Model Estate Planned Housing At Quarry Hill Leeds:

Model Estate (Routledge Revivals) Alison Ravetz, 2013-09-13 Quarry Hill Flats once both the pride and shame of its city of Leeds was an iconic Modernist symbol of the 1930s It marked the first use of a prefabricated building system for a large scale council estate replacing a notorious slum But it lasted barely a generation its complete demolition was announced as Alison Ravetz was finishing this study First published in 1974 this book is unique in its use of all estate records from conception to destruction as well as in its comprehensive approach including aspects usually missing in council housing studies notably the intimate experience of residents and a fraught long drawn out building period Ravetz argues that the Flats failure was due not to social breakdown as repeatedly alleged but rather to a rigidity of design and management unable to accommodate gradual incremental change This has continuing implications for the operation of bureaucratically designed and controlled social housing today *Model Estate* Alison Ravetz, 1974

The Fall and Rise of Social Housing Tunstall, Becky, 2020-02-12 Drawing on a unique archive spanning the lifetime of twenty council estate projects in the UK and using hundreds of resident voices this book reveals the secrets of council housing's failures and successes and the reasons for them Bringing to light the complex variety of the lived experiences of residents it shows how estate pathways were predetermined by factors such as location design and date as well as by their local and national social economic and political contexts The book highlights what can be learned from some of the successes of less successful housing projects and provides lessons for building sustainable communities in the twenty first century

Housing and Dwelling Barbara Miller Lane, 2006-11 A collection of thought provoking essays on the changing face of domestic architecture over two centuries highlighting the wide range of source materials and theoretical perspectives available to scholars of architectural history

State Housing in Britain Stephen Merrett, 2021-03-23 Originally published in 1979 this book was the first to provide a comprehensive political economic analysis of the historical origins and 20th Century experience of state housing in the UK The first part describes the growth of municipal housebuilding in the context of slum clearance before 1914 and the cycle of boom and slump between the wars Part 2 covers 1945 1980 with chapters on site acquisition and residential densities the housebuilding industry and its standards the balance between rehabilitation and redevelopment and the rise and fall of the high rise flat Sources and costs of capital finance and the management of the stock of council dwellings is also discussed The final part reviews the development of state housing policy since the War within a broad political and macro economic context

Routledge Library Editions: Housing Policy & Home Ownership Various, 2021-08-31 Originally published between 1961 and 1994 the volumes in this set sit equally comfortably in sociology and geography as well as housing studies Even though they were published some years ago their content continues to offer critical engagement with an evolving policy agenda which is even more important in a time of crisis and deeper polarization both nationally and globally as a result of the pandemic They Provide a comprehensive political economic analysis of the historical origins and 20th Century experience of

19th and 20th Century housing tenure in the UK France Germany the former USSR Israel Denmark Sweden Hungary Puerto Rico and the USA Discuss landlord tenant relations and the neglect of particular disadvantaged groups such as the elderly the single homeless and those in low income groups Examine the balance between rehabilitation and redevelopment and the rise and fall of the high rise flat Cover issues such as rent rent controls subsidies and urban renewal Look at the implications of selling council houses and evaluate the impact of the growth of home ownership in the UK Address the practical and political difficulties of devising measures which meet policy objectives *Europe Rehoused* Elizabeth Denby, 2014-09-19

