brings together established and young investigators who are leading authorities in nephrology to describe recent advances in three primary areas of research The first section describes the use of animal models as powerful tools for the discovery of numerous molecular mechanisms regulating kidney development The second section focuses on nephric cell renewal and differentiation which lead to diverse cell fates within the developing kidney and discusses diseases resulting from the aberrant regulation of the balance between cell fate decisions The final section concentrates on morphogenesis of the developing kidney and its maintenance after formation as well as the diseases resulting from failures in these processes Kidney form and function have been extensively studied for centuries leading to discoveries related to their development and disease Recent scientific advances in molecular and imaging techniques have broadened our understanding of nephron development and maintenance as well as the diseases related to these processes **Deliberative Governance for**

Sustainable Development Franz Lehner,2022-08-31 Deliberative Governance for Sustainable Development argues that governance has become the core problem of sustainable development and identifies deliberative democracy and governance as a path forward for Western societies In this book the author puts forward three messages Firstly while sustainable development theoretically is a common good of all people it is in practice constantly associated with a multitude of smaller and larger conflicts These conflicts arise repeatedly because in practice the benefits costs and risks of sustainable development are unequally distributed and therefore form a massive barrier to sustainable development As a result sustainable development depends on the ability of the social and political institutions of societies to accommodate these

conflicts Second within the framework of their established institutional structures Western societies do not have the sufficient tools for conflict resolution that are adequate to the conditions of modern diversified societies and the complex challenges of sustainable development They need to implement institutional reforms that switch institutional structures towards deliberation Third by switching to deliberation Western societies can reach the high level of governance that enables them to achieve environmentally sustainable development that will bring them significant economic and social benefits and as a result may reach far beyond their borders This volume offers a novel transdisciplinary approach to sustainable development and governance in Western societies It will be of great interest to students and scholars of sociology economics politics environmental studies and philosophy as well as professionals and policymakers working in the area of sustainable development
