Religion And Scientific Method:

Religion and Scientific Method G. Schlesinger, 2012-12-06 I With the immense success of modern science it has generally become accepted that the only way to acquire knowledge is by the use of the method uniformly practiced by working scientists Consequently the credibility of the claims of religion which seem to be based on belief in revelation tradition authority and the like have been considerably shaken In the face of the serious threat provided by the ascendancy of modern scientific methodology religious thinkers have adopted various defensive attitudes Some have retreated into an extreme position where Theism is completely safe from any attack on it by the use of empirical methods of inquiry maintaining that contrary to appearances religion makes no factual claims whatsoever To be religious they say is to subscribe to a certain value system it is to adopt a set of practices and a given attitude to the meaning and purpose of life without making any assertions about this or that empirical feature of the universe Others wishing to remain more faithful to what religion traditionally meant throughout the ages agree that Theism does make factual claims but that these are so radically different from the kind of claims made by science that it is only right that they should be established by a separate method on its own In matters of faith reliance on widely entrenched tradition and sacred authority is not objectionable according to some

Science and Religion John F. Haught, 1995 Has science made religion intellectually implausible Does it rule out the existence of a personal God In an age of science can we really believe that the universe has a purpose And finally doesn't religion hold much of the blame for the present ecological crisis These questions form the nucleus of today's debate between science and religion This book is a guide for that debate identifying the questions isolating the issues and pointing to ways

the questions can be resolved There are four possible ways says John F Haught that we can view the relationship between religion and science First they can stand in complete opposition the conflict position Or we can believe they are so different that conflict is impossible the contrast position A third approach holds that while science and religion are distinct each has important implications for the other A fourth way views them as different but mutually supportive BOOK JACKET Title

Kellenberger,1985-06-18 Against Methodology in Science and Religion Josh Reeves,2018-09-14 Since its development as a field over the last part of the twentieth century scholars in science and religion have been heavily concerned with methodological issues Following the lead of Thomas Kuhn many scholars in this interdisciplinary field have offered proposals that purport to show how theology and science are compatible by appropriating theories of scientific methodology or rationality Arguing against this strategy this book shows why much of this methodological work is at odds with recent developments in the history and philosophy of science and should be reconsidered Firstly three influential methodological proposals are critiqued Lakatosian research programs Alister McGrath s Scientific Theology and the Postfoundationalist project of Wentzel van Huyssteen Each of these approaches is shown to have a common failing the idea that science has an essential nature with features that unite scientific or even rational inquiry across time or disciplines After outlining the issues this failing could have on the viability of the field the book concludes by arguing that there are several ways scholarship in science and religion can move forward even if the terms science and religion do not refer to something universally valid or philosophically useful This is a bold study of the methodology of science and religion that pushes both subjects to consider the other more carefully As such it will be of great interest to scholars in religious studies theology and the philosophy of science

Science and Religion Holmes Rolston, III,2011-01-15 This landmark book first published in 1987 is now back in print with a new introduction by its award winning author An interdisciplinary approach to the central themes of scientific and religious thought this book was widely heralded upon its publication for the richness and depth of its contribution to the science and religion dialogue notable for its breadth and depth filled with admirably argued and powerfully presented treatments of critical issues Joseph Pickle Colorado College Zygon Journal of Religion and Science a superb and subtle book David Foxgrover Christian Century a monumental work T he book is truly outstanding John H Wright Jesuit School of Theology Berkeley Theological Studies Rolston s presentation of the methods of science along with up to date summaries of the main achievements of the various sciences is commendable for its clarity and critical acumen Choice According to Holmes Rolston III there are fundamental questions that science alone cannot answer these questions are the central religious questions He uses the scientific method of inquiry to distill key issues from science and then he integrates them in a study that begins with matter and moves through life mind culture history and spirit Incorporating religious and scientific worldviews he begins with an examination of two natural sciences physics and biology He then extrapolates examples from

two human sciences psychology and sociology Next he moves to the storied universe and world history raising and addressing religious questions Never in the histories of science and religion have the opportunities been greater for fertile interaction between these fields with mutual benefits to both states Rolston The re publication of this book provides current researchers and students in the field an invaluable timeless methodological resource The new introduction offers updated insights based on new scientific research