Europe Rehoused was one of the most influential housing texts of the 1930s and is still widely cited Written by the housing consultant Elizabeth Denby 1894 1965 it offered a survey of the nearly two decades of social housing built across Europe since the end of World War One with the aim of informing British policy makers as a reviewer declared it has a decidedly propagandist flavour Denby was a leading figure in housing debates in the 1930s Adopting a line in sharp critique of what she saw as the entirely materialist approach of state housing policy Denby advocated the incorporation of social amenities alongside well designed and equipped flats and houses ideally sited within urban areas by the late 1930s she was a pioneering advocate of the concept of mixed development *Europe Rehoused* is divided into two parts The first considered the origins of the housing problem of the inter war decades which Denby dated to the onset of the Industrial Revolution She then examined the various national factors which influenced the problem climate post war economy and the nature of land ownership Finally she discussed the financial aspect the bodies responsible for house building and the nature of the subsidies available for building This was very much a schematic survey and the second and largest part of the book was devoted to individual studies of European practice and discussed two winners in the War two losers and two neutrals Sweden Holland Germany Vienna Italy and France This section was completed with a concluding chapter in which she compared continental work with the British system and the lessons that could be learnt in this country from abroad Although Denby's book was not the only one of its sort its importance lies in its polemical nature and its advocacy of a rehousing policy which would become widely adopted after WWII Significant too is that the book is the voice of a woman who had assumed a significant status as a housing expert in the inter war decades Walter Gropius who wrote the introduction to the US edition of the book observed that the book carried the weight of perfect expertness Such voices have for too long been overlooked yet Denby was formed part of a very strong tradition of women reformers who worked to re shape the inter war and post war British built environment Culture-Meaning-Architecture Keith Diaz Moore, 2019-07-17 This title was first published in 2000 This collection of essays provides an excellent integrated source for the latest thinking in multiple disciplines on the issue of culture and its relationship with built form and hence human environmental experience Whether one is primarily interested in how culture built environment inquiry affects theoretical issues research approaches research findings practical applications or has implications for teaching this book provides an engaging dialogue in regard to each of these perspectives

As important the book's introduction provides a conceptual framework for integrating the various contributions in a meaningful and systemic fashion Contributors come from disciplines including anthropology architecture human ecology psychology and urban planning

Re-forming Britain Elizabeth Darling, 2007-01-24 Re forming Britain considers the nature and practice of architectural modernism in inter war Britain in a new light Bringing hitherto little considered protagonists and projects to the fore it argues that rather than being an imported idiom the new architecture in Britain formed part of an ongoing attempt to make a modern nation Spanning the period 1925-42 the book

focuses on the key sites from and through which architectural modernism emerged in the UK Part one considers the main arena in which a will to modernize Britain developed in the 1920s In parts two and three the author documents contextualizes and explains how this modernizing will was given modernist form discussing the work of architects such as Wells Coates Maxwell Fry and Connell and Ward and their allied ventures with likeminded reformers in other fields These collaborations produced narratives of modernity buildings projects exhibitions and books through which the book argues modernist reformers were able to persuade politicians and those with influence upon them that modernism was the means to re form the nation Re forming Britain offers the first in depth analysis of well known modernist schemes such as Kensal House and the Pioneer Health Centre but also brings previously little studied or unknown activities to light This important work invites a new understanding of the nature of architectural modernism in inter war Britain and the ways in which it ultimately gave form to post war Britain

The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design Jon Lang, 2020-11-09 The Routledge Companion to Twentieth and Early Twenty First Century Urban Design is a fully illustrated descriptive and explanatory history of the development of urban design ideas and paradigms of the past 150 years The ideas and projects hypothetical and built range in scale from the city to the urban block level The focus is on where the generic ideas originated the projects that were designed following their precepts the functions they address and or afford and what we can learn from them The morphology of a city its built environment evolves unselfconsciously as private and governmental investors self consciously erect buildings and infrastructure in a pragmatic piecemeal manner to meet their own ends Philosophers novelists architects and social scientists have produced myriad ideas about the nature of the built environment that they consider to be superior to those forms resulting from a laissez faire attitude to urban development Rationalist theorists dream of ideal futures based on assumptions about what is good empiricists draw inspirations from what they perceive to be working well in existing situations Both groups have presented their advocacies in manifestoes and often in the form of generic solutions or illustrative designs This book traces the history of these ideas and will become a standard reference for scholars and students interested in the history of urban spaces including architects planners urban historians urban geographers and urban morphologists
