Lower Paleolithic Site At Hoxne England:

The Lower Paleolithic Site at Hoxne, England Ronald Singer, Bruce G. Gladfelter, John Wymer, 1993 At the edge of the small Suffolk village of Hoxne lies what is arguably the single most important Middle Pleistocene archaeological site in Europe Here the deposits contain not only prehistoric artifacts but also extraordinary records of fossil flora and fauna making Hoxne one of the few paleolithic sites where early hominid materials can be found with other types of information in their primary contexts Much controversy has surrounded the interpretation of these prehistoric materials and their stratigraphic position since John Frere published the first account of the site in 1797 Seeking to resolve some of the disputes a team from the University of Chicago began in 1971 the most extensive series of excavations yet undertaken This profusely illustrated volume presents the results of the team's five summers of excavations which ended in 1978 and includes contributions by twelve specialists who represent many branches of Quaternary science Although some uncertainty remains on various minor questions this will stand for many years to come as the definitive study of Hoxne's archaeological and geochronological significance Ronald Singer is the Robert R Bensley Professor in the Departments of Anatomy and Anthropology at the University of Chicago Bruce G Gladfelter is associate professor in the Department of Geography at the University of Illinois at Chicago John Wymer a self employed archaeologist has been a field officer with the Norfolk Archaeological Unit and the Essex Archaeological Unit

The Archaeology of V. Gordon Childe Vere Gordon Childe, 1994-07 Although V Gordon Childe died 36 years ago he remains the world's most renowned prehistorian His *What Happened in History* first published in 1942 is probably the most widely read book ever written by an archaeologist His influence and reputation endure despite the fact that many of the theoretical ideas he propounded as well as his interpretations of European and West Asian prehistory have been profoundly modified or even rejected since his death With contributions from such distinguished prehistorians as Kent V Flannery David Harris Leo S Klejn John Mulvaney Colin Renfrew Michael Rowlands and Bruce Trigger *The Archaeology of V Gordon Childe* is an attempt to evaluate Childe's achievement from different partly national perspectives and to assess how far and why his work remains significant today The contributors examine such persistent themes in Childe's thought as the nature of culture and the role of diffusion in cultural evolution and debate the question of whether Childe anticipated processual archaeology in his famous models of the Neolithic and Urban Revolutions Also included are evaluations of Childe's early career in Australia his relations with Soviet archaeology including a previously unknown letter from Childe to Soviet archaeologists and his impact on American archaeology

A Prehistory of the North John F. Hoffecker, 2005 Annotation Early humans did not drift north from Africa as their ability to cope with cooler climates evolved Settlement of Europe and northern Asia occurred in relatively rapid bursts of expansion This study tells the complex story spanning almost two million years of how humans inhabited some of the coldest places on earth

Chronometric Dating in Archaeology R.E. Taylor, Martin J. Aitken, 2013-06-29 Since World War II there has been tremendous success in the development of new methods for dating artifacts the so called radiocarbon revolution was only the first such discovery The increasing accuracy of the various new techniques has brought about major changes in archaeological research strategies This important new text compiles the work of some of today's most innovative archaeologists who summarize progress in their respective techniques over the last 30 years with an emphasis on developments of the last five and the status of current research

Crossing the Human Threshold Matt Pope, John McNabb, Clive Gamble, 2017-11-22 When was the human threshold crossed What is the evidence for evolving humans and their emerging humanity This volume explores in a global overview the archaeology of the Middle Pleistocene 800 000 to 130 000 years ago when evidence for innovative cultural behaviour appeared The evidence shows that the threshold was crossed slowly by a variety of human ancestors and was not confined to one part of the Old World Crossing the Human Threshold examines the changing evidence during this period for the use of place landscape and technology It focuses on the emergence of persistent places and associated developments in tool use hunting strategies and the control of fire

represented across the Old World by deeply stratified cave sites These include the most important sites for the archaeology of human origins in the Levant South Africa Asia and Europe presented here as evidence for innovation in landscape thinking during the Middle Pleistocene The volume also examines persistence at open locales through a cutting edge review of the archaeology of Northern France and England Crossing the Human Threshold is for the worldwide community of students and researchers studying early hominins and human evolution It presents new archaeological data It frames the evidence within current debates to understand the differences and similarities between ourselves and our ancient ancestors **Bulletin**

,1926 Origins of Human Innovation and Creativity Scott A. Elias,2012-08-29 Innovation and creativity are two of the key characteristics that distinguish cultural transmission from biological transmission This book explores a number of questions concerning the nature and timing of the origins of human creativity What were the driving factors in the development of new technologies What caused the stasis in stone tool technological innovation in the Early Pleistocene Were there specific regions and episodes of enhanced technological development or did it occur at a steady pace where ancestral humans lived The authors are archaeologists who address these questions armed with data from ancient artefacts such as shell beads used as jewelry primitive musical instruments and sophisticated techniques required to fashion certain kinds of stone into tools Providing state of art discussions that step back from the usual archaeological publications that focus mainly on individual site discoveries this book presents the full picture on how and why creativity in Middle to Late Pleistocene archeology anthropology evolved Gives a full original and multidisciplinary perspective on how and why creativity evolved in the Middle to Late Pleistocene Enhances our understanding of the big leaps forward in creativity at certain times Assesses the intellectual creativity of Homo erectus H neanderthalensis and H sapiens via their artefacts
