A cut into the text block is called a
drop cap. This example was produced
using the drop caps feature in InDesign. The software
wraps text around one or more characters and
controls the number of lines. The designer can adjust
the drop cap to match it to the surrounding
text. This can be implemented on the web in CSS. The
drop cap is rectangular, which can be visually awk-
ward with the sloping silhouette of the letter A.

THE BEST OF TIMES, the worst of times, or just
the worst of times? The dropped capital used here
(in a serif font) was positioned as a separate element. A
box was applied to an invisible box sitting behind the capital,
so the text appears to flow around the intruding right prow of
the drop cap. The left prow extends out into the margin, making
the drop cap feel firmly anchored in the text block. Hand-crafted
drop caps like this one cannot be applied systematically.

DESIGNERS SOMETIMES ADAPT the drop cap convention
for other purposes. An illustration or icon can appear in
place of a letterform. Purely typographic alternatives are
also possible, such as inserting a mark or symbol into the space carved
from the primary text. This technique is useful for creating a visual
structure for diverse and sometimes unexpected uses.
