Lost Universe 5:

The Lost Universe Gene Weltfish, 1977-01-01 A fascinating insight into the life and culture of the Pawnee people is achieved here by the author's presentation of carefully gathered information in the form of a narrative of one year in Pawnee village. The first few chapters lay the groundwork of kinship lines followed by a narration of the life of one person in the village. Customs, ceremonies, beliefs, and hard work become apparent as the author leads one through the intricacies of the activities. Although it presents a great deal of detailed anthropological material, the manner of presentation turns the book into a readable account. The book is based on years of first hand study as well as scholarly research and is recommended as an in depth study of Plains Indian life. Reprint Bulletin Book Reviews. Gene Weltfish is coauthor with Ruth Benedict of *The Races of Mankind*. She is also the author of *The Origins of Art* and other books.

How the West Was Drawn David Bernstein, 2018-08 How the West Was Drawn explores the geographic and historical experiences of the Pawnees, the Iowas, and the Lakotas during the European and American contest for imperial control of the Great Plains during the eighteenth and nineteenth centuries. David Bernstein argues that the American West was a collaborative construction between Native peoples and Euro American empires that developed cartographic processes and culturally specific maps which in turn reflected encounter and conflict between settler states and indigenous peoples. Bernstein explores the cartographic creation of the Trans Mississippi West through an interdisciplinary methodology in geography and history. He shows how the Pawnees and the Iowas were wedged between powerful Osages, Sioux, the horse and captive rich Comanche Empire, French fur traders, Spanish merchants, and American Indian agents and explorers devised strategies of survivance and diplomacy to retain autonomy during this era. The Pawnees and the Iowas developed a strategy of cartographic resistance to predations by both Euro American imperial powers and strong indigenous empires navigating the volatile and rapidly changing world of the Great Plains by brokering their spatial and territorial knowledge either to stronger indigenous nations or to much weaker and conquerable American and European powers. How the West Was Drawn is a revisionist and interdisciplinary understanding of the global imperial contest for North America's Great Plains that illuminates in fine detail the strategies of survival of the Pawnees, the Iowas, and the Lakotas amid accommodation to predatory Euro American and Native empires.
