Key Concepts in the Study of Religions in Contact Knut Martin Stükel, 2024-12-19 There is no religion lest there are two religions Therefore it is only possible to examine the history of religions by taking the crucial situations of contact into account Contact needs concepts Not only scholars but also participants in situations of contact are forced to conceptualize themselves and the other Taking its point of departure from the contact based approach to the study of religion the present volume examines and reassesses a selection of concepts and models attraction dynamics and stability tradition transcendence immanence senses secret space used to come to terms with the phenomenon of contact as the dynamizing element of the history of religions

**Scepticism, Relativism, and Religious Knowledge** Michael G Harvey, 2014-09-25 Scepticism Relativism and Religious Knowledge shows where responses to scepticism and relativism by Karl Barth and Reformed epistemology have led to impasses and reconstructs their insights in a robust response that does not depend on making excessive claims about our epistemic capacities This response is based on a nuanced conception of the relationship between trust doubt faith and reason and a Kierkegaardian perspective on religious knowledge that stresses the role of the will and the intellectual and theological virtues This book will appeal to those with an interest in the deep and often difficult questions of religion and philosophy particularly regarding matters of truth doubt and belief

**Religion, Philosophy and Knowledge** Gregory W. Dawes, 2016-11-07 This book offers a philosophical approach to religion that acknowledges both the diversity of religions and the many and varied dimensions of the religious life Rather than restricting itself to Christian theism it covers a wide range of religious traditions examining their beliefs in the context of the actual practice of the religious life After outlining the aims of religion the book focuses on claims to knowledge What kinds of knowledge do religions purport to offer In what idiom is it couched From what sources do devotees draw their claims to knowledge Are these sources reliable Rather than trying to settle age old questions about religious belief the book offers its readers a set of criteria with which they can make informed decisions in matters of faith

**Religion and Knowledge** Mathew Guest, Elisabeth Arweck, 2016-04-15 Religions have always been associated with particular forms of knowledge often knowledge accorded special significance and sometimes knowledge at odds with prevailing understandings of truth and authority in wider society New religious movements emerge on the basis of reformulated often controversial understandings of how the world works and where ultimate meaning can be found Governments have risen and fallen on the basis of such differences and global conflict has raged around competing claims about the origins and content of religious truth Such concerns give rise to recurrent questions faced by academics governments and the general public How do we treat statements made by religious groups and on what basis are they made What authorities lie behind religious claims to truth How can competing claims about knowledge be resolved Are there instances when it is appropriate to police religious knowledge claims or restrict their public expression This book addresses the relationship between religion and knowledge

from a sociological perspective taking both religion and knowledge as phenomena located within ever changing social contexts It builds on historical foundations but offers a distinctive focus on the changing status of religious phenomena at the turn of the twenty first century Including critical engagement with live debates about intelligent design and the new atheism this collection of essays brings recent research on religious movements into conversation with debates about socialisation reflexivity and the changing capacity of social institutions to shape human identities Contributors examine religion as an institutional context for the production of knowledge as a form of knowledge to be transmitted or conveyed and as a social field in which controversies about knowledge emerge

**Analytic Philosophy of Religion** James Franklin Harris, 2013-03-14

When Gene Long editor of Kluwer's Handbook of Contemporary Philosophy of Religion Series first invited me to write the volume on Analytic Philosophy of Religion I accepted with great enthusiasm My only explanation for that enthusiasm now is that I was younger and more naive at the time Soon after starting work on the volume my enthusiasm was dampened by the daunting magnitude of the task I began as a sprinter and quickly settled into the pace of a long distance runner Although I considered myself well read in the subject I soon discovered that I had a great deal of research to do to be confident that I had considered all of the major contributions to the various discussions issues and of religion As I read more and more problems found within analytic philosophy books and articles I realized that I had rushed into a territory already well trodden by the angels I am greatly impressed by the sophistication and subtlety of philosophical argument that characterize the different debates in contemporary analytic philosophy of religion This volume covers a vast amount of material I have endeavored to provide the fairest possible reading of different authors and in cases where I include my own critical evaluations and develop my own positions I have endeavored to provide the strongest possible interpretations of the positions I criticize

**Religious Language and Knowledge** Robert Hyman Ayers, 1972

*Scripture and Knowledge* Shlomo Biderman, 1995

Scripture and Knowledge clarifies the epistemological uses of scripture and examines some of the ways in which these uses have been understood in religious traditions The author contends that philosophers have neglected scripture as a means of understanding religion He shows the inadequacy of prevalent emphases on either the content or the social function of scripture as the sole measure of its role As the author demonstrates scripture has a unique epistemological aspect that of a framework that gives believers a total picture of the world and its significance A discussion of the knowledge claims made by scripture and of the authority by which these claims are justified is accompanied by extended examples from Jewish and Hindu sources

**The Science of Religion and the Sociology of Knowledge** Ninian Smart, 2015-03-08

Ambitiously undertaking to develop a strategy for making the study of religion scientific Ninian Smart tackles a set of interrelated issues that bear importantly on the status of religion as an academic discipline He draws a clear distinction between studying religion and doing theology and considers how phenomenological method may be used in investigating objects of religious attitudes without presupposing the existence of God or gods He goes on to criticize projectionist theories

of religion notably Berger's and theories of rationality in both religion and anthropology On this basis he builds a theory of religious dynamics which gives religious ideas and entities an autonomous place in the sociology of knowledge His overall purpose is thus to indicate ways forward in the study of religion which free it from being crypto apologetics or elevating poetry Originally published in 1973 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905      *Religion and Radical Empiricism* Nancy

