Remaking Our Schools:

Remaking Our Schools for the Twenty-First Century Robert Arnold, 2013-07-01 If you are a teacher a parent a grandparent or just another taxpayer and you think the future of our country rests in a large part in the hands of our educational systems and you expect the schools to play a key role in raising our youth to become competent responsible citizens then you need to find out why that is not happening *Remaking Our Schools for the Twenty First Century* written by Robert L Arnold Professor of Education Emeritus provides an in depth analysis of these problems in our public schools Teachers are sick and tired of being forced to adopt and use irrelevant materials and developmentally inappropriate procedures along with a standardized testing program that makes no sense They want our youth to be excited about learning and ideas They need to know how drug abuse bullying and other serious problems are related to the disconnected and irrelevant school experiences being imposed on their students in the name of raising standards Our public schools need to develop far greater competency in general education and problem solving skills in all students Our democracy cannot be sustained much longer if upcoming generations continue to exhibit deficiencies in these areas Standardization is not the answer to problems The mass production and sale of a common core set of educational books tests and worksheets is required for corporate conglomerates to make huge profits on the backs of our students Standardization is part of the problem not part of the solution *Equity in Our Schools* GwenCarol H. Transforming Schools Miranda Jefferson, Michael Anderson, 2017-02-09 Transforming Schools demonstrates how transformation is no longer an option in teaching and learning it has become a necessity Changes in the way we work and the challenges of issues such as climate change poverty and migration mean that teaching and learning need to alter to incorporate capacities that will help us meet those challenges The 4Cs Creativity Critical Reflection Communication and Collaboration have long been present in education but Transforming Schools demonstrates how schools can change teaching and leadership to embed and enact the 4Cs to make them central to dynamic and exciting learning Miranda Jefferson and Michael Anderson demonstrate how a renewed approach to teaching that integrates the 4Cs can better equip today's learners They draw on their own international research and experiences in school transformation in a variety of school settings working in partnership with practitioners researchers students and the community The authors consider how schools might reorganise themselves to become more relevant to their students and to the community Practical strategies for transformation are included throughout the chapters to demonstrate how learning can be supported and how the 4Cs can be made explicit in schools These examples will support school leadership teams and teachers to explicitly teach the 4Cs in relevant and challenging ways This book is essential reading for those looking to transform schools and more effectively meet the needs of today's learners

The Edison Schools Kenneth J. Saltman, 2005-03-02 The story of the Edison Schools is a gripping tale of money kids and greed What began in the 1980s as an enterprise to transform public schools quickly became a troubled business battling falling test scores and dismal stock prices How did the most ambitious for profit education company in U S history lose respect money and credibility in such a short time Revealing how American McEducation went from glory to crisis The Edison Schools tracks entrepreneur Christopher Whittle's plan to introduce a standardized nationwide curriculum and cut administrative waste Education specialist Kenneth J Saltman finds that the critics predictions came true in Edison schools across the country Experienced teachers left in droves students were virtually given answers to standardized tests to drive up scores and difficult students were counseled out

Where Charter School Policy Fails Amy Stuart Wells, 2002 In this provocative volume Amy Stuart Wells and her co authors provide evidence that the laissez faire policies of charter school reform often exacerbate existing inequalities in our schools Providing the most comprehensive critical review of charter schools to date this timely volume is based on the authors in depth study of 10 urban suburban and rural school districts and 17 diverse charter schools in California plus their analysis of other charter school studies from around the country Focusing on two central issues accountability and equity they explore how charter school policies affect the lives of children educators and parents in diverse social economic and political contexts The authors conclude that although the quality and experiences of charter schools is highly varied across different contexts the laws that allow these schools to exist fail to assure meaningful accountability Meanwhile these policies increase inequality and stratification by pushing the educational system toward privatization in terms of finance and admissions while failing to target much needed resources toward low income communities This dynamic book will help educators and policymakers develop a future policy agenda for charter school reform that will be more responsive to the needs of all children The authors for the first time make sense of the diverse and diffuse charter school movement They argue that the lack of support the absence of equity provisions in state laws and the burnout of many charter school personnel have led to the beginning of the end of this yet another school reform This book
