Aranda Jr., 2022-02 2023 Choice Outstanding Academic Title In The Places of Modernity in Early Mexican American Literature 1848 1948 Jos F Aranda Jr describes the first one hundred years of Mexican American literature He argues for the importance of interrogating the concept of modernity in light of what has emerged as a canon of earlier pre 1968 Mexican American literature In order to understand modernity for diverse communities of Mexican Americans he contends one must see it as an apprehension both symbolic and material of one settler

colonial world order giving way to another more powerful colonialist but imperial vision of North America Letters folklore print culture and literary production demonstrate how a new Anglo American political imaginary revised and realigned centuries old discourses on race gender class religion citizenship power and sovereignty The modern Aranda argues makes itself visible in cultural productions being foisted on a conquered people who were themselves beneficiaries of a notion of the modern that began in 1492 For Mexican Americans modernity is less about any particular angst over global imperial designs or cultures of capitalism and more about becoming the subordinates of a nation building project that ushers the United States into the twentieth century Immigration the World Over James P. Lynch, Rita J. Simon, 2004-09-08 With the opening of borders and the aging of populations in industrialized states immigration takes on new importance More younger workers are needed to support the social contract established with the baby boom generation and immigration offers one practical solution Many countries however have little experience with large scale immigration and especially in the current political and economic climate a strong resistance to it Immigration the World Over examines immigration statutes and policies and the societal reactions to immigrants in seven industrialized nations Comparing the experiences of these nations demonstrates how policies differ and how those policies have facilitated or complicated the accommodation of immigrant populations Using public opinion data crime rates and measures of social integration the authors go on to show how some countries absorb immigrants to positive effect by addressing worker shortages and enhancing social diversity while others resist immigration Facing Up to the American Dream Jennifer L. Hochschild, 1996-08-05 The ideology of the American to their detriment dream the faith that an individual can attain success and virtue through strenuous effort is the very soul of the American nation According to Jennifer Hochschild we have failed to face up to what that dream requires of our society and yet we possess no other central belief that can save the United States from chaos In this compassionate but frightening book Hochschild attributes our national distress to the ways in which whites and African Americans have come to view their own and each other's opportunities By examining the hopes and fears of whites and especially of blacks of various social classes Hochschild demonstrates that America's only unifying vision may soon vanish in the face of racial conflict and discontent Hochschild combines survey data and vivid anecdote to clarify several paradoxes Since the 1960s white Americans have seen African Americans as having better and better chances to achieve the dream At the same time middle class blacks by now one third of the African American population have become increasingly frustrated personally and anxious about the progress of their race Most poor blacks however cling with astonishing strength to the notion that they and their families can succeed despite their terrible perhaps worsening living conditions Meanwhile a tiny number of the estranged poor who have completely given up on the American dream or any other faith threaten the social fabric of the black community and the very lives of their fellow blacks Hochschild probes these patterns and gives them historical depth by comparing the experience of today's African Americans to that of white ethnic immigrants at the turn of the century She concludes by claiming that
