The California Indians Robert F. Heizer, M. A. Whipple, 2023-07-28 This new expanded edition of *The California Indians* is a more comprehensive and thus more useful book than its predecessor which first appeared in 1951 and was reprinted seven times. The editors have combined the selections eighteen of which are new into a general survey of California Indian native cultures. They have avoided highly technical studies because they intend their book for the general reading public rather than for scholars. The editors discuss the present day Indians of California in a chapter written especially for this volume and provide a new extensive classified bibliography listing hundreds of published works arranged by culture areas and subjects. This list of references should prove useful to the nonprofessional who wishes to read further on a particular tribal culture or topic such as Indian basketry or place names or prehistoric rock art. This new expanded edition of *The California Indians* is a more comprehensive and thus more useful book than its predecessor which first appeared in 1951 and was reprinted seven times. The editors have combined the selections eighteen of which are new in *Bulletin of the Public Museum of the City of Milwaukee* Milwaukee Public Museum, 1917 *Ethnobotany* Paul E. Minnis, 2000 This reader in ethnobotany includes fourteen chapters organized in four parts. Paul Minnis provides a general introduction. The authors of the section introductions are Catherine S. Foeller, ethnoecology; Cecil H. Brown, folk classification; Timothy Jones, foods and medicines; and Richard I. Ford, agriculture. *Ethnobotany: A Reader* is intended for use as a textbook in upper division undergraduate and graduate courses in economic botany, ethnobotany, and human ecology. The book brings together for the first time previously published journal articles that provide diverse perspectives on a wide variety of topics in ethnobotany. Contributors include Janis B. Alcorn, M. Kat Anderson, Stephen B. Brush, Robert A. Bye, George F. Estabrook, David H. French, Eugene S. Hunn, Charles F. Hutchinson, Eric Mellink, Paul E. Minnis, Brian Morris, Gary P. Nabhan, Amadeo M. Rea, Karen L. Reichhardt, Jan Timbrook, Nancy J. Turner, and Robert A. Voeks. **Native America in the Twentieth Century** Mary B. Davis, 2014-05-01 First Published in 1996. Articles on present day tribal groups comprise more than half of the coverage ranging from essays on the Navajo, Lakota, Cherokee, and other large tribes to shorter entries on such lesser known groups as the Hoh, Paugusett, and Tunica-Biloxi. Also 25 includes maps. **Projectile Technology** Heidi Knecht, 2013-06-29 Artifacts linked to projectile technologies traditionally have provided the foundations for time-space systematics and cultural-historical frameworks in archaeological research having to do with foragers. With the shift in archaeological research objectives to

processual interpretations projectile technologies continue to receive marked attention but with an emphasis on the implications of variability in such areas as design function and material as they relate to the broader questions of human adaptation. The reason that this particular domain of foraging technology persists as an important focus of research I think comes in three parts. A projectile technology was a crucial part of most foragers' strategies for survival; it was functionally specific and it generally was fabricated from durable materials likely to be detected archaeologically. Being fundamental to meat acquisition and the principal source of calories, projectile technologies were typically afforded greater time investment, formal modification and elaboration of attributes than others. Moreover, such technologies tend to display greater standardization because of constraints on size, morphology and weight that are inherent to the delivery system. The elaboration of attributes and standardization of form gives projectile technologies time and space sensitivity that is greater than most other foraging technologies. And such sensitivity is immensely valuable in archaeological research.

Crow's Range David Beesley, 2017-04-04 John Muir called it the Range of Light, the most divinely beautiful of all the mountain chains I've ever seen. The Sierra Nevada, a single unbroken mountain range stretching north to south over four hundred miles, best understood as a single ecosystem but embracing a number of environmental communities, has been the site of human activity for millennia. From the efforts of ancient Native Americans to encourage game animals by burning brush to create meadows to the burgeoning resort and residential development of the present, the Sierra has endured and often suffered from the efforts of humans to exploit its bountiful resources for their own benefit. Historian David Beesley examines the history of the Sierra Nevada from earliest times, beginning with a comprehensive discussion of the geologic development of the range and its various ecological communities. Using a wide range of sources including the records of explorers and early settlers, scientific and government documents and newspaper reports, Beesley offers a lively and informed account of the history, environmental challenges and political controversies that lie behind the breathtaking scenery of the Sierra. Among the highlights are discussions of the impact of the Gold Rush and later mining efforts as well as the supporting industries that mining spawned, including logging, grazing, water resource development, market hunting, urbanization and transportation, the politics and emotions surrounding the establishment of Yosemite and other state and national parks, the transformation of the Hetch Hetchy into a reservoir and the desertification of the once lush Owens Valley, the roles of the Forest Service, Park Service and other regulatory agencies, the consequences of the fateful commitment to wildfire suppression in Sierran forests and the ever-growing impact of tourism and recreational use. Through Beesley's wide-ranging discussion, John Muir's divinely beautiful range is revealed in all its natural and economic complexity, a place that at the beginning of the twenty-first century is in grave danger of being loved to death. Available in hardcover and paperback.

