction permitted in elementary and secondary schools versus what is allowed in institutions of higher learning. Regional assessments which provide a welcome overview and comparison. This comprehensive and authoritative volume will appeal to educators, scholars, religious leaders, politicians and others interested in how religion and education interface around the world.

State-Religion Relationships and Human Rights Law Jeroen Temperman, 2010-05-17. This book examines the question of how the mode of state religion identification affects the state's scope for compliance with human rights law. It presents a human rights based assessment of the various modes of state religion identification and of the various forms of state practice that surround and characterize these different state religion models. A close assessment of norms of human rights law substantiates that although human rights law on the face of it is seemingly neutral to the issue of state religion identification, legal principles can be extrapolated that have a profound bearing on the question of legitimacy of the possible diverse relationships that may exist between the state and religion. A range of thematic case studies on among other issues: Establishment of Religion, the Equal Religious Rights of Others, Religion Freedom of Expression, Religion Political Rights, Religion Educational Rights, Religion Freedom of Association and Religion Equal Employment Opportunities demonstrates that existing regimes of positive state identification with religion are not devoid of forms of institutionalised discrimination and de facto practices of discrimination on grounds of religion or belief or lack thereof. At the same time it is observed by the author that in some secular or separationist states the ideals of state secularism and separationism have come to be considered ends in themselves. This has given rise to situations where the principles of secularism and separationism are construed so as to impose illegitimate limits on the activities of religions or illegitimate limits on the individual manifestation of certain beliefs. This book makes a case for the recognition of a state duty to remain impartial with respect to religion or belief in all regards so as to comply with people's fundamental right to be governed at all times in a religiously neutral manner.