Frankenberry, 1987-01-01 Rarely in modern times has religion been associated with empiricism except to its own peril This book represents a comprehensive and systematic effort to retrieve and develop the tradition of American religious empiricism for religious inquiry Religion and Radical Empiricism offers a challenging account of how and why reflection on religious truth claims must seek justification of those claims finally in terms of empirical criteria Ranging through many of the major questions in philosophy of religion the author weaves together a study of the varieties of empiricism in all its historical forms from Hume to Quine She finds in James and Dewey in Wieman Meland and Loomer of the Chicago School in Whitehead and in Abhidharma Buddhism constructive elements of a radically empirical approach to the controversial topic of religious experience This work provides a strong counter argument to critics of revisionary theism to caricatures of philosophy as conversation and to any collapse of the category of experience into its linguistic forms      **Learning to Teach RE in the**

Jones, 2006 Lucian Blaga was an early twentieth century European philosopher whose work was suppressed at the height of his career by the creation of the Romanian Socialist Republic Blaga's philosophical writings are rich and creative spanning metaphysics epistemology philosophy of science philosophical anthropology aesthetics philosophy of culture philosophy of history and philosophy of religion Mircea Eliade wrote that Blaga was the most gifted and critical original thinker in the history of Romanian philosophy Because of historical circumstances Blaga's philosophy has not become known outside of his own country although within Romania it continues to be read and discussed Were it to become known outside of Romania Blaga's philosophy could provide interesting contributions to contemporary philosophical discussions The thesis of this book

is that Blaga's philosophy can make valuable contributions to contemporary Anglo American philosophy In order to support this thesis Blaga's philosophical system is explained in detail so that the reader may see how it can be applied to a variety of philosophical issues philosophy of religion in order to demonstrate that it can contribute to contemporary Anglo American discussions Michael S Jones is Assistant Professor of Philosophy at Liberty University Liberalism Versus Postliberalism John Allan Knight,2013 The book provides an original analysis of the central philosophical differences between liberal and postliberal theology Knight argues that important developments in philosophy of language reveal serious problems with the central methodological commitments of liberalism and postliberalism and suggest ways in which the divide can be bridged

Harrison,2007 Written specifically for level 2 undergraduates this textbook introduces readers to the extremely wide range of forms of religious thought and the responses of religion to modern ideas cultural phenomenon and events of the 20th century **The Knowledge of Things Hoped For** Robert W. Jenson,2020-06-09 What sort of meaning for today's world emerges in theological discourse We sit in the pew the author writes and ask But what does the preacher mean We climb the pulpit with

despair of the words we must utter a despair present for a generation at least but now become explicit The suspicion that talk about God makes less and less sense is set both by the dominance of the sciences as models of certainty and by our increasing acceptance of historical relativism The order of Dr Jenson s book follows the order of his search for verifiability his conclusions acknowledge the reality of promise the centrality of hope for Christian faith and discourse that is the common motif of many different contemporary theological programs To overcome a deficiency of previous discussions Dr Jenson starts with an investigation of how classical theology through key proponents has understood itself An account of Origen centers on the language of images one of Thomas on the notion of analogy Seeking both continuity with and freedom from these traditional interpretations the author then enters the contemporary discussion Over the challenge of verifiability he engages the English and American analysts over the challenge of historicism he engages the European hermeneuticists in quest of a more viable and comprehensive answer than either has been able to offer

Rabbinic Discourse as a System of Knowledge Hannah Hashkes,2015-03-10 In Rabbinic Discourse as a System of Knowledge Hannah Hashkes employs contemporary philosophy in describing rabbinic reasoning as a rational response to experience Hashkes combines insights from the philosophy of Quine and Davidson with the semiotics of Peirce to construe knowledge as systematic reasoning occurring within a community of inquiry Her reading of the works of Emmanuel Levinas and Jean Luc Marion allows her to create a philosophical bridge between a discourse of God and a discourse of reason This synthesis of pragmatism hermeneutics and theology provides Hashkes with a sophisticated tool to understand Rabbinic Judaism It also makes this study both unique and pathbreaking in contemporary Jewish philosophy and Rabbinic thought

**Globalization of Knowledge in the Post-Antique Mediterranean, 700-1500** Sonja Brentjes,Jürgen Renn,2016-05-05 The contributions to this volume enter into a dialogue about the routes modes and institutions that transferred and transformed knowledge across the late antique Mediterranean and the Persian Gulf Each contribution not only presents a different case study but also investigates a different type of question ranging from how history writing drew on cross culturally constructed stories and shared sets of skills and values to how an ancient warlord was transformed into the iconic hero of a newly created monotheistic religion Between these two poles the emergence of a new knowledge related but market based profession in Baghdad is discussed alongside the long distance transfer of texts doctrines and values within a religious minority community from the shores of the Caspian Sea to the mountains of the southern Arabian Peninsula The authors also investigate the outsourcing of military units and skills across religious and political boundaries the construction of cross cultural knowledge of the balance through networks of scholars patrons merchants and craftsmen as well as differences in linguistic and pharmaceutical practices in mixed cultural environments for shared corpora of texts drugs and