Religion and the Demise of Liberal Rationalism J. Judd Owen, 2001-07 If liberalism is premised on inclusion pluralism and religious neutrality can the separation of church and state be said to have a unitary and rational foundation If we accept that there are no self evident principles of morality or politics then doesn't any belief in a rational society become a sort of faith And how can liberalism mediate impartially between various faiths as it aims to do if liberalism itself is one of the competing faiths J Judd Owen answers these questions with a remarkable critical analysis of four twentieth century liberal and postliberal thinkers John Dewey John Rawls and most extensively Richard Rorty and Stanley Fish His unique readings of these theorists and their approaches to religion lead him to conclusions that are meticulously constructed and surprising arguing against the perception of liberalism as simple moral or religious neutrality calling into question the prevailing justifications for separation of church and state and challenging the way we think about the very basis of constitutional government

The Study of Science and Religion Carl Reinhold Brakenhielm, 2018-06-06 The main aim of this book is to contribute to the relationship between science and religion This book aims to do constructive theological work out of a particular cultural context The point of departure is contemporary Swedish religion and worldviews One focus is the process of biologization i.e. how the worldviews of the general public in Sweden are shaped by biological science Is there a gap between Swedes in general and the perceptions of Swedish clergy The answer is based on sociological studies on science and religion in Sweden and the United States Furthermore the book contains a study of Swedish theologians from Nathan S derblom to the present Archbishop Antje Jackelén and their shifting understanding of the relation between science and religion The philosophical aspects of this relation are given special consideration What models of the relation inform the contemporary scholarly discussion Are science and religion in conflict separate or in mutual creative interaction

Science, Literature and Rhetoric in Early Modern England Juliet Cummins, David Burchell, 2007 These essays throw new light on the complex relations between science literature and rhetoric as avenues to discovery in early modern England Analyzing the contributions of such diverse writers as Shakespeare Bacon Hobbes Milton Cavendish Boyle Pope and Behn to contemporary epistemological debates these essays move us toward a better understanding of interactions between the sciences and the humanities during a seminal phase in the development of modern Western thought

Science and Hermeneutics Vern S. Poythress, 1988 Many years ago upon reading Thomas S Kuhn's work *The Structure of Scientific Revolutions* I was taken aback by the obvious parallels between the subject of that book and the field of biblical exegesis It seemed strange then and more so now after all these years that no one had sought to draw out the implications of Kuhn's

ideas for better understanding the conflicts that frequently arise over the interpretation of Scripture from the preface In this new volume of the Foundation of Contemporary Interpretation series Vern Poythress gives an explanation of the conflicts that often arise between science and the interpretation of Scripture Novices and experts alike will be fascinated by the author's clear and perceptive account of the relationship between science and hermeneutics Pythress analysis will help students of the Bible appreciate the origin and nature of interpretive disputes aid students in developing exegetical skills and allow students to examine opposing views The Journal of Religion ,1925 Includes section Book reviews **The Methods of Science and Religion** Tiddy Smith,2019-07-05 Tiddy Smith argues that the conflict between science and religion is ultimately a disagreement about what kinds of methods we should use for investigating the world Specifically scientists and religious folk disagree over which belief forming methods are reliable In the course of justifying any scientific claim scientists typically appeal to methods which generate agreement between independent investigators and which converge on the same answers to the same questions In contrast religious claims are typically justified by methods which neither generate agreement nor converge in their results for example dreams visions mystical experiences etc This fundamental difference in methodologies can neatly account for the conflict between science and religion Theory and Method in Religious Studies Frank Whaling,2012-10-25 This paperback edition contains selected articles from the original clothbound editions of Contemporary Approaches to The Study of Religion Vol I The Humanities Vol II The Social Sciences Religion and Reason 27