The Natural World of the California Indians Robert F. Heizer, Albert B. Elsasser, 1980. Describes patterns of village life and covers such subjects as Indian tools and artifacts, hunting techniques and food. From publisher description.

Roaring Camp Susan Lee Johnson, 2000. Historical

insight is the alchemy that transforms the familiar story of the Gold Rush into something sparkling and new The world of the Gold Rush that comes down to us through fiction and film of unshaven men named Stumpy and Kentuck raising hell and panning for gold is one of half truths In this brilliant work of social history Susan Johnson enters the well worked diggings of Gold Rush history and strikes a rich lode She finds a dynamic social world in which the conventions of identity ethnic national and sexual were reshaped in surprising ways She gives us the all male households of the diggings the mines where the men worked and the fandango houses where they played With a keen eye for character and story Johnson restores the particular social world that issued in the Gold Rush myths we still cherish *The West Will Swallow You* Leath Tonino, 2019-10-24 At eighteen Vermont native Leath Tonino ventured west to attend college in Colorado Upon hearing his destination many of Tonino's friends and family predicted that he'd never come back he'd make the land of endless space and sky its ranges and their storms his home The West will swallow you one said in a tone that felt like part warning and part prophecy More than a decade later Tonino continues to call Vermont his home But despite his love of New England and his admiration for writers who sing the praises of their native ground he concedes that he is as Gary Snyder once phrased it promiscuous with landscapes Tonino has spent the intervening years since college traversing the alphabet of the American West from AZ to CA to UT to WY and writing about its mysterious and powerful beauty The resulting musings are collected in *The West Will Swallow You* the title of which is a nod to the words that stayed with him and that in many ways turned out to be true Although the adventures gathered here range widely in terrain and tone the western landscape is always front and center focusing on Arizona's remote Kaibab Plateau where Tonino worked as a biologist studying raptor communities in San Francisco's overgrown nooks and crannies and pigeon flocked park benches on ranches in Wyoming at campsites in Nevada in the mountains of Colorado and in libraries and national monuments in people in a midnight fox's eyes in the rushing wind

Proto Utian Grammar and Dictionary Catherine Callaghan, 2013-12-18 This book is the result of over 50 years of research and it represents an intellectual journey It is maximally accessible by tabulating the data and inserting frequent cross references Dictionary entries are in the alphabetical order of the deepest reconstruction in the set and there is an English Utian section at the end of the volume Yokuts or Proto Yokuts is also inserted where there is a resemblance This strategy is especially helpful for those who wish to use the volume for remote comparison In this manner it can serve as a reference book for seminars on non traditional languages The volume is also of interest to theoreticians because Utian languages exhibit features that are rare worldwide *Yosemite Nature Notes*, 1946 *The California Indians* Robert Fleming Heizer, Mary Anne Whipple, 1971 A comprehensive survey of California Indian native cultures discussing their origins traditions beliefs daily life struggles and culture *Treasures from Native California* Travis Hudson, Craig D Bates, 2016-07-01 The brief Russian presence in California yielded some of the earliest ethnography of Native Californians and some of the best collections of their material culture Unstudied by western scholars because of their being housed in

Russian museums they are presented here for the first time in an English language volume Descriptions of early nineteenth century travelers such as von Wrangel and Voznesenskii are followed by a catalog of objects ranging from hunting weapons to household objects to ritual dress to musical instruments games and gift objects This catalog of objects includes over 150 images many in full color An essential volume for those interested in the ethnology archaeology art and cultures of Native Californians
