The Cambridge Photographic Moon Atlas Alan Chu,Wolfgang Paech,Mario Weigand,2012-09-28 Featuring 388 high resolution photographs and concise descriptions of the Moon s topography this atlas is an indispensable guide for amateur astronomers and astrophotographers **The Hatfield SCT Lunar Atlas** Anthony Cook,2013-10-11 In 2004 it became obvious that Henry Hatfield s original atlas wasn t suitable for all current commercially made amateur telescopes Newtonian telescopes and astronomical refractors for many years the only choice for amateurs invert the observed image The standard Hatfield Atlas therefore follows the IAU International Astronomical Union convention of having maps and photographs with South at the top and West on the left an inverted image However the current ranges of Schmidt Cassegrain and Maksutov telescopes that s most of those manufactured by Meade Celestron and many others don t invert the observed image but instead reverse it left for right That s with North at the top and East on the left Because of the way the human visual system works it is almost impossible to mentally mirror image a map to compare it with the view through the eyepiece so even turning an IAU standard atlas upside down doesn t help This new SCT version of the Atlas solves this problem for observers Identification of lunar features is made quick and easy The new digitally re mastered second edition vastly improves the clarity and definition of the original photographs significantly beyond the resolution limits of the photographic grains present in earlier atlas versions whilst preserving the layout and style of the original publications This has been achieved by merging computer visualized Earth based views of the lunar surface derived from NASA s Lunar Reconnaissance Orbiter data with scanned copies of Commander Hatfield s photographic plates using the author s own software The result is a The Hatfield SCT Lunar Atlas for 21st century amateur telescopes up to and beyond 12 inch aperture It contains all the features that made the original so widely used a combination of an index of all International Astronomical Union named primary lunar features and twelve chart areas help to locate any named lunar features of interest that can each be examined under typically five different states of illumination Close ups of interesting features are also included The new Atlas is supplemented by an

introduction to its use a short description of the digital re mastering technique and a completely new section describing lunar observing techniques At the end of the atlas there is an index of all named features and crater diameters along with a summary table of the dates and times that the original Hatfield images represent **Moon Zoo** Carol Ann Duffy,2009

The Hatfield Lunar Atlas Anthony Cook,2012-12-12 The Hatfield Lunar Atlas has become an amateur lunar observer s bible since it was first published in 1968 A major update of the atlas was made in 1998 using the same wonderful photographs that Commander Henry Hatfield made with his purpose built 12 inch 300 mm telescope but bringing the lunar nomenclature up to date and changing the units from Imperial to S I metric This edition is important since the fact is that modern telescope optics digital imaging equipment and computer enhancement can easily surpass what was achieved with Henry Hatfield s 12 inch telescope and a film camera This limits the usefulness of the original atlas to visual observing or imaging rather small amateur telescopes The new digitally re mastered edition vastly improves the clarity and definition of the original photographs significantly beyond the resolution limits of the photographic grains present in earlier atlas versions while preserving the layout and style of the original publications This has been achieved by merging computer visualized Earth based views of the lunar surface derived from NASA s Lunar Reconnaissance Orbiter data with scanned copies of Commander Hatfield s photographic plates using the author s own software The results is a The Hatfield Lunar Atlas for 21st century amateur telescopes up to and beyond 12 inch aperture **Moon's Labyrinth: Vol.12** Hungry Panda ,2025-01-14

His friend and his wife betrayed him The only thing left to him was his massive debt and his precious daughter He was without hope as he lived at the bottom However a last chance had come to Sungyoon He was a man without a heartbeat and he will explore the Moon s Labyrinth He ll explore the parts of the dungeon yet to be seen *Space Science and Public Engagement* Amy Paige Kaminski,2021-06-04 Space Science and Public Engagement 21st Century Perspectives and Opportunities critically examines the many dimensions of public engagement with space science by exploring case studies

that show a spectrum of public engagement formats ranging from the space science community's efforts to communicate developments to the public to citizenry attempting to engage with space science issues. It addresses why public engagement is important to space science experts, what approaches they take, how public engagement varies locally, nationally, and internationally, and what roles non-experts have played in shaping space science. Space scientists, outreach specialists in various scientific disciplines, policymakers, and citizens interested in space science will find great insights in this book that will help inform their future engagement strategies. Critically examines how expert organizations and the space science community have sought to bring space science to the public. Examines how the public has responded and in some cases self-organized to opportunities to contribute to space science. Outlines future engagement interests and possibilities.

Shadowrun: Shadows Down Under Jean Rabe, **The Little Blue Princess** Peter Jalesh, 2013-04-16

The Little Blue Princess is a story of a test pilot of an instant time flying machine that accidentally flies to planet Saturn. A small introduction talks about the author's childhood, his parents. By mistake, he moves the flying spot stick to planet Saturn. In an instant, he lands on a Saturn moon called Rhea. The pilot knows that the next favorable angle to return to Earth would occur after 145 days Earth time. During those 145 days, he'd have to survive as best as he can on Rhea moon. When he exits the time flying machine, he is received on the ground by a little blue princess named Rhea Lu. The princess introduces the pilot to her royal family and gets permission from her parents to accompany the pilot in his endeavors and to help him know what Rhea moon is about. With each chapter that follows, we get details about moon's landscape, animals, and flora and life. The story is narrated by the pilot at the first person. Though with each chapter, the princess presents like a true tourist guide, the most important aspects of life on Rhea moon. It also introduces the reader to facts about astronomy, botanic, and zoology based on her own ideas about nature and life. Details about people living on the moon surface at every step, like the moon is covered by a huge bubble built long time ago. The bubble keeps the temperature on the moon at an acceptable level for life. The next day on his life on the moon, the pilot gets a breakfast invitation and is initiated into the moon cuisine, which to the pilot's disappointment consists exclusively of crude sun-dried or boiled vegetables. Also, he is taken aback by the metallic aspect and taste of the salad leaves. He discovers also that Rhea moon is inhabited by fantastic birds and animals stepping on each other in their rush to grab food. Princess Rhea Lu asked the pilot about how the music sounds on Earth. The pilot accompanies her to the time flying machine and plays for her a DVD. Listening to Mozart's music, Princess Rhea Lu began unexpectedly to cry. At this moment, the story introduces a highly sensitive deviation of the plot towards its final conclusion. I wish I could compose such music. Mozart is a genius, she said. The princess plants the first seed of her desire to travel to Earth with the pilot and learn to compose Mozartian music. Everything is set for the pilot and the princess to instantly fly to Earth. The reception of both of them on Earth is overwhelming on the launching pad as well as the conservatory of music.
