Missing Connection Between Business And Universities:

The Missing Connection Between Business and the Universities Ernest Albert Lynton, 1984 Building the Field of Higher Education Engagement Lorilee R. Sandmann, Diann O. Jones, 2023-07-03 Community engagement has evolved as a respected field and now occupies a seat at the academic table In the past this work had often been relegated to the institutional fringes of higher education its practitioners marginalized and the work often portrayed as service not scholarly Today higher education community engagement is a dynamic and continually evolving field of scholarship and practice that carries ever increasing academic respect This book contributes to the ever under construction edifice by presenting a scaffolding of the scholarship that has been part of the building process documenting and analyzing the past speculating about the future and framing a continuing conversation about and for the field The three parts of this book are designed to promote a continuing field building conversation a look back at foundational documents of the field a set of provocative questions interrogating those foundational works and a look to the future by the next generation of leaders in the field The central part is the special 20th anniversary issue of the Journal of Higher Education Outreach and Engagement which brings together key documents of the scholarship of engagement with reflections on those documents by key scholars and or the authors of the original works In addition to highlighting the foundations and evolution of the field this work also looks ahead to the next generation of voices and views as input to the conversation with a closing chapter that includes invited essays by nine outstanding community engaged thinkers and writers of the next 20 years who share their ideas about probable futures

inequities experienced by those at the bottom of the organizational chart despite the rhetoric of egalitarianism and opportunity that typically accompanies educational endeavors Through the example of workplace literacy programs Boyle debunks the commonplace assumption that education is an unmitigated good and addresses fears of corporate co optionation The phenomenon of employer sponsored education is revealed to be complex and contradictory with consequences that extend beyond the classroom walls Economic inequities are exacerbated by such programs and the social problems associated with illiteracy are not alleviated By exploring the boundary blurring that occurs when market organizations become involved with non market ideas and practices when public and private sector responsibilities shift and when the workplace becomes the new schoolhouse Boyle illuminates the complexities involved at organizational individual and societal levels
