The Origins of Meaning James R. Hurford, 2007-08-30 In this the first of two ground breaking volumes on the nature of language in the light of the way it evolved James Hurford looks at how the world first came to have a meaning in the minds of animals and how in humans this meaning eventually came to be expressed as language He reviews a mass of evidence to show how close some animals especially primates and more especially apes are to the brink of human language Apes may not talk to us but they construct rich cognitive representations of the world around them and here he shows are the evolutionary seeds of abstract thought the means of referring to objects the memory of events even elements of the propositional thinking philosophers have hitherto reserved for humans What then he asks is the evolutionary path between the non speaking minds of apes and our own speaking minds Why don't apes communicate the richness of their thoughts to each other Why do humans alone have a unique disposition to reveal their thoughts in complex detail Professor Hurford searches a wide range of evidence for the answers to these central questions including degrees of trust the role of hormones the ability to read minds and the willingness to cooperate Expressing himself congenially in consistently colloquial language the author builds up a vivid picture of how mind language and meaning evolved over millions of years His book is a landmark contribution to the understanding of linguistic and thinking processes and the fullest account yet published of the evolution of language and communication A wonderful read lucid informative and entertaining while at the same time never talking down to the reader by sacrificing argumentation for the sake of simplicity Likely to be heralded as the major

publication dealing with language evolution to date Frederick J Newmeyer University of Washington **Los Angeles Magazine** ,2000-02 Los Angeles magazine is a regional magazine of national stature Our combination of award winning feature writing investigative reporting service journalism and design covers the people lifestyle culture entertainment fashion art and architecture and news that define Southern California Started in the spring of 1961 Los Angeles magazine has been addressing the needs and interests of our region for 48 years The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian *Children's Books in Print* R R Bowker Publishing,Bowker,1999-12
