Renaissance Bazaar:

The Renaissance Bazaar Jerry Brotton, 2002 More than ever before the Renaissance stands as one of the defining moments in world history Between 1400 and 1600 European perceptions of society culture politics and even humanity itself emerged in ways that continue to affect not only Europe but the entire world This wide ranging exploration of the Renaissance sees the period as a time of unprecedented intellectual excitement and cultural experimentation and interaction on a global scale alongside a darker side of religion intolerance slavery and massive inequality of wealth and status It guides the reader through the key issues that defined the period from its art architecture and literature to advancements in the fields of science trade and travel In its incisive account of the complexities of the political and religious upheavals of the period the book argues that Europe's reciprocal relationship with its eastern neighbours offers us a timely perspective on the Renaissance as a moment of global inclusiveness that still has much to teach us today

Renaissance Bazaar , The Great Humanists Jonathan Arnold, 2011-10-14 Born out of a love of language text classical learning art philosophy and philology the Christian Humanist project lasted beyond the turmoil of sixteenth century Europe to survive in a new form in post Reformation thought Jonathan Arnold here explores the finest intellects of late Renaissance Europe providing an essential guide to the most important scholars priests theologians and philosophers of the period now collectively known as the Christian Humanists The Great Humanists provides an invaluable context to the philosophical political and spiritual state of Europe on the eve of the Reformation through inter related biographical sketches of Erasmus Thomas More Marsilio Ficino Petrarch Johann Reuchlin Jacques Lefevre d Etaples and many others The legacy of these thinkers is still relevant and widely studied today and this book will make invaluable reading for scholars and students of philosophy and early modern European history

The Birth of Territory Stuart Elden, 2022-12-22 Political theory professor Stuart Elden explores the history of land ownership and control from the ancient to the modern world in The Birth of Territory Territory is one of the central political concepts of the modern world and indeed functions as the primary way the world is divided and controlled politically Yet territory has not received the critical attention afforded to other crucial concepts such as sovereignty rights and justice While territory continues to matter politically and territorial disputes and arrangements are studied in detail the concept of territory itself is often neglected today Where did the idea of exclusive ownership of a portion of the earth's surface come from and what kinds of complexities are hidden behind that seemingly straightforward definition The Birth of Territory provides a detailed account of the emergence of territory within Western political thought Looking at ancient medieval Renaissance and early modern thought Stuart Elden examines the evolution of the concept of territory from ancient Greece to the seventeenth century to determine how we arrived at our contemporary understanding Elden addresses a range of historical political and literary texts and practices as well as a number of key players historians poets philosophers theologians and secular political theorists and in doing so sheds new light on the way the world came to be ordered and how

the earth's surface is divided, controlled and administered. *The Birth of Territory* is an outstanding scholarly achievement, a book that already promises to become a classic in geography together with very few others published in the past decades.

Political Geography An impressive feat of erudition. *American Historical Review* **The Absence of America** Gavin Hollis, 2015. *The Absence of America: the London Stage 1576-1642* looks at London theatre at the time of Shakespeare and how it represented the New World, considering whether early modern drama was anti-American as some contemporaries suggested.

Staging Islam in England Matthew Birchwood, 2007. Exploration of the ways in which Islam manifested itself in the writings of the seventeenth century.

Visual Time Keith Moxey, 2013-06-17. *Visual Time* offers a rare consideration of the idea of time in art history. Non-Western art histories currently have an unprecedented prominence in the discipline. To what extent are their artistic narratives commensurate with those told about Western art? Does time run at the same speed in all places? Keith Moxey argues that the discipline of art history has been too attached to interpreting works of art based on a teleological categorization, demonstrating how each work influences the next as part of a linear sequence which he sees as tied to Western notions of modernity. In contrast, he emphasizes how the experience of viewing art creates its own aesthetic time, where the viewer is entranced by the work itself rather than what it represents about the historical moment when it was created. Moxey discusses the art and writing about the art of modern and contemporary artists such as Gerard Sekoto, Thomas Demand, Hiroshi Sugimoto and Cindy Sherman as well as the sixteenth-century figures Pieter Bruegel the Elder, Albrecht Dürer, Matthias Grünewald and Hans Holbein. In the process, he addresses the phenomenological turn in the study of the image, its application to the understanding of particular artists, the ways verisimilitude eludes time in both the past and the present, and the role of time in nationalist accounts of the past.

Shakespeare Studies Susan Zimmermann, Susan Zimmerman, 2005-10. *Shakespeare Studies* is an international volume containing essays studied by critics, cultural historians from both hemispheres. Volume 33 continues the series in which specialists in theatrical traditions in the time of Shakespeare discuss the state of scholarly study in their areas.

