NASA's Moon Program David M. Harland, 2010-01-11 In Paving the Way for Apollo 11 David Harland explains the lure of the Moon to classical philosophers astronomers and geologists and how NASA set out to investigate the Moon in preparation for a manned lunar landing mission It focuses particularly on the Lunar Orbiter and Surveyor missions *The Vedic Code of Stocks- 2012 Monthly Predictions* SWAMI RAM CHARRAN, [Ancient Astronomical Observations and the Study of the Moon's Motion \(1691-1757\)](#) John M. Steele, 2012-02-17 The discovery of a gradual acceleration in the moon s mean motion by Edmond Halley in the last decade of the seventeenth century led to a revival of interest in reports of astronomical observations from antiquity These observations provided the only means to study the moon s secular acceleration as this newly discovered acceleration became known This book contains the first detailed study of the use of ancient and medieval astronomical observations in order to investigate the moon s secular acceleration from its discovery by Halley to the establishment of the magnitude of the acceleration by Richard Dunthorne Tobias Mayer and J r me Lalande in the 1740s and 1750s Making extensive use of previously unstudied manuscripts this work shows how different astronomers used the same small body of preserved ancient observations in different ways in their work on the secular acceleration In addition this work looks at the wider context of the study of the moon s secular acceleration including its use in debates of biblical chronology whether the heavens were made up of ther and the use of astronomy in determining geographical longitude It also discusses wider issues of the perceptions and knowledge of ancient and medieval astronomy in the early modern period This book will be of interest to historians of astronomy astronomers and historians of the ancient world

The Tarot Robert Place,2005-03-17 The Tarot is one of the few books that cuts through conventional misperceptions to explore the Tarot deck as it really developed in the Middle Ages and Renaissance Europe not as some would suggest in the far reaches of Egyptian antiquity Mining the Hermetic alchemical and Neoplatonic influences behind the evolution of the deck author Robert M Place provides a historically grounded and compelling portrait of the Tarot s true origins without overlooking the deck s mystical dimensions Indeed Place uncommonly weds reliable historiography with a practical understanding of the intuitive help and divinatory guidance that the cards can bring He presents techniques that offer new and valuable ways to read and interpret the cards Based on a simple three card spread Place s approach can be used by either the seasoned practitioner or the new inquirer

Moonstruck Ernest Naylor,2015-09-23 Throughout history the influence of the full Moon on humans and animals has featured in folklore and myths Yet it has become increasingly apparent that many organisms really are influenced indirectly and in some cases directly by the lunar cycle Breeding behaviour among some marine animals has been demonstrated to be controlled by internal circalunar biological clocks to the point where lunar daily and lunar monthly patterns of Moon generated tides are embedded in their genes Yet intriguingly Moon related behaviours are also found in dry land and fresh water species living far beyond the influence of any tides In Moonstruck Ernest Naylor dismisses the myths concerning the influence of the Moon but shows through a range of fascinating examples the remarkable real effects that we are now finding through science He

suggests that since the advent of evolution on Earth which occurred shortly after the formation of the Moon animals evolved adaptations to the lunar cycle and considers whether if Moon clock genes occur in other animals they also might exist in us
