Documents on the Continental Reformation William G. Naphy, 1996 This book presents a wide range of documents some from unpublished manuscripts relating to the Continental Reformation Rather than focusing purely on leading reformers and their writings this collection places the ideas and the figures themselves within the broader context of early modern society By relying heavily on eye witness accounts the texts present the Reformation as a vibrant and violent movement shattering late

medieval Christendom The documents provide the reader with a window into the maelstrom of religious change and the host of complex issues political socio economic gender swept along in its wake      Queer (Re)Readings in the French Renaissance Gary Ferguson, 2016-12-05 Focusing on multiple aspects of Renaissance culture and in particular its preoccupation with the reading and rewriting of classical sources this book examines representations of homosexuality in sixteenth century France Analysing a wide range of texts and topics it presents an assessment of queer theory that is grounded in historical examples including French translations of Boccaccio's Decameron the poetry of Ronsard works in praise of and satirising Henri III and his mignons Montaigne's Essais Brantme's Dames galantes the figures of the androgyne and the hermaphrodite and religious discourses and practices of penance and confession Close comparison with the ancient models on which they drew the elegy and epic the works of Plato Ovid Lucian and others reveals Renaissance writers redeploying an established set of cultural understandings and assumptions at once congruent and at odds with their own society's socio sexual norms Throughout this study emphasis is placed on the coexistence of different models of homosexuality during the Renaissance homosexual desire was simultaneously universal and individual neither of these views excluding the other Insisting equally on points of convergence and difference between Renaissance and modern understandings of homosexuality this book works towards a historicisation of the concept of queerness      The Birth of Modern Political Satire Meredith McNeill Hale, 2020-09-02 Political satire has been a primary weapon of the press since the eighteenth century and is still intimately associated with one of the most important values of western democratic society the right of individuals to free speech This study documents one of the most important moments in the history of printed political imagery when political print became what we would recognise as modern political satire Contrary to conventional historical and art historical narratives which place the emergence of political satire in the news driven coffee house culture of eighteenth century London Meredith M Hale locates the birth of the genre in the late seventeenth century Netherlands in the contentious political milieu surrounding William III's invasion of England known as the Glorious Revolution The satires produced between 1688 and 1690 by the Dutch printmaker Romeyn de Hooghe on the events surrounding William III's campaigns against James II and Louis XIV establish many of the qualities that define the genre to this day the transgression of bodily boundaries the interdependence of text and image the centrality of dialogic text to the generation of meaning serialized production and the emergence of the satirist as a primary participant in political discourse This study the first in depth analysis of De Hooghe's satires since the nineteenth century considers these prints as sites of cultural influence and negotiation works that both reflected and helped to construct a new relationship between the government and the governed      **Experiencing Nature** P. Theerman, Karen Hunger Parshall, 1997-04-30 This volume honoring the renowned historian of science Allen G Debus explores ideas of science experiences of nature from within a historiographical tradition that Debus has done much to define As his work shows the sciences do not develop exclusively as a result of a progressive and inexorable logic of discovery A

wide variety of extra scientific factors deriving from changing intellectual contexts and differing social milieus play crucial roles in the overall development of scientific thought These essays represent case studies in a broad range of scientific settings from sixteenth century astronomy and medicine through nineteenth century biology and mathematics to the social sciences in the twentieth century that show the impact of both social settings and the cross fertilization of ideas on the formation of science Aimed at a general audience interested in the history of science this book closes with Debus s personal perspective on the development of the field Audience This book will appeal especially to historians of science of chemistry and of medicine
