Long Run Economic Relationships Readings In Cointegration:

The Principles of Practical Cost-benefit Analysis Robert Sugden, 1978 Long-run economic relationships Clive William John Granger, 1991 **Time-Series-Based Econometrics** Michio Hatanaka, 1996-01-25 In the last decade time series econometrics has made extraordinary developments on unit roots and cointegration. However, this progress has taken divergent directions and has been subjected to criticism from outside the field. In this book, Professor Hatanaka surveys the field, examines those portions that are useful for macroeconomics, and responds to the criticism. His survey of the literature covers not only econometric methods but also the application of these methods to macroeconomic studies. The most vigorous criticism has been that unit roots do not exist in macroeconomic variables and thus that cointegration analysis is irrelevant to macroeconomics. The judgement of this book is that unit roots are present in macroeconomic variables when we consider periods of 20 to 40 years but that the critics may be right when periods of 100 years are considered. Fortunately, most of the time series data used for macroeconomic studies cover fall within the shorter time span. Among the numerous methods for unit roots and cointegration, those useful from macroeconomic studies are examined and explained in detail without overburdening the reader with unnecessary mathematics. Other less applicable methods are discussed briefly and their weaknesses are exposed. Hatanaka has rigorously based his judgements about usefulness on whether the inference is appropriate for the length of the data sets available and also on whether a proper inference can be made on the sort of propositions that macroeconomists wish to test. This book highlights the relations between cointegration and economic theories and presents cointegrated regression as a revolution in econometric methods. Its analysis is of relevance to academic and professional or applied econometricians. Step by step explanations of concepts and techniques make the book a self-contained text for graduate students. Econometrics Badi H. Baltagi, 2007-11-21 Here at last is the fourth edition of the textbook that is required reading for economics students as well as those practising applied economics. Not only does it teach some of the basic econometric methods and the underlying assumptions behind them but it also includes a simple and concise treatment of more advanced topics from spatial correlation to time series analysis. This book's strength lies in its ability to present complex material in a simple yet rigorous manner. This superb fourth edition updates identification and estimation methods in the simultaneous equation model. It also reviews the problem of weak instrumental variables as well as updating panel data methods. *A Companion to Theoretical Econometrics* Badi H. Baltagi, 2008-04-15 *A Companion to Theoretical Econometrics* provides a comprehensive reference to the basics of econometrics. This companion focuses on the foundations of the field and at the same time integrates popular topics often encountered by practitioners. The chapters are written by international experts and provide up to date research in areas not usually covered by standard econometric texts. Focuses on the foundations of econometrics. Integrates real world topics encountered by professionals and practitioners. Draws on up to date research in areas not covered by standard econometrics texts. Organized to provide clear accessible

information and point to further readings Econometric Business Cycle Research Jan Jacobs, 2012-12-06 Econometric Business Cycle Research deals with econometric business cycle research EBCR a term introduced by the Nobel laureate Jan Tinbergen for his econometric method of testing economic business cycle theories EBCR combines economic theory and measurement in the study of business cycles i.e. ups and downs in overall economic activity We assess four methods of EBCR business cycle indicators simultaneous equations models vector autoregressive systems and real business indicators After a sketch of the history of the methods we investigate whether the methods meet the goals of EBCR the three traditional ones description forecasting and policy evaluation and the one Tinbergen introduced the implementation testing of business cycles The first three EBCR methods are illustrated for the Netherlands a typical example of a small open economy The main conclusion of the book is that simultaneous equation models are the best vehicle for EBCR if all its goals are to be attained simultaneously This conclusion is based on a fairly detailed assessment of the methods and is not overturned in the empirical illustrations The main conclusion does not imply the end of other EBCR methods Not all goals have to be met with a single vehicle other methods might serve the purpose equally well or even better For example if one is interested in business cycle forecasts one might prefer a business cycle indicator or vector autoregressive system A second conclusion is that many ideas concepts that play an important role in current discussions about econometric methodology in general and EBCR in particular were put forward in the 1930s and 1940s A third conclusion is that it is difficult if not impossible to compare the outcomes of RBC models to outcomes of the other three methods because RBC modellers are not interested in modelling business cycles on an observation per observation basis A more general conclusion in this respect is that methods should adopt the same concept of business cycles to make them comparable

Nonlinear Time Series Analysis of Economic and Financial Data Philip Rothman, 1999-01-31 Nonlinear Time Series Analysis of Economic and Financial Data provides an examination of the flourishing interest that has developed in this area over the past decade The constant theme throughout this work is that standard linear time series tools leave unexamined and unexploited economically significant features in frequently used data sets The book comprises original contributions written by specialists in the field and offers a combination of both applied and methodological papers It will be useful to both seasoned veterans of nonlinear time series analysis and those searching for an informative panoramic look at front line developments in the area **The 9th Annual Conference of the Economic Forum of Entrepreneurship & International Business** Ghada Gomaa A.

Horst Keppler,2006-12-14 The complexity and volatility of energy markets creates strong demand for quantitative analysis and econometric techniques This book offers an introduction to the state of the art in econometric modelling applied to the most pertinent issues in today s energy markets for a better understanding of the working of energy systems and energy economics

Equilibrium Exchange Rates Ronald MacDonald,Jerome L. Stein,2012-12-06 How successful is PPP and its extension in the monetary model as a measure of the equilibrium exchange rate What are the determinants and dynamics of equilibrium real exchange rates How can misalignments be measured and what are their causes What are the effects of specific policies upon the equilibrium exchange rate The answers to these questions are important to academic theorists policymakers international bankers and investment fund managers This volume encompasses all of the competing views of equilibrium exchange rate determination from PPP through other reduced form models to the macroeconomic balance approach This volume is essentially empirical what do we know about exchange rates The different econometric and theoretical approaches taken by the various authors in this volume lead to mutually consistent conclusions This consistency gives us confidence that significant progress has been made in understanding what are the fundamental determinants of exchange rates and what are the forces operating to bring them back in line with the fundamentals
