Harold A. Netland, 2022-02-08 For many Christians personal experiences of God provide an important ground or justification for accepting the truth of the gospel But we are sometimes mistaken about our experiences and followers of other religions also provide impressive testimonies to support their religious beliefs This book explores from a philosophical and theological perspective the viability of divine encounters as support for belief in God arguing that some religious experiences can be accepted as genuine experiences of God and can provide evidence for Christian beliefs *Dawkins' God* Alister E. McGrath, 2014-11-11 A fully updated new edition of a critically acclaimed examination of the theories and writings of Richard Dawkins by a world renowned expert on the relation of science and religion Includes in depth analysis of Dawkins landmark treatise *The God Delusion* 2006 as well as coverage of his later popular works *The Magic of Reality* 2011 and *The Greatest Show on Earth* 2011 and a new chapter on Dawkins as a popularizer of science Tackles Dawkins hostile and

controversial views on religion and examine the religious implications of his scientific ideas including a comprehensive investigation of the selfish gene Written in an accessible and engaging style that will appeal to anyone interested in better understanding the interplay between science and religion **The Oxford Handbook of Evolutionary Perspectives on Violence, Homicide, and War** Todd K. Shackelford,Viviana A. Weekes-Shackelford,2012-08-23 This volume synthesizes the theoretical and empirical work of leading scholars in the evolutionary sciences to produce an extensive and authoritative review of this literature Homo Symbolicus Christopher S. Henshilwood,Francesco d'Errico,2011-11-16 The emergence of symbolic culture classically identified with the European cave paintings of the Ice Age is now seen in the light of recent groundbreaking discoveries as a complex nonlinear process taking root in a remote past and in different regions of the planet In this book the archaeologists responsible for some of these new discoveries flanked by ethologists interested in primate cognition and cultural transmission evolutionary psychologists modelling the emergence of metarepresentations as well as biologists philosophers neuro scientists and an astronomer combine their research findings Their results call into question our very conception of human nature and animal behaviour and they create epistemological bridges between disciplines that build the foundations for a novel vision of our lineage s cultural trajectory and the processes that have led to the emergence of human societies as we know them Scientific Models for Religious Knowledge Andrew Ralls Woodward,2018-08-14 Most comparisons of science and religion are really comparisons of science and Christianity or science and Islam and so forth In Scientific Models for Religious Knowledge the author aims to get outside typical polarized debates between traditional a priori theism and radical scientific naturalism Instead a new science and religion compatibility system between a scientific study of religion and a religious epistemology is our new elusive problem Moreover we shall look at a comparison and contrast of modern science with the simple deference of the human mind to the actions of culturally postulated superhuman agents This book pays critical attention to the contributions of scholars in the philosophy of religion the philosophy of science and the scientific study of religion Scientific Models for Religious Knowledge is useful for readers looking to expand their learning in the philosophies of science and religion as these subjects are taught and analyzed in modern research universities

D. Jason Slone Assistant Professor of Religious Studies University of Findlay, 2004-01-30 Ask two religious people one question and you ll get three answers Why do religious people believe what they shouldn't not what others think they shouldn't believe but things that don't accord with their own avowed religious beliefs This engaging book explores this puzzling feature of human behavior D Jason Slone terms this phenomenon theological incorrectness He demonstrates that it exists because the mind is built in such a way that it's natural for us to think divergent thoughts simultaneously Human minds are great at coming up with innovative ideas that help them make sense of the world he says but those ideas do not always jibe with official religious beliefs From this fact we derive the important lesson that what we learn from our environment religious ideas for example does not necessarily cause us to behave in ways consistent with that knowledge Slone presents the latest discoveries from the cognitive science of religion and shows how they help us to understand exactly why it is that religious people do and think things that they shouldn't He then applies these insights to three case studies First he looks at why Theravada Buddhists profess that Buddha was just a man but actually worship him as a god Then he explores why the early Puritan Calvinists who believed in predestination acted instead as if humans had free will by for example conducting witch hunts and seeking converts Finally he explains why both Christians and Buddhists believe in luck even though the doctrines of Divine Providence and karma suggest there's no such thing In seeking answers to profound questions about why people behave the way they do this fascinating book sheds new light on the workings of the human mind and on the complex relationship between cognition and culture **The Oxford Handbook of Evolutionary Psychology and Religion**

on The secret of their deadly effectiveness lies in their resilience and cohesion when incentives to defect are strong These insights suggest that provision of basic social services by competent governments adds a critical nonviolent component to counterterrorism strategies It undermines the violent potential of radical religious organizations without disturbing free religious practice being drawn into theological debates with Jihadists or endangering civilians
