**Moral Imperialism** Berta Esperanza Hernández-Truyol, 2002      Moral Imperialism Berta Esperanza Hernández-Truyol, 2002-10-27      *Evil in the Modern World* Laura Dryjanska, Giorgio Pacifici, 2022-03-10 This interesting volume focuses on a set of phenomena which increasingly alarm the political world and public opinion from the more obvious ones like torture disease human trafficking abuse genocide displacement to more subtle forms found in sports technology and law It looks at how and why these phenomena are universally condemned and could be considered to threaten the very foundations of modern democracy yet continue to be tolerated The volume therefore goes beyond what Hannah Arendt has called the banality of evil and discusses the presence of condemned and heinous practices in society as fluid and chaotic but as non trivial capable of great transmutations through various epochs Practices and actions considered as evil manifest in situations where individuals or groups hold power or seize power and the contributions in this volume explore the close relation between power and evil The volume draws upon sociology psychology cultural studies political science as well as philosophy theology anthropology and neurology of the individual and of the group to provide a comprehensive understanding of the multiple facets of evil in the contemporary world      *Morality* Jarrett Zigon, 2008-10-01 *Morality An Anthropological Perspective* provides the first account of anthropological approaches to the question of morality By considering how morality is viewed and enacted in different cultures and how it is related to key social institutions such as religion law gender sexuality and medical practice *Morality* takes a closer look at some of the most central questions of the morality debates of our time The book combines theory with practical case studies for student use Drawing on anthropological philosophical and general social scientific literature the book will be useful for both undergraduate students and researchers Accessibly written *Morality* provides a unique and wide ranging perspective on morality and will be essential reading for those interested in this important contemporary debate      *Egalitarian Rights Recognition* Matt Hann, 2016-08-30 This book takes a distinctive and innovative approach to a relatively under explored question namely Why do we have human rights Much political discourse simply proceeds from the idea that humans have rights because they are human without seriously interrogating this notion *Egalitarian Rights Recognition* offers an account of how human rights are created and how they may be seen to be legitimate rights are created through social recognition By combining readings of 19th Century English philosopher T H Green with 20th Century political theorist Hannah Arendt the author constructs a new theory of the social recognition of rights He challenges both the standard natural rights approach and also the main accounts of the social recognition of rights which tend to portray social recognition as settled norms or established ways of acting In contrast Hann puts forward a 10 point account of the dynamic and contingent social recognition of human rights which emphasises the importance of meaningful socio economic equality      **Migrants and Rights** Mary Crock, 2017-05-15 The concept of the migrant as rights bearer at law is surprisingly recent and under developed Migrants have traditionally been seen as outsiders

**EU Strategies on Governance Reform** Wil Hout, 2013-09-13 This book discusses the European Union s approach to governance reform in its development assistance relationships with various groups of developing countries A group of expert authors outline the general features of the position on governance taken by the EU which is currently the major multilateral donor of development assistance and discuss the implementation of EU policies in a set of cases the group of African Caribbean and Pacific ACP states the New Partnership for Africa s Development NEPAD Southeastern Europe Central Asia the Euro Mediterranean Latin America and fragile states The contributions to the book argue that the EU s position on governance reform particularly since the adoption of the European Consensus on Development in 2005 has had distinctly neoliberal overtones The EU s governance related strategies have been instrumental to deepening market based reform in aid receiving countries Policies on state building adopted by the EU reflect mainly the interests of and ideas embraced by the EU and its member states To an important extent the rhetoric accompanying EU policies does not match with the political and social dynamics inherent in governance structures on the ground in many of its aid recipient partner countries This book was published as a special issue of Third World Quarterly

**Territory, Authority, Rights** Saskia Sassen, 2008-07-01 Where does the nation state end and globalization begin In Territory Authority Rights one of the world s leading authorities on globalization shows how the national state made today s global era possible Saskia Sassen argues that even while globalization is best understood as denationalization it continues to be shaped channeled and enabled by institutions and networks originally developed with nations in mind such as the rule of law and respect for private authority This process of state making produced some of the capabilities enabling the global era The difference is that these capabilities have become part of new organizing logics actors other than nation states deploy them for new purposes Sassen builds her case by examining how three components of any society in any age territory authority and rights have changed in

themselves and in their interrelationships across three major historical assemblages the medieval the national and the global The book consists of three parts The first Assembling the National traces the emergence of territoriality in the Middle Ages and considers monarchical divinity as a precursor to sovereign secular authority The second part Disassembling the National analyzes economic legal technological and political conditions and projects that are shaping new organizing logics The third part Assemblages of a Global Digital Age examines particular intersections of the new digital technologies with territory authority and rights Sweeping in scope rich in detail and highly readable Territory Authority Rights is a definitive new statement on globalization that will resonate throughout the social sciences *Human Rights in Translation* Michal Jan Rozbicki, 2018-10-26 This volume reflects on what happens when the idea and practice of universal human rights cross the cultural borders between different communities of knowledge Although such rights are usually presumed to be founded on certain globally shared beliefs the norms and values of many cultures are often incommensurable with these universal principles and hence the need to translate and vernacularize them Any law that would successfully institutionalize them must frame human rights in a way that defers to the historically constituted cultural capital of the society in which it is to function The essays in this book seek to illuminate different cognitive contexts that produce different meanings of rights identify spaces of intercultural crossings where differences can coexist and offer usable narratives and metaphors that could help mediate between distinct cultures They show that the path forward does not lead through a unified theory of human rights that can be applied globally nor through mere repackaging of rights in a more understandable language What is needed is a deep understanding of the process of intercultural dialogue the cultural grammar involved in relationships of difference