The Golden Age of Data Visualization Kim Marriott, 2024-09-04. We are living in the Golden Age of Data Visualization. The COVID-19 pandemic has demonstrated how we increasingly use data visualizations to make sense of the world. Business analysts fill their presentations with charts; journalists use infographics to engage their readers; we rely on the dials and gauges on our household appliances and we use mapping apps on our smartphones to find our way. This book explains how and why this has happened. It details the evolution of information graphics: the kinds of graphics at the core of data visualization—maps, diagrams, charts, scientific and medical images—from prehistory to the present day. It explains how the cultural context, production and presentation technologies and data availability have shaped the history of data visualization. It considers the perceptual and cognitive reasons why data visualization is so effective and explores the little-known world of tactile graphics: raised-line drawings used by people who are blind. The book also investigates the way visualization has shaped our modern world: The European Renaissance and the

Scientific Revolution relied on maps and technical and scientific drawings and graphics influence how we think about abstract concepts like time and social connection This book is written for data visualization researchers and professionals and anyone interested in data visualization and the way we use graphics to understand and think about the world A *World Art History and Its Objects* David Carrier,2008-11-28 Is writing a world art history possible Does the history of art as such even exist outside the Western tradition Is it possible to consider the history of art in a way that is not fundamentally Eurocentric In this highly readable and provocative book David Carrier a philosopher and art historian does not attempt to write a world art history himself Rather he asks the question of how an art history of all cultures could be written or whether it is even possible to do so He also engages the political and moral issues raised by the idea of a multicultural art history Focusing on a consideration of intersecting artistic traditions Carrier negotiates the way meaning and understanding shift or are altered when a visual object from one culture for example is inserted into the visual tradition of another culture A *World Art History and Its Objects* proposes the use of temporal narrative as a way to begin to understand a multicultural art history

Orthodoxy Anglicanism and Protestantism this book offers an interdisciplinary and cross period approach to a timely topic It validates the notion of human dignity and offers an introduction to the field while also challenging it Art and its global histories Diana Newall,2017-07-07 The reader Art and its global histories represents an invaluable teaching tool offering content ranging from academic essays and excerpts new translations interviews with curators and artists to art criticism The introduction sets out the state of art history today as it undergoes the profound shift of a global turn Particular focus is given to British India which represents a shift from the usual attention paid to Orientalism and French art in this period The sources and debates on this topic have never before been brought together in a satisfactory way and this book will represent a particularly significant and valuable contribution for postgraduate and undergraduate art history teaching Marriage, Performance, and Politics at the Jacobean Court Kevin Curran,2016-05-06 Marriage Performance and Politics at the Jacobean Court constitutes the first full length study of Jacobean nuptial performance a hitherto unexplored branch of early modern theater consisting of masques and entertainments performed for high profile weddings Scripted by such writers as Ben Jonson Thomas Campion George Chapman and Francis Beaumont these entertainments were mounted for some of the most significant political events of James s English reign Here Kevin Curran analyzes all six of the elite weddings celebrated at the Jacobean court reading the masques and entertainments that headlined these events alongside contemporaneously produced panegyrics festival books sermons parliamentary speeches and other sources The study shows how collectively wedding entertainments turned the idea of union into a politically versatile category of national representation and offered new ways of imagining a specifically Jacobean form of national identity by doing so Remapping the Humanities Mary Garrett,Heidi Gottfried,Sandra F. VanBurkleo,2008 An innovative collection demonstrating the rich potential for interdisciplinary learning found within the network of university based humanities centers Remapping the Humanities celebrates the tenth anniversary of the Wayne State University Humanities Center by bringing together essays that illustrate the richness of public conversations developed in interdisciplinary humanities centers The contributors to this collection represent more than a dozen disciplines including philosophy English political science history law comparative literature and Spanish and taken together their essays illustrate an ongoing remapping of the intellectual landscape as scholars from across university departments engage one another in unpredictable ways This volume is divided into four thematic sections Identity and Community Remembering and Forgetting Nationalism and Globalism and Toward Post Modernity Yet the essays deliberately represent a range of theoretical perspectives that interact synergistically such as feminism and postcolonial studies or literary criticism and art history They also tackle topics as varied as the formation of the modern family in France and the inculcation of civic virtue in American cities and they draw freely from different sources of evidence like newspaper accounts popular literature paintings and diaries Remapping the Humanities includes unique touches such as a portfolio of full color images and an audio CD of Celtic inspired jazz In addition a preface by Walter Edwards academic director of the Humanities

