*Monuments for Posterity* Antony Kalashnikov, 2023-04-15 Monuments for Posterity challenges the common assumption that Stalinist monuments were constructed with an immediate propagandistic function arguing instead that they were designed to memorialize the present for an imagined posterity In this respect even while pursuing its monument building program with a singular ruthlessness and on an unprecedented scale the Stalinist regime was broadly in step with transnational monument building trends of the era and their undergirding cultural dynamics By integrating approaches from cultural history art criticism and memory studies along with previously unexplored archival material Antony Kalashnikov examines the origin and implementation of the Stalinist monument building program from the perspective of its goal to immortalize the memory of the era He analyzes how this objective affected the design and composition of Stalinist monuments what cultural factors prompted the sudden and powerful yearning to be remembered and most importantly what the culture of self commemoration revealed about changing outlooks on the future both in the Soviet Union and beyond its borders Monuments for Posterity shifts the perspective from monuments political ideological content to the desire to be remembered and prompts a much needed reconsideration of the supposed uniqueness of both Stalinist aesthetics and the temporal culture that they expressed Many Stalinist monuments still stand prominently in postsocialist cityscapes and remain

the subject of continual heated political controversy Kalashnikov makes manifest monuments intentional attempts to seduce us the posterity for whom they were built

*Exploring Archaeoastronomy* Liz Henty,2022-03-24 Archaeoastronomy and archaeology are two distinct fields of study which examine the cultural aspect of societies but from different perspectives Archaeoastronomy seeks to discover how the impact of the skyline is materialized in culture by alignments to celestial events or sky based symbolism yet by contrast archaeology s approach examines all aspects of culture but rarely considers the sky Despite this omission archaeology is the dominant discipline while archaeoastronomy is relegated to the sidelines The reasons for archaeoastronomy s marginalized status may be found by assessing its history For such an exploration to be useful archaeoastronomy cannot just be investigated in a vacuum but must be contextualized by exploring other contemporaneous developments particularly in archaeology On the periphery of both there are various strands of esoteric thought and pseudoscientific theories which paint an alternative view of monumental remains and these also play a part in the background The discipline of archaeology has had an unbroken lineage from the late 19th century to the present On the other hand archaeoastronomy has not been consistently titled having adopted various different names such as alignment studies orientation theory astro archaeology megalithic science archaeotopography archaeoastronomy and cultural astronomy names which depict variants of its methods and theory sometimes in tandem with those of archaeology and sometimes in opposition Similarly its academic status has always been unclear so to bring it closer to archaeology there was a proposal in 2015 to integrate archaeoastronomy research with that of archaeology and call it skyline archaeology This volume will examine how all these different variants came about and consider archaeoastronomy s often troubled relationship with archaeology and its appropriation by esotericism to shed light on its position today

**How Religion Evolved** Brian McVeigh, 2017-07-12 Why did many religious leaders Moses Old Testament prophets Zoroaster claim they heard divine voices Why do ancient civilizations exhibit key similarities e g the living dead treating the dead as if they were still alive speaking idols care and feeding of effigies monumental mortuary architecture and houses of gods pyramids ziggurats temples How do we explain strange behaviour such as spirit possession speaking in tongues channelling hypnosis and schizophrenic hallucinations Are these lingering vestiges of an older mentality Brian J McVeigh answers these riddles by updating bicameralism First proposed by the psychologist Julian Jaynes this theory postulates that an earlier mentality existed a human the brain s left hemisphere heard voices of gods or ancestors the brain s right hemisphere Therefore ancient religious texts reporting divine voices were recounting of audio visual hallucinations a method of social control when early populations expanded As growing political economic complexity destabilized god governed states in the late second millennium BCE divine voices became

inadequate Eventually humans had to culturally acquire new cognitive skills modern religions to accommodate increasing social pressures selves replaced the gods and history witnessed an inward turn This psychological interiorization of spiritual experience laid the foundations for the world s great religions and philosophies that arose in India China Greece and the Middle East in the middle of the first millennium BCE      **Subcommittee Hearing on H.R. 1304, to Authorize the Secretary of Defense to Make a Monetary Allowance in Lieu of Headstones Or Markers for Certain Graves** United States.
