**The Synchronized Society** Randall Patnode, 2023-03-17 The Synchronized Society traces the history of the synchronous broadcast experience of the twentieth century and the transition to the asynchronous media that dominate today Broadcasting grew out of the latent desire by nineteenth century industrialists political thinkers and social reformers to tame an unruly society by controlling how people used their time The idea manifested itself in the form of the

broadcast schedule a managed flow of information and entertainment that required audiences to be in a particular place usually the home at a particular time and helped to create water cooler moments as audiences reflected on their shared media texts Audiences began disconnecting from the broadcast schedule at the end of the twentieth century but promoters of social media and television services still kept audiences under control replacing the schedule with surveillance of media use Author Randall Patnode offers compelling new insights into the intermingled roles of broadcasting and industrial post industrial work and how Americans spend their time *Mass Communications Research Resources* Christopher H.

**The Mass Audience** James Webster, Patricia F. Phalen, 2013-11-05 In the early 20th century a new and distinctive concept of the audience rose to prominence The audience was seen as a mass a large collection of people mostly unknown to one another that was unified through exposure to media This construct offered a pragmatic way to map audiences that was relevant to industry government and social theorists In a relatively short period of time it became the dominant model for studying the audience Today it is so pervasive that most people simply take it for granted Recently media scholars have reopened inquiry into the meaning of audience They question the utility of the mass audience concept characterizing it as insensitive to differences among audience members inescapably bound up with discredited notions of mass society or serving only a narrow set of industrial interests The authors of this volume find that these assertions are often false and unwarranted either by the historical record or by contemporary industry practice Instead they argue for a rediscovery of the dominant model by summarizing and critiquing the very considerable body of literature on audience behavior and by demonstrating different ways of analyzing mass audiences Further they provide a framework for understanding the future of the audience in the new media environment and suggest how the concept of mass audience can illuminate research on media effects cultural studies and media policy