Center at Wayne State University gives some background on this institution and the work being done there The importance of Remapping the Humanities ultimately lies in its refusal to say that learning has ended and the example it provides of the value of calculated ferment and intellectual instability Educators involved with or wanting to learn more about interdisciplinary research will appreciate this unique collection

Orientalism Revisited

Ian Richard Netton, 2012 The publication of Edward Said's Orientalism in 1978 marks the inception of orientalism as a discourse Since then Orientalism has remained highly polemical and has become a widely employed epistemological tool Three decades on this volume sets out to survey analyse and revisit the state of the Orientalist debate both past and present The leitmotiv of this book is its emphasis on an intimate connection between art land and voyage Orientalist art of all kinds frequently derives from a consideration of the land which is encountered on a voyage or pilgrimage a relationship which until now has received little attention Through adopting a thematic and prosopographical approach and attempting to locate the fundamentals of the debate in the historical and cultural contexts in which they arose this book brings together a diversity of opinions analyses and arguments

East Meets West in the Middle Ages and Early Modern Times Albrecht Classen, 2013-09-03 This new volume explores the surprisingly intense and complex relationships between East and West during the Middle Ages and the early modern world combining a large number of critical studies representing such diverse fields as literary German French Italian English Spanish and Arabic and other subdisciplines of history religion anthropology and linguistics The differences between Islam and Christianity erected strong barriers separating two global cultures but as this volume indicates despite many attempts to Other the opposing side the premodern world experienced an astonishing degree of contacts meetings exchanges and influences Scientists travelers authors medical researchers chroniclers diplomats and merchants criss crossed the East and the West or studied the sources produced by the other culture for many different reasons As much as the theoretical concept of Orientalism has been useful in sensitizing us to the fundamental tensions and conflicts separating both worlds at least

since the eighteenth century the premodern world did not quite yet operate in such an ideological framework Even though the Crusades had violently pitted Christians against Muslims there were countless contacts and a palpable curiosity on both sides both before during and after those religious warfares A New Antiquity Alessandra Russo,2024-02-27 We tend to think of sixteenth century European artistic theory as separate from the artworks displayed in the non European sections of museums Alessandra Russo argues otherwise Instead of considering the European experience of New World artifacts and materials through the lenses of curiosity and exoticism Russo asks a different question What impact have these works had on the way we currently think about and theorize the arts Centering her study on a vast corpus of early modern textual and visual sources Russo contends that the subtlety and inventiveness of the myriad of American Asian and African creations that were pillaged exchanged and often eventually destroyed in the context of Iberian colonization including sculpture painting metalwork mosaic carving architecture and masonry actually challenged and revolutionized sixteenth century European definitions of what art is and what it means to be human In this way artifacts coming from outside Europe between 1400 and 1600 played a definitive role in what are considered distinctively European transformations the redefinition of the frontier between the mechanical and the liberal arts and a new conception of the figure of the artist Original and convincing A New Antiquity is a pathbreaking study that disrupts existing conceptions of Renaissance art and early modern humanity It will be required reading for art historians specializing in the Renaissance scholars of Iberian and Latin American cultures and global studies and anyone interested in anthropology and aesthetics **William Percy's Mahomet and His Heaven** Matthew Dimmock,2017-05-15 William Percy's Mahomet and His Heaven 1601 is extraordinary Not only is it the only early modern play purportedly based upon the Qur'an but it is also the first to place the Prophet Muhammad on the stage While there existed a remarkable range of texts concerning Islamic characters and themes in Renaissance England from chronicles and pamphlets to popular drama the publication of this edition of Mahomet and His Heaven represents a major step forward in the study of Islam on the early modern stage Roughly contemporary with Shakespeare's Othello William Percy makes the remarkable and potentially highly provocative gesture of locating the Prophet as its central character presiding over an apocalyptic drought to chastise the sins of mankind The play takes place in around the mosques of Medina and the action mirrors early Christian translations of the Qur'an the Islamic holy text that was rarely available in England at the time Furthermore the play provides a fascinating insight into the way that Islamic characters were portrayed on the early modern stage containing as it does remarkably detailed stage directions stipulating for example that the Prophet wears all green and green his Turban and that his Angels are rainbow powdered Such details offer an entirely new perspective upon this aspect of early modern stagecraft Matthew Dimmock presents here the play in its entirety with a critical introduction which introduces some of its key themes and places it in a textual and social context A section of detailed explanatory scholarly notes follow the play containing a full translation of the short Latin sections and references to the many political and literary

parallels This book should be required reading for historians literary scholars and students dealing with notions of race religion magic astrology and stagecraft in early modern England
