Lost In Space The Reagan Years:

Lost in Space Greg Klerkx,2005-01-11 The daring revolutionary NASA that sent Neil Armstrong to the moon has lost its meteoric vision says journalist and space enthusiast Greg Klerkx NASA he contends has devolved from a pioneer of space exploration into a factionalized bureaucracy focused primarily on its own survival And as a result humans haven't ventured beyond Earth orbit for three decades Klerkx argues that after its wildly successful Apollo program NASA clung fiercely to the spotlight by creating a government sheltered monopoly with a few Big Aerospace companies Although committed in theory to supporting commercial spaceflight in practice it smothered vital private sector innovation In striking descriptions of space milestones spanning the golden 1960s Space Age and the 2003 Columbia tragedy Klerkx exposes the real NASA and envisions exciting public private cooperation that could send humans back to the moon and beyond **Lost in Space** Tony Auth,1988-01-01

Lost in Space Marleen S. Barr,2017-11-01 Archaeologists and anthropologists discover other civilizations science fiction writers invent them In this collection of her major essays Marleen Barr argues that feminist science fiction writers contribute to postmodern literary canons with radical alternatives to mainstream patriarchal society Because feminist science fiction challenges male centered social imperatives it has been marginalized and dismissed from the canon thus lost in space Moving beyond feminist science fiction itself Barr goes on to examine other literary genres from the perspective of feminist fabulation a term she has coined to encompass science fiction fantasy utopian literature and mainstream literature that critiques patriarchal fictions Discussing the works of such writers as Margaret Atwood Joanna Russ Salman Rushdie Paul Theroux Ursula Le Guin Herman Melville Saul Bellow Edgar Allan Poe and Marge Piercy Barr illuminates feminist science fiction's connections to other literary traditions and contemporary canons Her critical analysis yields a new and expanded understanding of feminist creativity **Lost in Space** Gerald M. 'Lost Peace'? Raffaele D'Agata, Lawrence Gray,2011 Were there any missed chances to build a more peaceful world than the present one after the Cold War Were there any attempts at working out a more comprehensive and more cooperative way to overcome it What was precisely at stake during the Cold War What was really at stake for the losers and what stakes did the winners gain if there are any winners at all Those questions were raised during a seminar where some outstanding scholars were invited to discuss them plainly before an audience of young students in an ancient yet peripheral Italian university The result may be seen as a readable concentration of basic and meaningful insights that often defy a noticeable amount of conventional wisdom on the ground of careful and authoritative scholarly research *Writing Urbanism* Douglas

Kelbaugh,Kit McCullough,2008-05-17 A carefully crafted reader which represents the discipline's best thinking and promotes an understanding of the principles of urban design *Writing Urbanism* is the ideal volume for both architects and urban designers **The Lost Decade? The 1950s in European History, Politics, Society and Culture** Heiko Feldner,Claire

Gorrara,Kevin Passmore,2010-10-12 This volume of essays explores the social political and cultural legacies of a decade

which has until relatively recently received scant scholarly attention Sandwiched uncomfortably between the traumatic events of the Second World War and the dramatic changes of the 1960s the 1950s appeared as seemingly transitional years while they were in fact an astonishingly fecund period of reassessment and experimentation when traditional models were re-evaluated and new models were road tested to be either developed or rejected An important intervention in the dynamic scholarly re-examination of the 1950s this volume analyzes these years in relation to three broadly defined areas historiography politics and society and culture What emerges from all three parts of the volume is a vision of the 1950s as a decade which was to have a profound impact on post-war European identities in two key respects as a time of accelerated European intellectual exchange and as a time of fertile receptivity to the new variously formulated and contested across and within national borders Written by experts in the field the contributions to this volume represent some of the most exciting work on the 1950s currently being undertaken in Europe and the US They combine high intellectual standards with accessibility and will appeal to academics students and the general reader alike

Way Out There In the Blue Frances FitzGerald, 2001-02-21 *Way Out There in the Blue* is a major work of history by the Pulitzer Prize winning author of *Fire in the Lake* Using the Star Wars missile defense program as a magnifying glass on his presidency Frances FitzGerald gives us a wholly original portrait of Ronald Reagan the most puzzling president of the last half of the twentieth century Reagan's presidency and the man himself have always been difficult to fathom His influence was enormous and the few powerful ideas he espoused remain with us still yet he seemed nothing more than a charming simple minded inattentive actor FitzGerald shows us a Reagan far more complex than the man we thought we knew A master of the American language and of self-presentation the greatest storyteller ever to occupy the Oval Office Reagan created a compelling public persona that bore little relationship to himself The real Ronald Reagan the Reagan who emerges from FitzGerald's book was a gifted politician with a deep understanding of the American national psyche and at the same time an executive almost totally disengaged from the policies of his administration and from the people who surrounded him The idea that America should have an impregnable shield against nuclear weapons was Reagan's invention His famous Star Wars speech in which he promised us such a shield and called upon scientists to produce it gave rise to the Strategic Defense Initiative Reagan used his sure understanding of American mythology history and politics to persuade the country that a perfect defense against Soviet nuclear weapons would be possible even though the technology did not exist and was not remotely feasible His idea turned into a multibillion dollar research program SDI played a central role in U S Soviet relations at a crucial juncture in the Cold War and in a different form it survives to this day Drawing on prodigious research including interviews with the participants FitzGerald offers new insights into American foreign policy in the Reagan era She gives us revealing portraits of major players in Reagan's administration including George Shultz Caspar Weinberger Donald Regan and Paul Nitze and she provides a radically new view of what happened at the Reagan Gorbachev summits in Geneva Reykjavik Washington and

Moscow Fitzgerald describes the fierce battles among Reagan's advisers and the frightening increase of Cold War tensions during Reagan's first term. She shows how the president who presided over the greatest peacetime military buildup came to espouse the elimination of nuclear weapons and how the man who insisted that the Soviet Union was an evil empire came to embrace the Soviet leader Mikhail Gorbachev and to proclaim an end to the Cold War long before most in Washington understood that it had ended. *Way Out There in the Blue* is a ground-breaking history of the American side of the end of the Cold War. Both appalling and funny, it is a black comedy in which Reagan playing the role he wrote for himself is the hero.

Lost in Space Jon Schiller, 2009 The US Space Shuttle delivering supplies to the US Space Station has a mechanical breakdown that prevents its return to the Earth. The remaining two US Space Shuttles are launched as quickly as possible to carry the needed supplies to the Space Station before the people there run out of expendables: air, water, etc. Both aging Shuttles suffer breakdowns; one explodes on the launch pad and the other has a breakdown in orbit near the Space Station. This second Shuttle is close enough to the Space Station to be secured by a cable and then winched up to the Space Station docking gate. The hero Dr. Donald Richards devises two options for rescuing the stranded astronauts: use the new European Space Station Shuttle or use the Soviet Space Shuttle. The US President overrules NASA's recommendation to use the Soviet Space Shuttle for the rescue, so Richards negotiates an agreement with the European Space Agency to use their Shuttle to rescue the astronauts. *Presidents of the United States--their Written Measure* James Sayler, 1996
