Bragdon, 2012-11-19 Despite the popular assumption that Native American cultures in New England declined after Europeans arrived evidence suggests that Indian communities continued to thrive alongside English colonists In this sequel to her Native People of Southern New England 1500 1650 Kathleen J Bragdon continues the Indian story through the end of the colonial era and documents the impact of colonization As she traces changes in Native social cultural and economic life Bragdon explores what it meant to be Indian in colonial southern New England Contrary to common belief Bragdon argues Indianness meant continuing Native lives and lifestyles however distinct from those of the newcomers She recreates Indian cosmology moral values community organization and material culture to demonstrate that networks based on kinship marriage traditional residence patterns and work all fostered a culture resistant to assimilation Bragdon draws on the writings and reported speech of Indians to counter what colonists claimed to be signs of assimilation She shows that when Indians adopted English cultural forms such as Christianity and writing they did so on their own terms using these

Divine Destiny Carolyn A. Haynes,2008 An investigation that shows the impact of manifest destiny and domesticity on women and non white men in nineteenth century America American culture was firmly undergirded by two dominant rhetorics during the nineteenth century manifest destiny and domesticity The first celebrated a divinely ordained spread of democracy individualism capitalism and civilization throughout the North American continent The second codified natural differences and duties of American men and women While the two rhetorics were touted as universal in their application and appeal in actuality both assumed a belief in masculine Anglo Saxon American superiority The triumph of the nation could be accomplished only through the concomitant removal acculturation or elimination of non

white peoples and through a careful circumscription of white women The rhetorics not only were linked through ethnocentrism and misogyny but also were connected through their reliance on the Protestant belief system and on the church itself Yet curiously despite their exclusion from the Protestant rhetorics of manifest destiny and domesticity the nineteenth century featured a remarkable growth in the conversion of women and non white men to the Protestant faith Indeed by mid century both groups had made significant inroads into select leadership positions within the Protestant denominations and had organized themselves in Protestant based groups to seek major social reforms Why did women and non white men seek to join a dominant religion that in many ways set out to limit and oppress them This book responds to that question by exploring the actual words and rhetorical choices made by some of the most progressive Protestant white African American and Native American thinkers of the era Olaudah Equiano William Apest Catharine Beecher Harriet Beecher Stowe Sojourner Truth and Amanda Berry Smith It argues that American Protestantism was both prohibitive and constitutive offering its followers an expedient acceptable but limited means for assuming social and political power and for forming a mutually empathetic relational notion of self while at the same time foreclosing the possibility for more radical roles and social change Carolyn A Haynes is Director of the Honors and Scholars Program at Miami University of Ohio

In Nature's Honor Patricia Montley, 2005 In Nature's Honor explores the eight solar holidays that mark the turning of the Wheel of the Year Each chapter begins with a history of the holiday the ways in which it has been celebrated from ancient to modern times its relationship to other religious and secular celebrations and its cultural and mythological foundations This history is followed by recommendations for specific activities to celebrate the season that individuals families or small groups can enjoy The chapters conclude with formal rituals suitable for use in larger faith communities These include scripted narration songs dramatic enactments litanies of seasonal blessings readings from poetry and mythology and suggestions for ceremonial food In Nature's Honor

reconnects the modern spiritual seeker with the earth centered practices of our ancestors This work explores the seasonal rituals that celebrate the earth and our connection to it which is not just physical but profoundly spiritual FROM THE AUTHOR From the Authorz In writing this book I discovered the most important theme running through the history of rituals related to the earth s seasons is renewal The wheel turns and the old season gives way to the new the old year to the new the old life to the new Each planting of seeds promises new possibilities Each harvest brings sustenance for yet another year Each fallow time regenerates the life of the soil The sun deities retreat and return The grain goddesses are lost and restored The vegetation gods die and rise again The cycle of life goes on and on birth after death after birth Perhaps what all the rituals celebrate is this ongoing ness of life the miraculous natural world that makes it possible and our abiding connection to it For the ancients the interdependence was clear When the people fasted on the eve of a new season s beginning they purified not just their own bodies but the land itself The fires that encouraged the fecundity of the land also made its people fertile For us moderns distanced from the earth by technology the interdependence is not as clear And we are paying the price in polluted air and water in soil erosion in deforestation in global warming How different the condition of the planet might be if we allowed ourselves to be renewed at each turning of the wheel of the year if we took the time periodically to celebrate the beauty and bounty of nature
