*Education, Religion and Diversity* L. Philip Barnes, 2014-02-05 In this thoughtful and provocative book Philip Barnes challenges religious educators to re think their field and proposes a new post liberal model of religious education to help them do so His model both confronts prejudice and intolerance and also allows the voices of different religions to be heard and critically explored While Education Religion and Diversity is directed to a British audience the issues it raises and the alternative it proposes are important for those educators in the United States who believe that the public schools have an important role in teaching students about religion Walter Feinberg Professor Emeritus of Education Policy Organization and Leadership at the University of Illinois Urbana Champaign Philip Barnes offers a penetrating and lucid analysis of the strengths and weaknesses of modern religious education in Britain He considers a range of epistemological and methodological issues and identifies two contrasting models of religious education that have been influential what he calls a liberal and a postmodern model After a detailed review and criticism of both he outlines his own new post liberal model of religious education one that is compatible with both confessional and non confessional forms of religious education yet takes religious diversity and religious truth claims seriously Essential reading for all religious educators and those concerned with the role of religion in schools Bernd Schr der Professor of Practical Theology and Religious Education University of G ttingen What place if any does religious education have in the schools of an increasingly diverse society This lucid and authoritative book makes an incisive contribution to this crucial debate Roger Trigg is Emeritus Professor of Philosophy University of Warwick and Senior Research Fellow Ian Ramsey Centre Oxford The challenge of diversity is central to education in modern liberal democratic states and religious education is often the point where these differences become both most acute and where it is believed of all curriculum subjects resolutions are most likely to be found Education Religion and Diversity identifies and explores the commitments and convictions that have guided post confessional religious education and concludes controversially that the subject as currently theorised and practised is incapable of challenging religious intolerance and of developing respectful relationships between people from different communities and groups within society It is argued that despite the rhetoric of success which religious education is obliged to rehearse in order to perpetuate its status in the curriculum and to ensure political support a fundamentally new model of religious education is required to meet the challenge of diversity to education and to society A new framework for religious education is developed which offers the potential for the subject to make a genuine contribution to the creation of a responsible respectful society Education Religion

and Diversity is a wide ranging provocative exploration of religious education in modern liberal democracies It is essential reading for those concerned with the role of religion in education and for religious and theological educators who want to think critically about the aims and character of religious education      **Global Perspectives on Catholic Religious Education in Schools** Michael T. Buchanan, Adrian-Mario Gellel, 2019-03-01 This book shares global perspectives on Catholic religious education in schools chiefly focusing on educational and curriculum issues that take into account the theology and the pedagogy which support learning in connection with Catholic religious education Further it offers insights into the distinctive contribution that Catholic religious education makes to religious education and education in general across diverse schooling contexts Bringing together insights from leading scholars and experts on Catholic religious education around the globe the book offers an essential reference guide for all those involved in researching planning and designing curricula for Catholic religious education as well as developing related theories in the field      *Secularism, Islam and Education in India, 1830-1910* Robert Ivermee, 2015-10-06 During the nineteenth century British officials in India decided that the education system should be exclusively secular Drawing on sources from public and private archives Ivermee presents a study of British Muslim negotiations over the secularization of colonial Indian education and on the changing nature of secularism across space and time      **Religion, Education, Dialogue and Conflict** Robert Jackson, 2014-01-02 Religion Education Dialogue and Conflict analyses the European Commission funded REDCo project which addressed the question of how religions might contribute to dialogue or conflict in Europe Researchers in education from eight countries the UK Estonia France Germany the Netherlands the Russian Federation Norway and Spain studied how young Europeans of different religious cultural and political backgrounds could engage in dialogue in the context of the school Empirical studies conducted with 14 16 year old students included them offering their own perspectives and analyses of teaching and learning in both dialogue and conflict situations Although there were some different national patterns and trends most students wished for peaceful coexistence across differences and believed this to be possible The majority agreed that peaceful coexistence depended on knowledge about each other s religions and worldviews sharing common interests and doing things together The project found that students who learn about religious diversity in school are more willing to discuss religions and beliefs with students of other backgrounds than those who do not The international range of expert contributors to this book evaluate the results of the REDCo project providing examples of its qualitative and quantitative studies and reflecting on the methods and theory used in the project as a whole This book was originally published as a special issue of the British Journal of Religious Education      *Global Perspectives on Spirituality and Education* Jacqueline Watson, Marian de Souza, Ann Trousdale, 2013-12-04 In recent decades and around the world much attention has been given to the role of spirituality in the education of children and young people While educationalists share many common goals and values in nurturing the spiritual lives of children and young people national and regional cultures religions and politics have

impacted on the approaches scholars and practitioners have adopted in their investigations and practices The different contexts across nations and regions mean that educators face quite distinct conditions in which to frame their approaches to spiritual education and research and the nature and impact of these differences is not yet understood This book brings together thinkers from around the globe and sets them the task of explaining how their research on children s spirituality and education has been shaped by the historical cultural religious and political contexts of the geographic region in which they work The book presents contributions in three sections Europe and Israel Australasia and The Americas and concludes with a chapter highlighting what is common and what is contextually unique about global approaches to spirituality and education
