## **Religion Identity And Empire:**

**Empire, Religion, and Identity** Soumen Mukherjee, 2024-02-19 This collection brings together case studies that cover a wide spectrum from Hindu Buddhist Jaina traditions through reformist ventures such as the Brahmos to issues in modern Islam and Judaism The first part of the book explores idioms of self fashioning in global platforms and religious congresses The second part explicates the nature of movements of such ideas Cumulatively they offer fresh and invaluable insights into their histories in modern South Asia against the backdrop of and in relation to wider transcultural global flows Contributors Soumen Mukherjee Toshio Akai Jeffery D Long Arpita Mitra Philip Goldberg Ankur Barua Oyndrila Sarkar Madhuparna Roychowdhury Navras J Aafreedi and Faridah Zaman **Of Religion and Empire** Robert P. Geraci, Michael

Khodarkovsky, 2001 This book is the first to investigate the role of religious conversion in the long history of Russian state building with geographic coverage from Poland and European Russia to the Caucasus Central Asia Siberia and Alaska

Religion, Identity and Politics Haldun Gülalp, Günter Seufert, 2013-06-26 German Turkish relations which have a long history and generally unrecognized depth have rarely been examined as mutually formative processes Isolated instances of influence have been examined in detail but the historical and still ongoing processes of mutual interaction have rarely been seriously considered The ruling assumption has been that Germany may have an impact on Turkey but not the other way around Religion Identity and Politics examines this mutual interaction specifically with regard to religious identities and institutions It opposes the commonly held assumption that Europe is the abode of secularism and enlightenment while the lands of Islam are the realm of backwardness and fundamentalism Both historically and contemporarily Germany has treated religion as a core aspect of communal and civilizational identity and framed its institutions accordingly the book explores how there has been and continues to be a mutual exchange in this regard between Germany and both the Ottoman Empire and modern Turkey The authors show that the definition of identity and regulation of communities have been explicitly based on religion until the early and since the late twentieth century the period in between the age of secular nationalism which has always been treated as the norm now appears more clearly as an exception This book will be of interest to students and scholars of sociology politics history and religion **Egypt and Empire** Elisabeth R. O'Connell, 2022 Across Eurasia and North Africa in the First Millennium AD empires rose and fell each adopting a universalizing faith which distinguished it broadly from its neighbours In Egypt our sources are particularly rich owing to the land s arid climate and the unparalleled survival not only of stone ceramic and metalwork but also of organic material such as textiles wood and manuscripts found on papyrus parchment and paper This volume brings together over a dozen of the world s leading specialists to explore the dialectical interplay between empire and religious identity through a series of case studies from Egypt Evidence from Egypt suggests that it was precisely in the context of empire that religious identity emerged as a distinctive marker Using the unrivalled abundance and variety of surviving material culture this volume explores the formation renegotiation and

reconstitution of religious identities from the Roman period forward Whereas Egypt's pharaonic millennia c 3000-30 BC have been studied as a coherent whole later eras are often studied as fragments Egypt and Empire offers a different approach by covering together periods that are usually treated separately in different academic disciplines *Religion, Science, and Empire* Peter Gottschalk, 2013 Peter Gottschalk offers a compelling study of how through the British implementation of scientific taxonomy in the subcontinent Britons and Indians identified an inherent divide between mutually antagonistic religious communities England's ascent to power coincided with the rise of empirical science as an authoritative way of knowing not only the natural world but the human one as well The British scientific passion for classification combined with the Christian impulse to differentiate people according to religion led to a designation of Indians as either Hindu or Muslim according to rigidly defined criteria that paralleled classification in botanical and zoological taxonomies Through an historical and ethnographic study of the north Indian village of Chainpur Gottschalk shows that the Britons presumed categories did not necessarily reflect the Indians' concepts of their own identities though many Indians came to embrace this scientism and gradually accepted the categories the British instituted through projects like the Census of India the Archaeological Survey of India and the India Museum Today's propagators of Hindu-Muslim violence often cite scientific formulations of difference that descend directly from the categories introduced by imperial Britain *Religion, Science, and Empire* will be a valuable resource to anyone interested in the colonial and postcolonial history of religion in India

*Religion and US Empire* Tisa Wenger, Sylvestre A Johnson, 2022-08-23 Shows how American forms of religion and empire developed in tandem shaping and reshaping each other over the course of American history The United States has been an empire since the time of its founding and this empire is inextricably intertwined with American religion *Religion and US Empire* examines the relationship between these dynamic forces throughout the country's history and into the present The volume will serve as the most comprehensive and definitive text on the relationship between US empire and American religion Whereas other works describe religion as a force that aided or motivated American imperialism this comprehensive new history reveals how imperialism shaped American religion and how religion historically structured, enabled, challenged, and resisted US imperialism Chapters move chronologically from the eighteenth century to the twenty-first, ranging geographically from the Caribbean, Michigan, and Liberia to Oklahoma, Hawaii, and the Philippines Rather than situating these histories safely in the past, the final chapters ask readers to consider present-day entanglements between capitalism, imperialism, and American religion *Religion and US Empire* is an urgent work of history offering the context behind a relationship that is for better or worse very much alive today

