Thiessen,Alison Cook-Sather,2007-06-03 The International Handbook of Student Experience in Elementary and Secondary School brings together in a single volume the groundbreaking work of scholars who have conducted studies of student experiences of school in Afghanistan Australia Canada England Ghana Ireland Pakistan and the United States Drawing extensively on students interpretations of their experiences in school as expressed in their own words chapter authors offer insight into how students conceptualize and approach school understand and address the ongoing social opportunities for and challenges in working with other students and teachers and the multiple ways in which they shape and contribute to school improvement The individual chapters are framed by an opening chapter which provides background on bases of and trends in research on students experiences of school and a final chapter which uses the interpretive framework translation provided to explore how researching students experiences of school challenges those involved to translate their qualitative research methods the terms they evoke to describe and define students experiences of schools and in fact themselves as researchers

Conceptions of Culture Thomas E. Wren, 2012-07-16 The concept of culture stands clearly but unsteadily at the heart of multicultural education This book provides a systematic in depth understanding of the role that culture plays in the massive literature of multicultural education as multiple and antithetical definitions of culture exist The book also shows multicultural educators how to discern the definition used in any particular book or article Thomas Wren deploys methods and concepts from philosophy and the social sciences to provide an analytic framework within which the history and current state of culture theory can be understood both for its own sake and for its educational significance Although the book is full of theory it is not a theoretical book in the usual sense It is a road map accompanied by the related theoretical information and tools that graduate students and faculty need to 1 navigate the complex terrain of multicultural education literature 2 apply the book s analytical framework to that literature and to their own future practice and 3 anticipate the social changes and accompanying conceptual changes in our notions of culture that are now occurring as part of the cultural hybridity of today s students

Producing Success Peter Demerath, 2009-12-15 Middle and upper middle class students continue to outpace those from less privileged backgrounds Most attempts to redress this inequality focus on the issue of access to financial resources but as Producing Success makes clear the problem goes beyond mere economics In this eye opening study Peter Demerath examines a typical suburban American high school to explain how some students get ahead Demerath undertook four years of research at a Midwestern high school to examine the mercilessly competitive culture that drives students to advance Producing Success reveals the many ways the community s ideology of achievement plays out students hone their work ethics and employ various strategies to succeed from negotiating with teachers to cheating parents relentlessly push their children while manipulating school policies to help them get ahead and administrators aid high performers in myriad ways even naming over forty students valedictorians Yet as Demerath shows this unswerving commitment to individual advancement takes its toll leading to student stress and fatigue incivility and vandalism and the alienation of the less successful Insightful and candid Producing Success is an often troubling account of the educationally and morally questionable results of the American culture of success

doing While its focus tends toward issues of normalized violence Black Lives Matter in US Schools is equally concerned with possibilities for justice stemming from curricular change and affects like hope and love that are central to radical acts of resistance to oppression Themes range from critical literacies to IQ tests from Afro surrealism to historiography as the book strategically tacks between traditional forms of qualitative and quantitative research and more personal narratives Black Lives Matter in US Schools speaks powerfully against the continued onslaught of inequities in schools and their communities working to create space for forms of learning that are responsible to and for Black lives *The Productive High School* Joseph Murphy,2001-02-20 Murphy and his colleagues discuss how reform based on empirical evidence and a robust set of theories can create productive high schools for all students Focus is on core technologies of learning and teaching organizational systems and institutional linkages between schools and their environments Using current research and case studies from successful schools they show how to construct models of learning driven school communities that encourage excellence Key concepts cover defining the learning imperative developing humanized and intellectual relationships for learning laying the groundwork for dynamic adaptive change and building linkages with home and family Becoming a High Expectation Teacher Christine Rubie-Davies,2014-08-13 We constantly hear cries from politicians for teachers to have high expectations But what this means in practical terms is never spelled out Simply deciding that as a teacher you will expect all your students to achieve more than other classes you have taught in the same school is not going to translate automatically into enhanced achievement for students Becoming a High Expectation Teacher is a book that every education student training or practising teacher should read It details the beliefs and practices of high expectation teachers teachers who have high expectations for all their students and provides practical examples for teachers of how to change classrooms into ones in which all students are expected to learn at much higher levels than teachers may previously have thought possible It shows how student achievement can be raised by providing both research evidence and practical examples This book is based on the first ever intervention study in the teacher expectation area designed to change teachers expectations through introducing them to the beliefs and practices of high expectation teachers A holistic view of the classroom is emphasised whereby both the instructional and socio emotional aspects of the classroom are considered if teachers are to increase student achievement There is a focus on high expectation teachers those who have high expectations for all students and a close examination of what it is that these teachers do in their classrooms that mean that their students make very large learning gains each year Becoming a High Expectation Teacher explores three key areas in which what high expectation teachers do differs substantially from what other teachers do the way they group students for learning the way they create a caring classroom community and the way in which they use goalsetting to motivate students to promote student autonomy and to promote mastery learning Areas covered include Formation of teacher expectations Teacher personality and expectation Ability grouping and goal setting Enhancing class climate Sustaining high expectations for students Becoming a

Adler, 2006-03-01 Taken together these authors explore the many and varied challenges faced by teacher educators generally and social studies teacher educators specifically Their analyses and recommendations provide a starting point for ongoing deliberations about the nature and challenges of the field There are no easy answers but continuing the discussion is crucial