**Religion, Identity and Power** Ahmet Erdi Öztürk, 2021-01-05 This book examines Turkey's ethno-religious activism and power-related political strategies in the Balkans between 2002 and 2020, the period under the rule of the Justice and Development Party (AKP) to determine the scope of its activities in the region Ahmet Erdi Öztürk illuminates an often neglected aspect of Turkey's relations with its Balkan neighbours that emerged as a result of the much

discussed authoritarian turn a broader shift in Turkish domestic and foreign policy from a realist secular to a Sunni Islamic orientation with ethno nationalist policies zt rk draws on personal testimonies given by both Turkish and non Turkish Muslim and non Muslim interviewees in three country cases Bulgaria North Macedonia and Albania The findings shed light on contemporary issues surrounding the continuous redefinition of Turkish secularism under the AKP rule and the emergence of a new Muslim elite in Turkey

**Rhetoric and Religious Identity in Late Antiquity** Richard Flower, Morwenna Ludlow, 2020 Rhetoric and Religious Identity in Late Antiquity takes an interdisciplinary approach to the question of how individuals and groups ascribed religious categories during late antiquity Particular focus is given to the role of rhetoric in the expression of religious identity in order to give mutual illumination to both phenomena in this period Language, Religion and National Identity in Europe and the Middle East John Myhill, 2006-01-01 This book discusses the historical record of the idea that language is associated with national identity demonstrating that different applications of this idea have consistently produced certain types of results Nationalist movements aimed at unification based upon languages which vary greatly at the spoken level e g German Italian Pan Turkish and Arabic have been associated with aggression fascism and genocide while those based upon relatively homogeneous spoken languages e g Czech Norwegian and Ukrainian have resulted in national liberation and international stability It is also shown that religion can be more important to national identity than language but only for religious groups which were understood in premodern times to be national rather than universal or doctrinal e g Jews Armenians Maronites Serbs Dutch and English this is demonstrated with discussions of the Holocaust the Armenian Genocide the civil war in Lebanon and the breakup of Yugoslavia the United Netherlands and the United Kingdom

*Empires and Gods* Jörg Rüpke, Michal Biran, Yuri Pines, 2024-02-19 Interaction with religions was one of the most demanding tasks for imperial leaders Religions could be the glue that held an empire together bolstering the legitimacy of individual rulers and of the imperial enterprise as a whole Yet they could also challenge this legitimacy and jeopardize an empire s cohesiveness As empires by definition ruled heterogeneous populations they had to interact with a variety of religious cults creeds and establishments These interactions moved from accommodation and toleration to cooptation control or suppression from aligning with a single religion to celebrating religious diversity or even inventing a new transcendent civic religion and from lavish patronage to indifference The volume s contributors investigate these dynamics in major Eurasian empires from those that functioned in a relatively tolerant religious landscape Ashokan India early China Hellenistic and Roman empires to those that allied with a single proselytizing or non proselytizing creed Sassanian Iran Christian and Islamic empires to those that tried to accommodate different creeds through pay for pray policies Tang China the Mongols exploring the advantages and disadvantages of each of these choices

The Empire's Reformations provides a concise overview of reform movements in 16th century Germany that gave birth to the modern division of western Christianity into multiple denominations Roman Catholic Lutheran Calvinist and more It exposes the origins of modern religious pluralism both in battle for souls among these emerging camps and in the struggles of political leaders at every level to manage the threat that religious diversity posed to tranquillity and order in a rigidly hierarchical society As such it offers a prehistory of religious toleration not as a positive value few regarded toleration as inherently good but as a strategy for keeping the peace David M Luebke considers the reformations of religion in the context of concurrent transformations in the political and judicial structures of the Holy Roman Empire that sprawling confederation of principalities and city states that embraced most regions where German was spoken This allows Luebke to view the religious reforms through the lens of imperial politics showing how the Empire differed from the Atlantic monarchies Eastern Europe Scandinavia and the Mediterranean On a different and equally significant level he examines how ordinary people of all backgrounds experienced the controversy over religion and responded to reforms of doctrine and observance The inclusion of both the imperial and local perspectives moves the Reformation beyond the familiar story of theological combat and reimagines it as something that had resonance throughout the world impacting people's lives in the process
